The Paradigm of Social Complexity Gonzalo Castañeda, 2020-08-04 With the recent developments in computing technologies and the thriving research scene in Complexity Science economists and other social scientists have become aware of a more flexible and promising alternative for modelling socioeconomic systems one that in contrast with neoclassical economics advocates for the realism of the assumptions the importance of context and culture the heterogeneity of agents individuals or organizations and the bounded rationality of individuals who behave and learn in multifaceted ways in uncertain environments The book synthesizes an extensive body of work in the field of social complexity and constructs a unifying framework that allows developing concrete applications to important socioeconomic problems This one of a kind textbook provides a comprehensive panorama for advanced undergraduates and graduate students who want to become familiar with a wide range of issues related to social complexity It is also a pioneering text that can support professors who wish to learn techniques and produce research in this novel field Con los desarrollos recientes en las tecnologías de la computación y el floreciente dinamismo de las ciencias de la complejidad economistas y otros científicos sociales tienen a su

alcance una flexible y prometedora alternativa para la modelación de los sistemas socioeconómicos. Esta metodología en contraste con la economía neoclásica aboga por el realismo de los supuestos, la importancia del contexto y la cultura, la heterogeneidad de los agentes individuales y organizaciones y la racionalidad acotada de las personas que se comportan y aprenden de maneras muy diversas en entorno con incertidumbre. El libro sintetiza la extensa literatura que existe sobre la complejidad social y construye un enfoque unificador que permite elaborar aplicaciones concretas con las que abordar importantes problemas socioeconómicos. Se trata de un texto singular dado que presenta un panorama comprensivo del campo de estudio por lo que puede resultar de sumo interés para estudiante de licenciatura avanzados y alumnos de posgrado que desean adentrarse en el tema. Asimismo se trata de un texto pionero de gran utilidad para profesores y analistas interesados en aprender algunas de las técnicas del paradigma de la complejidad social para de esta forma aplicarlas en sus tareas de investigación.

Socio-economic Democracy And The World Government: Collective Capitalism, Depovertization, Human Rights, Template For Sustainable Peace Dhanjoo N Ghista, 2004-08-10. In developing an enlightened socio-economic political environment, this book provides a new socio-economic political system based on i) Collective Capitalism (CCP) of cooperatively managed institutions and enterprises and ii) a Civilian Democracy (CDM) sans political parties whereby the most qualified representatives of all the functional sectors of the community get elected to the local legislature. It also specifies a new economic political structure in the form of autonomous functionally sustainable communities (FSCs) within regional economic zones (REZs) and self-reliant regional unions (SRUs) such as the EU. This system of FSCs, REZs and SRUs will come under the aegis of and collectively represented by a World government overseeing the development of a comprehensive charter of human rights and social justice for all the people of the world. The neo-humanistic integrated system of CCP and CDM to be implemented within FSCs will provide grass roots socio-economic political empowerment contrary to the system

of centralized economic and political governance This book serves as a valuable teaching learning knowledge and research resource for i a holistic approach to a sustainable living environment promoting collective welfare and ii a multi stage road map towards a world government system for unification of all the communities of the world into one global cooperative The combined system of socio economic democracy involving knowledge and conscientious governance executives elected by and directly representing the various functional sectors of FSCs and world government will help transform the current undignified north south socioeconomic order into a democratic and equitable globalization order for collective social security towards achieving sustainable local and global peace
