s insight Improving Future(s) Valeska Henze, 2014-10-13 *Rebellious Civil Society* Grzegorz Ekiert, Jan Kubik, 2010-08-04 Poland is the only country in which popular protest and mass opposition epitomized by the Solidarity movement played a significant role in bringing down the communist regime This book the first comprehensive study of the politics of protest in postcommunist Central Europe shows that organized protests not only continued under the new regime but also had a powerful impact on Poland s democratic consolidation Following the collapse of communism in 1989 the countries of Eastern Europe embarked on the gargantuan project of restructuring their social political economic and cultural institutions The social cost of these transformations was high and citizens expressed their discontent in various ways Protest actions became common events particularly in Poland In order to explain why protest in Poland was so intense and so particularized Grzegorz Ekiert and Jan Kubik place the situation within a broad political economic and social context and test it against major theories of protest politics They conclude that in transitional polities where conventional political institutions such as parties or interest groups are underdeveloped organized collective protest becomes a legitimate and moderately effective strategy for conducting state society dialogue The authors offer an original and rich description of protest movements in Poland after the fall of communism as a basis for developing and testing their ideas They highlight the organized and moderate character of the protests and argue that the protests were not intended to reverse the change of 1989 but to protest specific policies of the government This book contributes to the literature on democratic consolidation on the institutionalization of state society relationship and on protest and social movements It will be of interest to political scientists sociologists historians and policy advisors Grzegorz Ekiert is Professor of Government Harvard University Jan Kubik is Associate Professor of Political Science Rutgers University

*Political Practices and International Order* Stefan Heuser, Hans Günter Ulrich, 2007 International order is one of the most challenging issues in political ethics today and its place within the multifaceted field of politics is frequently debated The diverse phenomena resulting from globalisation particularly in the wake of the end of the so called Cold War urge us to think about our world in terms of a single political entity Besides the existing international institutions however it is still open to question what this entity should be and what concrete political practices should correspond to it In the essays collected in this book political scientists sociologists philosophers theologians and policy advisors explore how political practices can be institutionally localised without necessarily becoming incorporated into structures of governance Political ethics as presented in this book seeks to address the particular practices of power justice and peace of citizens themselves and to assess their relevance for the shaping of international insti

**Changing Work and Community Identities in European Regions** John Kirk, Sylvie Contrepois, Steve Jefferys, 2016-03-09 This book juxtaposes the experiences of regions that have lived or are living through industrial transition in coal mining and manufacturing

Hanson, 2003-09-15 This volume presents a shared effort to apply a general historical institutionalist approach to the problem of assessing institutional change in the wake of communism's collapse in Europe. It brings together a number of leading senior and junior scholars with outstanding reputations as specialists in postcommunism and comparative politics to address central theoretical and empirical issues involved in the study of postcommunism. The authors address such questions as how historical legacies of the communist regime be defined, how their impact can be measured in methodologically rigorous ways, and how the effects of temporal and spatial context can be taken into account in empirical research on the region. Taken as a whole, the volume makes an important contribution to the growing literature by utilizing the comparative historical method to study key problems of world politics      Building Democracy and Civil Society East of the Elbe Sven Eliaeson, 2006-04-18

This book explores the idea of civil society and how it is being implemented in Eastern Europe. The implosion of the Russian empire fifteen years ago and the new wave of democratization opened a new field of inquiry. The wide-ranging debate on the transition became focused on a conceptual battle: the question of how to define civil society. Because totalitarian systems shun self-organization, real existing civil society barely existed East of the Elbe, and the emergence of civil society took unusually complex and puzzling forms which varied with national culture and reflected the deep historical past of these societies. This insightful text relates the concept of civil society and developments in Eastern Europe to wider sociological theories and makes international comparisons where appropriate. It discusses particular aspects of civil society and examines the difficulties of establishing civil society. It concludes by assessing the problems and prospects for civil society in Eastern Europe going forward      **The Social Movement Society** David S. Meyer, Sidney G. Tarrow, 1998

Scholars consider ways in which the social movement has changed as a politics and how it changes the societies in which it occurs. This volume contains revealing perspectives on the effectiveness of social protest      **After the Soviet Empire**, 2015-10-05

The break up of the Soviet Union is a key event of the twentieth century. The 39th IIS congress in Yerevan 2009 focused on causes and consequences of this event and on shifts in the world order that followed in its wake. This volume is an effort to chart these developments in empirical and conceptual terms. It has a focus on the lands of the former Soviet Union but also explores pathways and contexts in the Second World at large. The Soviet Union was a full-scale experiment in creating an alternative modernity. The implosion of this union gave rise to new states in search of national identity. At a time when some observers heralded the end of history, there was a rediscovery of historical legacies and a search for new paths of development across the former Second World. In some parts of this world, long repressed legacies were rediscovered. They were sometimes, as in the case of countries in East Central Europe, built around memories of parliamentary democracy and its replacement by authoritarian rule during the interwar period. Some legacies referred to efforts at establishing statehood in the wake of the

First World War others to national upheavals in the nineteenth century and earlier In Central Asia and many parts of the Caucasus the cultural heritage of Islam in its different varieties gave rise to new markers of identity but also to violent contestations In South Caucasus Georgia Armenia and Azerbaijan have embarked upon distinctly different but invariably contingent paths of development Analogously core components of the old union have gone through tumultuous but until the last year and a half largely bloodless transformations The crystallization of divergent paths of development in the two largest republics of that union i e Russia and Ukraine has ushered in divergent national imaginations but also in series of bloody confrontations

**Participation and Democracy East and West** Dietrich Rueschemeyer, 2015-05-11 Since Alexis de Tocqueville first made the linkage in his writings on America a healthy democracy has been associated with the flourishing of civil society as measured by popular participation in voluntary and civic activities and the vitality of organizations that mediate between the individual and the state This volume takes a fresh look at this classic theme in the context of post communist Eastern Europe the West European welfare states and the United States asking what patterns of participation characterize the new democracies of Eastern Europe what levels of civic activism are characteristic of contemporary Western democracies what factors account for differences among countries and changing patterns over time and what do findings suggest about the prospects for democracy in the 21st century

Who Avoids and who Escapes from Poverty During the Transition? Włodzimierz Okrasa, 1999 There is a tendency toward chronic long term poverty in Poland Most at risk larger households farm households and households dependent on social welfare Least at risk households of employees or the self employed educated households households headed by pensioners households that are part of kinship networks and households with liquid assets durables or access to financial resources Among those who missed out on the benefits of the first phase of economic prosperity children are overrepresented

Subversive Institutions Valerie Bunce, 1999-01-28 From 1989 to 1992 all of the socialist dictatorships in Europe including the Soviet Union collapsed as did the Soviet bloc Yugoslavia the Soviet Union and Czechoslovakia dismembered and the Cold War international order came to an abrupt end Based on a series of controlled comparisons among regimes and states Valerie Bunce argues in this book that two factors account for these remarkable developments the institutional design of socialism as a regime a state and a bloc and the rapid expansion during the 1980s of opportunities for domestic and international change When combined institutions and opportunities explain not just when how and why these regimes and states disintegrated but also some of the most puzzling features of these developments why for example the collapse of socialism was largely peaceful and why Yugoslavia but not the Soviet Union or Czechoslovakia disintegrated through war
