Auto/Biography and Auto/Ethnography Wolff-Michael Roth, 2005-01-01 In a number of academic disciplines auto biography and auto ethnography have become central means of critiquing of the ways in which research represents individuals and their cultures Auto biography and auto ethnography are genres that blend ethnographic interests with life writing and they tell about a culture at the same time they tell about an individual life This book presents educational researchers in exemplary form the possibilities and constraints of both auto biography and auto ethnography as methods of doing educational research The contributors to this volume explore by means of examples auto biography and auto ethnography as means for critical analysis and as tool kit for the different stakeholders in education The four thematic sections deal with a different possible uses and constraints of the two methods b understanding teaching and teaching to learn c institutional critiques d experiences and trajectories as evidence of a sociology of everyday life The book was written to be used by upper undergraduate and graduate students taking courses in research design because of its practical approach it is highly suitable for those contexts where research methods courses do not exist The audience also includes professors who want to have a reference on design and methodology and those who have not yet had the opportunity to employ a particular method

Historical Developments and Theoretical Approaches in Sociology - Volume I Charles Crothers , 2010-11-30 Historical Developments and Theoretical Approaches in Sociology in two volumes is a component of Encyclopedia of Social Sciences and Humanities in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty Encyclopedias Sociology is one of several social science disciplines and smaller bodies of knowledge which seeks to understand the patterns in social life There is a broad congruence between the objective configurations of social life and the components of the disciplines studying them the body of sociological knowledge is socially constructed and the pathways to its gaining of knowledge influenced by a variety of factors Moreover since social life

is ever changing sociology often has to scramble to catch up with the changing social world This work is built up around four broad topics the first providing important shared contextual material and then followed by three broad levels of social analysis with each of these four parts containing a number of chapters with more specific and in depth information The theme essay provides a general introduction and overview of the theme as a whole In total the work holds 40 contributions written by a selection of many international renowned specialists from 12 countries It was important to obtain a wide range of viewpoints giving the ways in which social issues arise quite differently in a range of countries These two volumes are aimed at the following five major target audiences University and College Students Educators Professional Practitioners Research Personnel and Policy Analysts Managers and Decision Makers NGOs and GOs *Contexts for Amos M. Daniel Carroll R.*,1992-01-01 **Not Ever Absent: Storytelling in Arts, Culture and Identity Formation** ,2019-01-04 This volume was first published by Inter Disciplinary Press in 2015 Storytelling has always played a central role in the formation of cultures and communities All cultures define themselves and their place in the world through their stories Similarly our identities are largely constructed as narratives and it is with the aid of storytelling that we manage to conceive of ourselves our selves as meaningful wholes Thus storytelling is not ever absent it is to be found in literature social life in the places we visit and the buildings we live in This volume presents storytelling in various appearances from ancient myths and oral history to transmedia narratives and digital stories Different forms of narrative are analysed as is the use of storytelling as a method for e g counselling education and research Throughout twenty five chapters a compelling overview of recent research on the topic is provided both stressing the omnipresence of storytelling and exploring what storytelling is and isn't

Sociological Abstracts Leo P. Chall,1999 CSA Sociological Abstracts abstracts and indexes the international literature in sociology and related disciplines in the social and behavioral sciences The database provides abstracts of journal articles and citations to book reviews drawn from over 1 800 serials publications and also provides abstracts of books book chapters dissertations and conference papers Beyond Sociology's Tower of Babel Bernard S. Phillips,2001 To look outside the discipline of sociology is to find little credibility given to the field as science Bernard Phillips argues that we are learning to see ever more clearly the contradiction between scientific standards and what in fact has been achieved by sociology Instead of knowledge based on the full range of our findings we have separate pieces of knowledge located within the diverse areas of the discipline and fads and fashions in the ideas and terms we use with relatively little cumulative development This has led many to question whether any scientific method can be applied to human behavior If the arguments and alternative interpretations in this book on the problematic nature of sociology's use of scientific method prove to be credible and fruitful then the implications are profound For example the conclusions drawn for every single social science study that has ever been conducted would be open to reinterpretation because they fail to take into account systematically the enormous complexity involved within any given instance of human behavior Our present approach assumes implicitly that the pieces of

the human jigsaw puzzle can at some point be put together so as to yield a coherent picture Yet as Phillips shows if each piece is itself deficient then no coherent picture emerges when we attempt to put the pieces together Refusing to take the current fragmentation of sociology as inevitable Phillips offers a clear vision through a series of heuristic web images of how sociologists might achieve the cumulative development and credibility that are the hallmarks of any science His research draws heavily on the works of classical and contemporary theorists philosophers and historians of science as well as on postmodernist critiques and responses to postmodernism This reconstruction will be useful for courses in method in the study of the classical tradition of sociology Bernard Phillips was introduced to sociology at Columbia University by C Wright Mills A former professor of sociology at Boston University cofounder of the ASA Section on Sociological Practice and founder of the Sociological Imagination Group his publications emphasize methodology and theory
