## **Sociology And Its Publics The Forms And Fates Of Disciplinary Organization:**

*Sociology and Its Publics* Terence C. Halliday, Morris Janowitz, 1992-10-15 Sociology faces troubling developments as it enters its second century in the United States A loss of theoretical coherence and a sense of disciplinary fragmentation a decline in the quality of its recruits the cooptation of its clients a muted public voice and sinking prestige in governmental circles these are only a few of the trends signalling a need for renewed debate about how sociology is organized In this volume some of the most authoritative voices in the field confront these conditions offering a variety of perspectives as they challenge sociologists to self examination

**Sociology and Its Publics** Terence C. Halliday, Morris Janowitz, 1992-10-15 Sociology faces troubling developments as it enters its second century in the United States A loss of theoretical coherence and a sense of disciplinary fragmentation a decline in the quality of its recruits the cooptation of its clients a muted public voice and sinking prestige in governmental circles these are only a few of the trends signalling a need for renewed debate about how sociology is organized In this volume some of the most authoritative voices in the field confront these conditions offering a variety of perspectives as they challenge sociologists to self examination

**Researching the Military** Helena Carreiras, Celso Castro, Sabina Frederic, 2016-03-02 Researching the Military focuses on the experiences of researchers who study the military around the world It explores the historical social institutional and personal factors that frame research and scrutinize the way knowledge in this area impacts society and policy More than merely analyzing research experiences yet necessarily including them it is also about the experiences of researchers their position with regard to the object of their studies the institutional context where they work and the way their research impacts the academic and policy making fields in the respective countries The common theme to the various chapters is reflexivity a conscious effort at addressing the conditions of research and the position of the researcher and the research participants in that interface By collecting diverse experiences of researchers from across the world this volume aims to enhance reflexivity in the field of military studies and to encourage the exchange of knowledge between the academic field and the military arena This book will be of much interest to students of military studies research methods sociology social anthropology and security studies in general

**Research Handbook on the Sociology of Emotion** Helena Flam, 2024-04-12 The Research Handbook on the Sociology of Emotion investigates the role of emotions in key institutions understood as the frames and fabrics of society It takes a critical look at society framing institutions such as the state the military the market and international organizations

**Marginality and Dissent in Twentieth-Century American Sociology** John F. Galliher, James M. Galliher, 1995-07-01 This book is a biography of the husband and wife team that is largely responsible for developing social problems and social deviance as areas of research Politics in the discipline of sociology is also examined

Chicago Sociology Jean-Michel Chapoulie, 2020-09-01 Known for its pioneering studies of urban life immigration and criminality using the city as laboratory the so called Chicago school of sociology has been a dominant presence in American social science since it emerged around

the University of Chicago in the early decades of the twentieth century Canonical figures such as Robert Park Everett Hughes Howard S Becker and Erving Goffman established foundational principles of how to conduct social research This groundbreaking book on the development and influence of the Chicago tradition first published in 2001 became an immediate classic in France where Chicago sociology has exerted significant appeal Drawing on deep archival research and interviews with members of the tradition Jean Michel Chapoulie interrogates evidence with a historian's eye and recognizes the profound effects that culture society and the economy have on individuals and institutions His study is a fine grained and panoramic portrait of the complex and interlocking factors that gave rise to the research interests and methodologies that characterized the Chicago tradition in the 1920s and that contributed to rises and falls in its predominance in American sociology over the following decades Now revised and available for the first time in English Chicago Sociology provides a unique perspective on the history of social science in the twentieth century A foreword by William Kornblum places Chapoulie's work in context and addresses recent critical challenges to the Chicago school and its origins

Power and Influence of Economists Jens Maesse, Stephan Pühringer, Thierry Rossier, Pierre Benz, 2021-05-23 Economists occupy leading positions in many different sectors including central and private banks multinational corporations the state and the media as well as serving as policy consultants on everything from health to the environment and security Power and Influence of Economists explores the interconnected relationship between power knowledge and influence which has led economics to be both a source and beneficiary of widespread power and influence The contributors to this book explore the complex and diverse methods and channels that economists have used to exert and expand their influence from different disciplinary and national perspectives Four different analytical views on the role of power and economics are taken first the role of economic expert discourses as power devices for the formation of influential expertise second the logics and modalities of governmentality that produce power knowledge apparatuses between science and society third economists as involved in networks between academia politics and the media and forth economics considered as a social field including questions of legitimacy and unequal relations between economists based on the detention of various capitals The volume includes case studies on a variety of national configurations of economics such as the US Germany Italy Switzerland Greece Mexico and Brazil as well as international spaces and organisations such as the IMF This book provides innovative research perspectives for students and scholars of heterodox economics cultural political economy sociology of professions network studies and the social studies of power discourse and knowledge The Open Access version of this book available at <https://www.taylorfrancis.com/books/oa-edit/10.4324/9780367817084> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

**Why Are Professors Liberal and Why Do Conservatives Care?** Neil Gross, 2013-04-09 Neil Gross shows that the US academy's liberal reputation has exerted a self-selecting influence on young liberals while deterring promising conservatives His study sheds new light on both academic life and American politics where the conservative

movement was built in part around opposition to the liberal elite in higher education      What's Wrong with Sociology? Stephen Cole, 2018-04-17 Since the 1950s sociology has experienced a decline in prestige when compared with the other social sciences. In some highly publicized cases some universities have retrenched their sociology departments; others are contemplating either retrenchment or downsizing of their departments. Although there are some practitioners of the discipline who believe that it has never been in better shape, many sociologists have come to believe that there are very serious problems both in the cognitive and social organization of the discipline. This book contains sixteen essays by sociologists who believe that their discipline faces very serious problems which must be overcome if the discipline is to survive and prosper. The contributors were selected to represent diverse views and thus there is substantial disagreement among them over what the problems are that sociology faces and how they may be remedied. In this highly provocative book, readers are likely to find some essays they agree with and others they disagree with, but all the essays present important problems faced by the discipline which must be addressed. Although the authors of the sixteen essays do not agree on what is wrong with the discipline, there are some themes which appear frequently. In his introduction, Cole summarizes and comments on these themes. His introduction centers on the question of whether sociology is entirely socially constructed. Is what we believe to be true about society constrained by empirical evidence, or is it a result of our ideology, power, authority, and other social processes? One theme which appears in many of the essays is that sociology has become too ideological and, as a result, has lost credibility among university administrators, politicians, and the general public. Many of the essays also stress the view that there are very low levels of consensus in sociology and that it is hard to see evidence of progress. Others criticize the discipline for not dealing with the really important social issues and see much of the work published as being parochial and trivial. Questions are also raised about why the use of causal models has failed to generate solutions to most of the problems the discipline addresses. Some authors believe that the discipline adheres to an overly rational model of human behavior and has failed to keep up with some of the advances introduced by post-modernist theories. This highly readable set of essays should be of interest to all those concerned about the current state of sociology. They will also be useful in introducing graduate students to some of the most important issues currently being debated in the field. Stephen Cole is currently professor of sociology at the State University of New York at Stony Brook and professor of sociology at the University of Queensland, Australia. He is the author of *Making Science Between Nature and Society* and, with Jonathan R. Cole, *Social Stratification in Science*.      **Confronting the American Dilemma of Race** Robert E. Washington, Donald Cunniff, 2002 *Confronting the American Dilemma of Race* consists of twelve articles written by six authors about the second generation African American sociologists who embarked on their sociological careers between 1930 and 1950 when American society was embedded in a racial caste system. From the perspective of the sociology of knowledge, these articles, through examining the life experiences and works of these African American sociologists, reveal important insights into the impact of racial

segregation on the development of both black sociology and the sociology of race relations      *The Handbook of the History and Philosophy of Criminology* Ruth Ann Triplett, 2018-01-04 Featuring contributions by distinguished scholars from ten countries The Wiley Handbook of the History and Philosophy of Criminology provides students scholars and criminologists with a truly a global perspective on the theory and practice of criminology throughout the centuries and around the world In addition to chapters devoted to the key ideas thinkers and moments in the intellectual and philosophical history of criminology it features in depth coverage of the organizational structure of criminology as an academic discipline world wide The first section focuses on key ideas that have shaped the field in the past are shaping it in the present and are likely to influence its evolution in the foreseeable future Beginning with early precursors to criminology s emergence as a unique discipline the authors trace the evolution of the field from the pioneering work of 17th century Italian jurist philosopher Cesare Beccaria up through the latest sociological and biosocial trends In the second section authors address the structure of criminology as an academic discipline in countries around the globe including in North America South America Europe East Asia and Australia With contributions by leading thinkers whose work has been instrumental in the development of criminology and emerging voices on the cutting edge The Wiley Handbook of the History and Philosophy of Criminology provides valuable insights in the latest research trends in the field world wide the ideal reference for criminologists as well as those studying in the field and related social science and humanities disciplines      **Vance Packard and American Social Criticism** Daniel Horowitz, 2000-11-09 Vance Packard s bestselling books Hidden Persuaders 1957 Status Seekers 1959 and Waste Makers 1960 taught the generation that came of age in the late 1950s and early 1960s about the dangers posed by advertising social climbing and planned obsolescence Like Betty Friedan and William H Whyte Jr Packard 1914 was a journalist who played an important role in the nation s transition from the largely complacent 1950s to the tumultuous 1960s He was also one of the first social critics to benefit from and foster the newly energized social and political consciousness of this period Based in part on interviews with Packard Daniel Horowitz s intellectual biography focuses on the period during which Packard left magazine writing to author his most famous works of social criticism Horowitz traces the influence of Packard s education and early years in rural Pennsylvania providing a deeper understanding of his thought and his later books Packard s life Horowitz contends illuminates the dilemmas of a freelance social critic without inherited wealth or academic affiliation His career also expands our understanding of how one era shaped the next underscoring how the adversarial 1960s drew on the mass culture of the previous decade Originally published in 1994 A UNC Press Enduring Edition UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print These editions are published unaltered from the original and are presented in affordable paperback formats bringing readers both historical and cultural value      **The History of the Social Sciences since 1945** Roger E. Backhouse, Philippe Fontaine, 2010-05-24 This compact volume covers the main developments

in the social sciences since the Second World War Chapters on economics human geography political science psychology social anthropology and sociology will interest anyone wanting short accessible histories of those disciplines all written by experts in the relevant field they will also make it easy for readers to make comparisons between disciplines A final chapter proposes a blueprint for a history of the social sciences as a whole Whereas most of the existing literature considers the social sciences in isolation from one other this volume shows that they have much in common for example they have responded to common problems using overlapping methods and cross disciplinary activities have been widespread

*Sociological Visions* Kai Erikson, 1997 All of the essays are by authors whose sociological vision has had a profound impact on our culture      **Society on the Edge** Philippe Fontaine, Jefferson D. Pooley, 2020-12-10 The social sciences underwent rapid development in postwar America Problems once framed in social terms gradually became redefined as individual with regards to scope and remedy with economics and psychology winning influence over the other social sciences By the 1970s both economics and psychology had spread their intellectual remit wide psychology's concepts suffused everyday language while economists entered a myriad of policy debates Psychology and economics contributed to and benefited from a conception of society that was increasingly skeptical of social explanations and interventions Sociology in particular lost intellectual and policy ground to its peers even regarding social problems that the discipline long considered its settled domain The book's ten chapters explore this shift each refracted through a single problem the family crime urban concerns education discrimination poverty addiction war and mental health examining the effects an increasingly individualized lens has had on the way we see these problems      Integrating Knowledge Through Interdisciplinary Research Dominic Holland, 2013-08-22 In this important new text Holland seeks to explain by means of social scientific and philosophical inquiry the difficulties that researchers often experience when attempting to integrate knowledge from different academic disciplines either individually or as part of a team of subject specialists It is argued that the difficulty of integrating knowledge from different academic disciplines is the result of firstly an inadequate justification of the nature of scientific integration and differentiation and secondly the dominance of disciplinary specialization in scientific inquiry By focusing on both the theoretical justification for and the practical feasibility of integrating knowledge through interdisciplinary research this book asks what properties of reality make the integration of knowledge from different academic disciplines possible and to what extent it is feasible to integrate knowledge through interdisciplinary research within a traditional disciplinary context Accordingly the text is both philosophical and social scientific in content philosophical in the sense that it presents a theory of causal determination which will help researchers to understand how reality is both differentiated and interconnected social scientific in the sense that it presents the results of three case studies of collaborative interdisciplinary research projects The book is heavily informed by the philosophy of critical realism The philosophical argument about the possibility of integration and specialization in science draws explicitly on some of the key

concepts of critical realism particularly those comprising the theory of integrative pluralism while critical realist assumptions underpin the social scientific argument about the causal influence of the social system of knowledge production By exploring researchers conceptions of knowledge and of reality on the one hand and their decisions about what sort of knowledge to produce on the other Holland shows how the difficulty of scientific integration is both a problem of knowledge and a problem of knowledge production This book is essential reading for students and academics interested in the emerging topic of knowledge integration and interdisciplinarity

**The ISA Handbook in Contemporary Sociology** Ann Denis,Devorah Kalekin-Fishman,2009-07-01 This International Sociological Association Handbook presents and tracks the transformation of the societies and social relations that characterize the twenty first century The volume is organized around a conceptualization of three processes that are fundamental to the analyses of micro meso and macro social relations Conflict Competition and Cooperation Case studies discuss and contextualize debates within an international overview of relevant literature incorporating material about North America Latin America Europe Africa and Asia

**Controversies in Criminal Justice Research** Richard Tewksbury,Elizabeth Ehrhardt Mustaine,2014-09-25 This book of original essays presents students with challenging looks at some of the most basic and sometimes most difficult decisions faced by criminal justice researchers Each chapter presents an overview of a foundational question issue in the conduct of research and discussions of the options to resolve these controversies

Georg Simmel and the American Prospect Gary D. Jaworski,1997-01-01 This first book length examination of the American reception of Georg Simmel German philosopher and sociologist offers a compelling new account of the transatlantic journey of Simmel s ideas Jaworski draws on archival data correspondence interviews and detailed textual analysis to explore the practical and strategic uses of Simmel s writings by a range of American social thinkers These thinkers include the Chicago School figures Albion Small Robert E Park and Everett C Hughes functionalist sociologists Talcott Parsons Robert K Merton Lewis A Coser and Kaspar D Naegele and more recently Erving Goffman and postmodernists Deena and Michael Weinstein Jaworski shows that the way in which Americans received Simmel was intricately related to efforts to transform American society A recently discovered essay on Simmel by the emigre sociologist Albert Salomon Georg Simmel Reconsidered and included here with an introduction and notes by Jaworski provides added dimension to this important study The author has advanced the analysis of the Simmel reception in two important respects Instead of simply dredging texts by American sociologists for evidence of Simmel s ideas he studies the production of texts by examining earlier drafts correspondence unpublished research notes and when possible and relevant personal recollections In addition Jaworski analyzes the Simmel reception carefully and nonspeculatively by tying the production of texts to the social and cultural context in which it occurred As a result he has placed the investigation of the Simmel reception on a new analytical and historiographic plane By introducing more rigorous of investigation intoSimmel scholarship Jaworski not only has been able to make discoveries and develop lines of inquiry that have missed but also has

raised the methodological level of analysis Guy Oakes Jack T Kvernland Professor Monmouth University      **Robert Redfield and the Development of American Anthropology** Clifford Wilcox, 2006-01-01 Relying upon close readings of virtually all of his published and unpublished writings as well as extensive interviews with former colleagues and students Robert Redfield and the Development of American Anthropology traces the development of Robert Redfield's ideas regarding social change and the role of social science in American society Clifford Wilcox's exploration of Redfield's pioneering efforts to develop an empirically based model of the transformation of village societies into towns and cities is intended to recapture the questions that drove early development of modernization theory Reconsideration of these debates will enrich contemporary thinking regarding the history of American anthropology and international development
