## **Sociology After The Crisis:**

*Sociology After the Crisis* Charles C. Lemert, 2015-12-22 Widely assigned and taught in senior capstone and social theory courses *Sociology After the Crisis* offers the first systematic theory of social differences built on the sociological traditions by embracing to Durkheim Weber and other familiar figures The first edition was acclaimed for its nuanced and original rereading of Durkheim in relation to the theoretical reasons he and his contemporaries neglected race and gender This new edition features two chapters of new material written in the summer of 2003 as the new social structures of the 21st century became increasingly clear The new Chapter Ten draws upon 9 11 the new world order of two Bush presidencies and globalization to show how individuals lives and sociologies must be thought about in new ways These events also highlight how American society and sociology have responded and sometimes failed in the struggle over the crisis of modernism Reviews for the First Edition This expansive reimagining of the historical roots of sociological imagination especially as it embraces voices and visions long lost to our most important national debates is balm to the fractured soul of American society Lemert s elegant and passionate volume will aid immeasurably in our nation s search for sane solutions to the crises of purpose and perspective he so skillfully explores Michael Eric Dyson author of *Making Malcolm* and *Between God and Gangsta Rap* Elegantly crafted Steven Seidman State University of New York at Albany

*Governing the Firm in the Social Interest* Catherine Casey, 2024-02-20 The corporate business enterprise is a core institution of capitalism It holds immense political economic and cultural power in society It mobilizes social and planetary resources to its utility in pursuit of private profit maximization and with little regard for social concerns Its influence over so much of societal life and effects on the natural environment raise critical questions about the firm and its governance in democratic society Various voices seek reforms of regulation and corporate governance practices to those shaped by the neoliberal policies persisting in the current decades But prospects for amelioration within our current horizons of thinking appear elusive This book contributes a distinctly social theoretical approach to the social problem of governing the firm Its discussions complement debates in economics politics and law Its critical social theorizations challenge conventional understandings of the firm and neoliberal legitimacies of its governance and posit alternatives The book explores the social relations and moral fabric of the firm and the creativity of

**Renewal** Colbert Rhodes, 2017-07-11 Offering a deep look into the moral uncertainty in the contemporary social sciences and American society this book explores an in depth solution This solution as articulated by Pitirim A Sorokin in the 20th century is the theory of Integralism a perspective dating back to Plato Aristotle and Aquinas Sorokin initially applied Integralism by locating and analyzing three dominant super socio cultural systems over 2500 years of Graeco Roman and Western history Each super system was unified by a central philosophical principle based either on materialism the senses or the rational or the supersensory super rational A super system declines when it reaches the limits of its potential to achieve its true reality and value to be replaced by another super system Sorokin described a trendless rotation of the three super socio cultural systems The current dominant super socio cultural system in the West is a materialist version emphasizing science and technology with little thought given to supersensory super rational reality Sorokin asserted contemporary materialist culture was in a state of collapse due to the breakup of its moral values As a consequence he saw a struggle for power occurring between egoistic individuals and groups often resulting in revolutions wars and inter human strife In response to the one sided materialist view of reality the goal of Integralism is to unify all three forms of reality into an integral culture that harmoniously balances materialist and supersensory super rational orientations A solution to the contemporary moral confusion Sorokin argued can be found in the application of supra conscious intuition that would enable a human to know what is eternal in the ordinary and reach the transcendent an experience not accessible to the senses or the rational intellect alone The supra conscious is the source for reaching the supreme moral value creative unselfish altruism which can be shared by all cultures to produce peace and harmony in the world

Jordanoska, 2024-12-31 This book provides an original theoretically and empirically grounded analysis of regulatory enforcement activism in post crisis periods and the ensuing regulatory interactions It critically addresses the more regulation enforcement agenda relating to financial misconduct in the aftermath of the 2008 financial crisis showing how misconduct was constructed through the enforcement policies and practices of the powerful UK financial conduct regulator and its interactions with the subjects of enforcement proceedings and their legal representatives during a tumultuous time in the financial markets Drawing from interviews with regulators professional intermediaries and markets participants documentary analysis of enforcement decisions and speeches and observations the volume adopts an interdisciplinary approach grounded in social constructivist perspectives on compliance and deviance regulation theory and socio legal research Through a multi dimensional analytical framework of regulatory enforcement activism that links shifts in regulatory policymaking experimentations with legal powers in information gathering legal and extra legal penalties and individual accountability and the use of enforcement tools in micro level interactions the book documents a more interventionist and punitive post crisis enforcement agenda The findings challenge current thinking in the scandal and reform literature The work argues that despite the increased focus on enforcement it is not necessarily the case that the power has tilted more towards the regulator This fine grained socio legal enquiry makes innovative and timely theoretical contributions to our understanding of the limitations of regulatory activism and regulatory control regulatory relationships the governance of financial markets and broader thinking on regulating corporations and the individuals within them It will appeal to academics researchers regulators and policymakers working in regulation across law criminology sociology and politics **Class and**

**Politics in Contemporary Social Science** Dick Houtman, 2017-07-12 Dick Houtman argues that neither authoritarianism nor libertarianism can be explained by class or economic background but rather by position in the cultural domain what he calls cultural capital Although he examines all of the statistics and arguments of the conventional approaches with care and concern Houtman convincingly demonstrates that the conclusions drawn from earlier studies are untenable at a more general theoretical level Despite differences among advocates of class explanations their theories are based on largely identical research findings in particular a strong negative relationship between education and authoritarianism Unobstructed by the conclusions these authors felt called upon to draw from the findings themselves Houtman configures them in a new way The hypotheses derived from this new theory allow for a systematic strict and competitive testing of original theses without ignoring the value of and earlier research After demonstrating that authoritarianism and libertarianism cannot be

explained by class or economic background Houtman examines the implications of this argument for today's death of class debate in political sociology He holds it to be unfortunate that the relevance of class to politics is typically addressed by studying the relation between class and voting This conceals a complex cross pressure mechanism that causes this relationship to capture the net balance of class voting and its opposite cultural voting instead of class voting He argues that references to a decline in class voting may be basically correct but dogmatic reliance on the relation between class and voting to prove the point systematically underestimates levels of class voting and produces an exaggerated picture of the decline

**Transforming Politics** S. Roseneil, 2016-07-27 This volume examines the transformation of politics and social movements at various levels Starting with a transformation of identity within social movements it goes on to discuss changes in the scale of social movement mobilisation The impact of social movements on the state is also considered with a particular focus upon the ways in which the state is able to incorporate apparently radical political agendas Finally the book examines those intellectual and theoretical debates stimulated by recent political transformations

**The Individual After Modernity** Mira Marody, 2020-10-29 Moving beyond the individualisation paradigm in sociological theory this book develops an approach to the analysis of human activities and the social phenomena produced by them that centres on the processes that generate coordinated behaviours among individuals Emphasising the relational and processual character of social phenomena as well as the importance of a broader cultural and historical context for analysing them the author questions the view of contemporary society that sees individuals acting in a context in which social bonds are dissolving and unveils the rationale hidden behind the chaos of everyday activities Through an analysis of the continued importance of cooperation and the consequent emergence in society of various kinds of communities this volume examines the changing character of social ties An overview of transformation of social bonds and the intensification of mutual influences among individuals as they seek to address social dilemmas in new contexts The Individual after Modernity will appeal to social scientists with interests in social theory

**Science under Siege** Dick Houtman, Stef Aupers, Rudi Laermans, 2021-05-12 Identifying scientism as religion s secular counterpart this collection studies contemporary contestations of the authority of science These controversies suggest that what we are witnessing today is not an increase in the authority of science at the cost of religion but a dual decline in the authorities of religion and science alike This entails an erosion of the legitimacy of universally binding truth claims be they religiously or scientifically informed Approaching the issue from a cultural sociological perspective and building on theories from the sociology of religion the volume unearths the cultural mechanisms that account for the headwind faced by contemporary science The empirical contributions highlight how the field of academic science has lost much of its former authority vis vis competing social realms how political and religious worldviews define particular research findings as favorites while dismissing others and how much of today s distrust of science is directed against scientific institutions and academic scientists rather than against science per se
