Anderson, Isabelle Schulze, 2007-01-04 Comparative analysis of pension systems in the EU 15 countries and Switzerland Gives an overview of the political institutions and party systems and traces the proposed and enacted pension reforms since the 1980s **New Policies for Mandatory Defined Contribution**

**Pensions** Gregorio Impavido, Esperanza Lasagabaster, Manuel García-Huiter, 2010-06-04 Mandatory defined contribution pension markets are present in a growing number of countries around the world. But despite their popularity, policymakers continue to struggle with two key policy concerns. On the one hand, a number of design shortcomings encourages pension firms to charge high administrative fees. On the other hand, the global crisis that started in 2007 has reignited the debate on whether pension participants bear excessive investment risk. Both are valid policy concerns as their incidence can imply higher than expected levels of poverty among old age individuals. Both concerns have the same root problem: the limited capacity of individuals to choose what is best for them. This in turn stems from a combination of inadequate financial education, bounded rationality, and the use of simplistic rules of thumb that produce systematic biases in the decision making process of individuals. While improving financial education is an obvious avenue to pursue, this book is more concerned with design features that can exploit these systematic biases to protect consumers from themselves. *New Policies for Mandatory Defined Contribution Pensions: Industrial Organization, Models, and Investment Products* i discusses the main implications for the functioning of mandatory defined contribution pensions of consumers' inability to make rational choices; ii describes how jurisdictions have tried to address these problems through ad hoc policy interventions; and iii proposes new policy directions in the areas of industrial organization, models, and investment products to address these concerns more effectively. Written for practitioners and researchers around the world, this book provides access to new thinking on mandatory defined contribution pension systems and it makes an important contribution to the ongoing policy debate on how to best structure mandatory defined contribution pillars.

**Old-age Income Support in the 21st Century** Robert Holzmann, 2005-01-01 The past decade has brought an increasing recognition to the importance of pension systems to the economic stability of nations and the security of their aging populations. This report attempts to explain current policy thinking and update the World Bank's perspective on pension reform. This book incorporates lessons learned from recent Bank experiences and research that have significantly increased knowledge and insight regarding how best to proceed in the future. The book has a comprehensive introduction and two main parts. Part I presents the conceptual underpinnings for the Bank's thinking on pension systems and reforms, including structure of Bank lending in this area. Part II highlights key design and implementation issues where it signals areas of confidence and areas for further research and experience, and includes a section on regional reform experiences including Latin American and Europe and Central Asia.

*Pension Reform in Southeastern Europe* Robert Holzmann, Landis MacKellar, Jana Repančik, 2009-01-01 Around the world, pension reform remains at the center of public debate. Its social, fiscal, and macroeconomic implications confront policy makers, practitioners, and academia with challenging questions. Pension systems in aging societies in need of reform and further stressed by the pressures of globalization require parallel reforms of the labor market and effective lifelong learning not only to promote working longer but to ensure that people can actually do so. At the same time, the working population should be motivated to contribute to pension schemes and

prepare for old age Diversify      **Labor Markets and Social Policy in Central and Eastern Europe** N. A. Barr, 2005-01-01 Labor Markets and Social Policy in Central and Eastern Europe summarises social policy reform during the transition and EU accession and analyses the social policy challenges which continue to face both old and new member states Specifically the book amplifies two sets of arguments First social policy under communism was in important respects well suited to the old order and precisely for that reason was systematically badly suited to a market economy Strategic reform directions thus followed from the nature of the transition process and from constraints imposed by EU accession Secondly successful accession is not the end of the story economic and social trends over the past 50 years are creating strains for social policy which all countries old and new members will have to face This book will be of interest to readers interested in social policy particularly those with an interest in the process of post communist transition in EU accession and in future social policy challenges for the wider Europe It should be of interest to academics in departments of economics social policy and political science and to policy makers including government advisers and civil servants      *Nonfinancial Defined Contribution Pension Schemes in a Changing Pension World* Robert Holzmann, Edward Palmer, David Robalino, 2012-06-21 Pensions are under scrutiny worldwide in view of increasing life expectancy and adverse demographics This volume offers an overview of unfunded individual accounts introduced in the mid 1990s in Italy Latvia Poland and Sweden in order to assure a successful adulthood and an even better start for the off springs      Transformation of Social Security Katharina Müller, Andreas Ryll, Hans-Jürgen Wagener, 2012-12-06 This collection of papers focuses on the recent pension reform experiences in Central Eastern Europe while starting from a broader theoretical and empirical context It provides evidence for the political feasibility of radical pension reform considered unlikely in the West The approach is both multi disciplinary and cross regional The book contains papers by economists political scientists and sociologists The authors come from Germany Poland Hungary the Czech Republic and the US The volume consists of four parts First general questions of transformation and social security in post 1989 Central Eastern Europe are addressed followed by an introduction into issues and role models in the international pension reform debate Then three Central European country cases are presented analysing institutional legacies recent reform measures and relevant political actors A comparative section on Central Eastern European pension reforms concludes this book      The Institutional Dynamics of Culture, Volumes I and II Perri Six, 2018-12-20 These two volumes present the most important recent developments in the institutional theory of culture and demonstrate their practical applications Sometimes called grid group analysis or cultural theory they derive from the work of Durkheim in the 1880s and 1900s and develop the insights of the anthropologist Mary Douglas and her followers from the 1960s on First redefined within social and cultural anthropology the theory s influence is shown in recent years to have permeated all the main disciplines of social science with substantial implications for politics history business work and organizations the environment technology and risk and crime and consumption Today the institutional theory of culture now rivals the rational

choice Weberian and postmodern outlooks in influence across the social sciences

**Sustainability of Pension Systems in the New EU Member States and Croatia** Leszek Kasek, Thomas Laursen, Emilia Skrok, 2008-02-01 This study finds that pension reforms in recent years have improved the efficiency and sustainability of pension systems in the new member states of the European Union and Croatia. However, for many countries, these probably have not gone far enough to ensure long-term sustainability given the aging of the population. Reforms have included changes to Pay As You Go (PAYG) systems, including increases in retirement ages, not at least for women, new benefit formulas, and new indexation mechanisms. Some countries, Latvia and Poland, have further strengthened the link of contributions and benefits to the sustainability of the PAYG system through the introduction of national defined contribution accounts. The link is strengthened also by moving to a point system, which has been adopted by many of the countries. Several countries have introduced a second private pension pillar funded through diversion of part of the pension contributions, thereby diversifying risk. However, some countries, in particular the Czech Republic, Slovenia, and Romania, will need to do more to safeguard the long-term viability of their pension systems, while others face challenges to ensure equitable pension systems and adequate living standards for all elderly people.
