Justice in Young Adult Speculative Fiction Marek C. Oziewicz, 2015-04-17 This book is the first to offer a justice focused cognitive reading of modern YA speculative fiction in its narrative and filmic forms It links the expansion of YA speculative fiction in the 20th

century with the emergence of human and civil rights movements with the communitarian revolution in conceptualizations of justice and with spectacular advances in cognitive sciences as applied to the examination of narrative fiction Oziewicz argues that complex ideas such as justice are processed by the human mind as cognitive scripts that scripts when narrated take the form of multiply indexable stories and that YA speculative fiction is currently the largest conceptual testing ground in the forging of justice consciousness for the 21st century world Drawing on recent research in the cognitive and evolutionary sciences Oziewicz explains how poetic retributive restorative environmental social and global types of justice have been represented in narrative fiction from 19th century folk and fairy tales through 21st century fantasy dystopia and science fiction Suggesting that the appeal of these and other nonmimetic genres is largely predicated on the dream of justice Oziewicz theorizes new justice scripts as conceptual tools essential to help humanity survive the qualitative leap toward an environmentally conscious culturally diversified global world This book is an important contribution to studies of children s and YA speculative fiction adding a new perspective to discussions about the educational as well as social potential of nonmimetic genres It demonstrates that the justice imperative is very much alive in YA speculative fiction creating new visions of justice relevant to contemporary challenges

Future Ethics Stefan Skrimshire, 2010-08-12 Future Ethics Climate Change and Political Action presents a comprehensive examination of the philosophical questions facing activists policy makers and educators fighting the causes of climate change These questions reflect a genuine crisis in ethical reflection for individuals and groups in today s society and are also underpinned by a broader question of how the future forms the basis for action in the present For instance does the reporting of impending points of no return in global warming renew a spirit of resistance or a spirit of fatalism How is the future of the human species really imagined in society and how does this affect our sense of ethical responsibility In this fascinating book thirteen leading experts explore the philosophical and ethical issues underlying social responses to climate change and in particular how these responses draw upon ideas about the future Ideal for students of environmental ethics in multiple disciplines the book provides sources and discussion for anyone interested in issues to do with environment society and ethics

Luna Monthly ,1970 **From Energy to Information** Bruce Clarke, Linda Dalrymple Henderson, 2002 This book offers an innovative examination of the interactions of science and technology art and literature in the nineteenth and twentieth centuries Scholars in the history of art literature architecture computer science and media studies focus on five historical themes in the transition from energy to information thermodynamics electromagnetism inscription information theory and virtuality Different disciplines are grouped around specific moments in the history of science and technology in order to sample the modes of representation invented or adapted by each field in response to newly developed scientific concepts and models By placing literary fictions and the plastic arts in relation to the transition from the era of energy to the information age this collection of essays discovers unexpected resonances among concepts and materials not previously brought into juxtaposition In particular it demonstrates

the crucial centrality of the theme of energy in modernist discourse Overall the volume develops the scientific and technological side of the shift from modernism to postmodernism in terms of the conceptual crossover from energy to information The contributors are Christoph Asendorf Ian F A Bell Robert Brain Bruce Clarke Charlotte Douglas N Katherine Hayes Linda Dalrymple Henderson Bruce J Hunt Douglas Kahn Timothy Lenoir W J T Mitchell Marcos Novak Edward Shanken Richard Shiff David Tomas Sha Xin Wei and Norton Wise *Age and Ageing in Contemporary Speculative and Science Fiction* Sarah Falcus, Maricel Oró-Piqueras, 2023-01-12 Focusing on the contemporary period this book brings together critical age studies and contemporary science fiction to establish the centrality of age and ageing in dystopian speculative and science fiction imaginaries Analysing texts from Europe North America and South Asia as well as television programmes and films the contributions range from essays which establish genre based trends in the representation of age and ageing to very focused studies of particular texts and concerns As a whole the volume probes the relationship between speculative science fiction and our understanding of what it is to be a human in time the time of our own lives and the times of both the past and the future *And in Our Time* Antony Shuttleworth, 2003 This book brings together essays which in diverse ways not only revise existing views on thirties writing but also provide ways of accounting for its critical neglect The essays examine from a variety of theoretical and critical perspectives a body of work that reflects the true diversity of the literary and cultural contexts of the thirties and includes studies on the work of Louis MacNeice Frank Sheed Christopher Dawson Alick West Christopher Caudwell Stevie Smith Storm Jameson Phyllis Bottome Ivy Compton Burnett Graham Greene Eric Ambler George Orwell Christina Stead Randall Swingler and Ralph Fox *Computational Vision and Bio-Inspired Computing* S. Smys, João Manuel R. S. Tavares, Valentina Emilia Balas, Abdullah M. Iliyasu, 2020-01-06 This proceedings book presents state of the art research innovations in computational vision and bio inspired techniques Due to the rapid advances in the emerging information communication and computing technologies the Internet of Things cloud and edge computing and artificial intelligence play a significant role in the computational vision context In recent years computational vision has contributed to enhancing the methods of controlling the operations in biological systems like ant colony optimization neural networks and immune systems Moreover the ability of computational vision to process a large number of data streams by implementing new computing paradigms has been demonstrated in numerous studies incorporating computational techniques in the emerging bio inspired models The book reveals the theoretical and practical aspects of bio inspired computing techniques like machine learning sensor based models evolutionary optimization and big data modeling and management that make use of effectual computing processes in the bio inspired systems As such it contributes to the novel research that focuses on developing bio inspired computing solutions for various domains such as human computer interaction image processing sensor based single processing recommender systems and facial recognition which play an indispensable part in smart agriculture smart city biomedical and business intelligence applications *Placing the Future*
