The Mountainous West William Wyckoff, Lary M. Dilsaver, 1995-01-01 Traditional interpretations of the American West have concentrated on the importance of its aridity to the region s cultural evolution and development But the

West is marked by a second fact of physical geography that distinguished it from the experiences of settlers from the east. As pioneers struggled with the climate west of the hundredth meridian they were also confronted by mountains strewn across the region and offering their own set of limitations and opportunities. This volume focuses on these green islands of the Mountainous West that have witnessed patterns of settlement and development distinct from their lowland neighbors. In thirteen essays the contributors address the mountains by means of five themes: the mountains as barriers to movement; islands of moisture; a zone of concentrated resources; an area of government control; and a restorative sanctuary. The focus ranges from California's Sierra Nevada to the Rocky Mountains of Colorado, Utah, and Montana. William K. Wyckoff is an associate professor, Department of Earth Sciences, Montana State University. He is the author of *The Developer's Frontier: The Making of the Western New York Landscape* and of articles in many journals including *The California Geographer*, *Social Science Journal*, *Geographical Review*, and *Journal of Historical Geography*. Larry M. Dilsaver is a professor in the Department of Geology and Geography, University of South Alabama. The author with William Tweed of *Challenge of the Big Trees: A Resource History of Sequoia and Kings Canyon National Parks*, he has also written articles in journals such as *Geographical Review*, *Annals of Tourism Research*, and *Yearbook of the Association of Pacific Coast Geographers*.

Women Pioneers of Public Education J. Herbst, 2008-11-10 The book narrates the story of how the school founded by women pioneers of public education in a Rocky Mountain mining settlement became the centre and sustaining force of the town's community life from its beginning in the 1870s to the present day.

Workers' Health, Workers' Democracy Alan Derickson, 2019-05-15 The most dangerous work in North America at the turn of the century may have been extracting metal-bearing ore from mountains of hard rock. Beginning in the 1890s, miners in the West worked through local unions both to prevent occupational hazards and to assure themselves of adequate health care. Among other projects they planned, built, and governed more than twenty general hospitals throughout the Western United States and Canada. *Workers' Health, Workers' Democracy* is an engaging and richly documented account of this first attempt to create a democratically controlled health care system in North America. Focusing on the efforts of local unions, Derickson illuminates the broader history of the Western labor movement, the self-help traditions of rank and file workers, and the evolution of health care on the industrial frontier.

International Bibliography of Business History Francis Goodall, Terry Gourvish, Steven Tolliday, 2013-12-16 The field of business history has changed and grown dramatically over the last few years. There is less interest in the traditional company-centred approach and more concern about the wider business context. With the growth of multi-national corporations in the 1980s, international and inter-firm comparisons have gained in importance. In addition, there has been a move towards improving links with mainstream economic, financial, and social history through techniques and outlook. *The International Bibliography of Business History* brings all of the strands together and provides the user with a comprehensive guide to the literature in the field. The Bibliography is a unique volume which covers the depth and breadth of research in
