Social Science Methods In The Legal Process:

Social Science Methods in the Legal Process Noreen L. Social Science, Social Policy, and the Law Patricia Ewick, Robert A. Kagan, Austin Sarat, 1999-06-10 Social science has been an important influence on legal thought since the legal realists of the 1930s began to argue that laws should be socially workable as well as legally valid With the expansion of legal rights in the 1960s the law and social science were bound together by an optimistic belief that legal interventions if fully informed by social science could become an effective instrument of social improvement Legal justice it was hoped could translate directly into social justice Though this optimism has receded in both disciplines social science and the law have remained intimately connected *Social Science Social Policy and the Law* maps out this new relationship applying social science to particular legal issues and reflecting upon the role of social science in legal thought Several case studies illustrate the way that the law is embedded within the tangled interests and incentives that drive the social world One study examines the entrepreneurialism that has shaped our systems of punishment from the colonial practice of deportation to today's privatized jails Another case shows how many of those who do not qualify for legal aid cannot afford an effective legal defense with the consequence that economic inequality leads to inequality before the law Two other studies look at the mixed results of legal regulation the failure of legal safeguards to stop NASA's fatal 1986 Challenger launch decision and the complicated effects of regulations to curb conflicts of interest in law firms These two cases demonstrate that the law's effectiveness can depend not only on how it is drafted but also on how well it harmonizes with pre-existing social norms and patterns of self-regulation The contributors to this volume share the belief that social science can and should influence legal policymaking Empirical research is necessary to offset anecdotal evidence and untested assertions But research that is acceptable to the academy may not stand up in court and as a result social science does not always get a sympathetic hearing from legal decision makers The relationship between social science and the law will always be complex this volume takes a lead in showing how it can nonetheless be productive

Helling, 2014-05-19 This volume contains the English translation of Felix Kaufmann's 1895/1945 main work *Methodenlehre der Sozialwissenschaften* 1936 In this book Kaufmann develops a general theory of knowledge of the social sciences in his role as a cross border commuter between Husserl's phenomenology Kelsen's pure theory of law and the logical positivism of the Vienna Circle This multilayered inquiry connects the value oriented reflections of a general philosophy of science with the specificity of the methods and theories of the social sciences as opposed to abstract natural science and psychology The core focus of the study is the attempt to elucidate how and under what conditions scientific knowledge about social facts empirically justified and theoretically embedded can be obtained The empirical basis of knowledge within the social sciences forms a phenomenological concept of experience According to Kaufmann this concept of experience exhibits a complex structure Within the meaning interpretation of human action as the core of knowledge in the social sciences this structure reaches out across the isolated act of verification toward the synthesis of external and internal experiences The book opens with a detailed and useful introduction by Ingeborg K Helling which introduces the historical and theoretical background of Kaufmann's study and specifically illuminates his relation to Alfred Schütz and John Dewey Finally it contains interviews with and letters to members of his family colleagues and students
