## **Sociology And Scientism The American Quest For Objectivity 1880 194:**

**Sociology and Scientism** Robert C. Bannister, 2014-02-01 During the 1920s a new generation of American sociologists tried to make their discipline more objective by adopting the methodology of the natural sciences Robert Bannister provides the first comprehensive account of the emergence of this objectivism within the matrix of the evolutionism of Lester Ward and other founders of American sociology Objectivism meant confining inquiry to the observable externals of social behavior and quantifying the results Although objectivism was a marked departure from the theoretical and reformist sociology of the prewar years and caused often fierce intergenerational struggle sociological objectivism had roots deep in prewar sociology Objectivism first surfaced in the work of sociology's second generation the most prominent members of which completed their graduate work prior to World War I It gradually took shape in what may be termed realist and nominalist variants the first represented by Luther Lee Bernard and the second by William F Ogburn and F Stuart Chapin For Bernard a scientific sociology was radical prescribing absolute standards for social policy For Ogburn and Chapin it was essentially statistical and advisory in the sense that experts would concern themselves exclusively with means rather than ends Although the objectivists differed among themselves they together precipitated battles within the American Sociological Society during the 1930s that challenged the monopoly of the Chicago School paving the way for the informal alliance of Parsonian theorists and a new generation of quantifiers that dominated the profession throughout the 1950s By shedding new light on the careers of Ward and the other founders and by providing original accounts of the careers of the leading objectivists Bannister presents a unique look at the course of sociology before and after World War I He puts theory formation in an institutional ideological and biographical setting and thus offers an unparalleled look at the formation of a modern academic profession

**Interpretation and Method** Dvora Yanow, Peregrine Schwartz-Shea, 2015-03-04 Exceptionally clear and well written chapters provide engaging discussions of the methods of accessing generating and analyzing social science data using methods ranging from reflexive historical analysis to critical ethnography Reflecting on their own research experiences the contributors offer an inside applied perspective on how research topics evidence and methods intertwine to produce knowledge in the social sciences

Subjectivity and Identity Peter V. Zima, 2015-06-18 Subjectivity and Identity is a philosophical and interdisciplinary study that critically evaluates critically the most important philosophical sociological psychological and literary debates on subjectivity and the subject Starting from a history of the concept of the subject from modernity to postmodernity from Descartes and Kant to Adorno and Lyotard Peter V Zima distinguishes between individual collective mythical and other subjects Most texts on subjectivity and the subject present the topic from the point of view of a single discipline philosophy sociology psychology or theory of literature In Subjectivity and Identity Zima links philosophical approaches to those of sociology psychology and literary criticism The link between philosophy and sociology is social philosophy e g Althusser Marcuse Habermas the link between philosophy and literary criticism is aesthetics e g Adorno

they hoped to perform a vital social function as they fulfilled their own ambitions and what restraints they recognized
