Middling Sorts** Maureen T. Hallinan, 2000-04-30 The aim of the Handbook of Sociology of Education is to present the most
theoretically grounded and empirically rigorous sociological analyses of schools to date The authors are distinguished
researchers in the field Their contributions to the Handbook offer major theoretical perspectives on the schooling process
and describe significant empirical studies of schools and their effects on individuals and society The research presented in
the Handbook is built on three fundamental tenets of sociology First the authors adopt the perspective that schools are a
central institution in society An understanding of the function of schooling in social life is enhanced by viewing schools as
interrelated with other societal institutions The study of how the context of schooling influences education processes is
critical to an understanding of school outcomes Rather than being determined solely by ascribed and achieved
characteristics an individual's cognitive and social development are influenced heavily by the structures and networks in
which the individual is embedded Communities families schools and social groups are critical elements in the educative
process By viewing the school as a societal institution and highlighting the interaction between context and individual
behavior the Handbook chapters provide a broader and deeper understanding of the determinants of learning in
contemporary society The second sociological insight that guides the research in the Handbook is that the school is a social
