Poston,2013-11-11 The completion of this volume would not have been possible without the generous and dedicated help of numerous people The book had its genesis in a conference held at Cornell University in the fall of 1990 that was organized by Dudley Poston Paul Eberts and Michael Hannan all professors at the time at Cornell With the very generous financial assistance of David Call then the dean of Cornell s College of Agriculture and Life Sciences Poston Eberts and Hannan put together a two day conference of lectures and papers by human ecologists from Cornell University and elsewhere The conference focused on sociological human ecology and celebrated the fortieth anniversary of the publication of Amos Hawley s Human Ecology Ronald Press 1950 Professor Hawley was the keynote speaker at the conference Many of the authors of the chapters in this volume presented earlier versions at the Cornell conference in 1990 Cornell s Departments of Rural Sociology and Sociology also contributed financial assistance however without Dean Call s very generous support the conference would not have been possible A few months after the conference Poston and Michael Micklin discussed the possibility of asking the various authors of the Cornell conference papers to revise them for publication in a volume on sociological human ecology Many opted to do so but others did not because of time and other kinds of commitments and constraints Health Ecology Morteza Honari,Thomas Boleyn,2005-07-28 This ground breaking study offers new challenges to those teaching studying or developing strategies and policies in health and the environment Bringing together a variety of approaches from different perspectives and different locations the contributors examine the various dimensions of health ecology in a human ecology framework examining how local regional and global factors impinge upon the health and environment of individuals communities and the globe **The Structure and Dynamics of Human Ecosystems** William R. Hawley, 1986-11-15 *Human Ecology* A Theoretical Essay by Amos Hawley presents for the first time a unified theory of human ecology by a scholar whose name is virtually synonymous with the discipline Focused on the interaction between society and environment human ecology is an attempt to deal holistically with the phenomenon of human organization Beginning in the first quarter of the century sociologists such as Park Burgess and McKenzie developed the study of human ecology to account for the dynamics of change in American cities Over time theorists have reached beyond the boundaries of sociology drawing on the findings of economics political science anthropology and bioecology to understand the relationship of human beings to their environment Hawley has successfully integrated the scattered theses of this wide ranging discipline into a schematic whole The early human ecologists seized on the analogy of plant communities as a way of understanding urban communities Hawley here maintains that the most important contribution to human ecology of the lexicons of plant and animal ecologies is the perspective of collective life as an adaptive process consisting in an interaction of environment population and organization From the adaptive process he argues emerges the ecosystem a concept that serves as a common denominator for bioecology and human ecology Hawley has codified the theory of human ecology by a set of deductive hypotheses that establish its claims to coherence and comprehensiveness His model charts a synthesis of ecological concepts ranging from adaptation and equilibrium through growth in temporal and spatial dimensions to convergence and openness The essay underscores the critical importance of transportation and communication technology to the shaping of the human ecological system *Human Ecology* brings concision and elegance to this holistic perspective and will serve as a point of reference and orientation for anyone interested in the powers and scope of the ecological approach

Poston Jr., David Yaukey, 2013-11-11 Student interested in world populations and demography inevitably need to know China As the most populous country of the world China occupies a unique position in the world population system How its population is shaped by the intricate interplays among factors such as its political ideology and institutions economic reality government policies sociocultural traditions and ethnic divergence represents at once a fascinating and challenging arena for investigation and analysis Yet for much of the 20th century while population studies have developed into a mature science precise information and sophisticated analysis about the Chinese population had largely remained either lacking or inaccessible first because of the absence of systematic databases due to almost uninterrupted strife and wars and later because the society was closed to the outside observers for about three decades since 1949 Since the end of the Cultural

Revolution things have dramatically changed China has embarked on an ambitious reform program where modernization became the utmost goal of societal mobilization China could no longer afford to rely on imprecise census or survey information for population related studies and policy planning nor to remaining closed to the outside world Both the gathering of more precise information and access to such information have dramatically increased in the 1980s Systematic observations analyses and reporting about the Chinese population have surfaced in the population literature around the globe

The Fragile Community Mara B. Adelman,Larry R. Frey,2020-07-24 This book examines the concept of community focusing on how communication practices help manage the tensions of creating and sustaining everyday communal life amidst the crisis of human loss While acknowledging how the contradictory and inconsistent nature of human relationships inevitably affects community this intimate and compelling text shows how community is created and sustained in concrete communication practices The authors explore these ideas at Bonaventure House an award winning residential facility for people with AIDS where the web of social relationships and the demands of a life threatening illness intersect in complex ways Facing a life threatening illness can defy meaningful social connections but it can also inspire such ties sometimes in ways that elude us in the course of daily life By understanding how collective communication practices help residents forge a sense of community out of the fragility and chaos of living together with AIDS we are able to better understand how communication is inexorably intertwined with the formation of community in

other environments Based on seven years of ethnographic research including participant observation in depth interviews and questionnaires this book weaves together narratives and visual images with conceptual analysis to uncover the ongoing oppositional forces of community life and to show how both mundane and profound communication processes ameliorate these tensions and thereby sustain this fragile community Because the average length of stay for a resident is seven months in which time he or she moves from being a newcomer to a community member to someone the community remembers the text reflects this short but crystallized life starting with the day a new resident opens the door to the day he or she passes away The writing is rich intimate engaging personal compelling and vivid The stories told discuss such deeply personal topics as the dilemmas of romantic relationships in a context fraught with many perils issues of power authority and control that enable and constrain social life and communicative practices that help residents cope with bereavement over the loss of others as well as their own impending deaths The text concludes by examining the lessons learned from Bonaventure House about creating and sustaining a health community and serves as an inspiration for strengthening interpersonal relationships and communities in other environments

Rethinking Rental Housing John Gilderbloom, 2012-06-20 In recent years almost daily media attention has been focused on the plight of the homeless in cities across the United States Drawing upon experiences in the U S and Europe John Gilderbloom and Richard Appelbaum challenge conventional assumptions concerning the operation of housing markets and provide policy alternatives directed at the needs of low and moderate income families *Rethinking Rental Housing* is a ground breaking analysis that shows the value of applying a broad sociological approach to urban problems one that takes into account the basic economic social and political dimensions of the urban housing crisis Gilderbloom and Appelbaum predict that this crisis will worsen in the 1990s and argue that a supply and demand approach will not work in this case because housing markets are not competitive They propose that the most effective approach to affordable housing is to provide non market alternatives fashioned after European housing programs particularly the Swedish model An important feature of this book is the discussion of tenant movements that have tried to implement community values in opposition to values of development and landlord capital One of the very few publications on rental housing it is unique in applying a sociological framework to the study of this topic
