**Rumour and Radiation** Paul Hegarty,2015-01-01 This is a book about video art and about sound art The thesis is that sound first entered the gallery via the video art of the 1960s and in so doing created an unexpected noise The early part of the book looks at this formative period and the key figures within it then jumps to the mid 1990s when video art has become such a major part of contemporary art production it no longer seems an autonomous form Paul Hegarty considers the work of a range of artists including Steve McQueen Christian Marclay Ryan Trecartin and Jane and Louise Wilson proposing different theories according to the particular strategy of the artist under discussion Connecting them all are the twinned ideas of intermedia and synesthesia Hegarty offers close readings of video works as influenced by their sound while also considering the institutional and material contexts Applying contemporary sound theory to the world of video art Paul Hegarty offers an entirely fresh perspective on the interactions between sound sound art and the visual

All Ears Peter Szendy, 2016-12-01. The world of international politics has recently been rocked by a seemingly endless series of scandals involving auditory surveillance: the NSA's warrantless wiretapping is merely the most sensational example of what appears to be a universal practice today. What is the source of this generalized principle of eavesdropping? All Ears: The Aesthetics of Espionage traces the long history of moles from the Bible through Jeremy Bentham's panacoustic project all the way to the intelligence gathering network called Echelon. Together with this archeology of auditory

surveillance, Szendy offers an engaging account of spycraft's representations in literature: Sophocles, Shakespeare, Joyce, Kafka, Borges, opera, Monteverdi, Mozart, Berg, and film Lang, Hitchcock, Coppola, De Palma. Following in the footsteps of Orpheus, the book proposes a new concept of overhearing that connects the act of spying to an excessive intensification of listening. At the heart of listening, Szendy locates the ear of the Other that manifests itself as the originary division of a split hearing that turns the drive for mastery and surveillance into the death drive.

Jérôme Goffette, 2019-12-30. Lunettes stimulateuses cardiaques, prothèses dentaires, audioprothèses, implants mammaires, bras magnétiques, etc. Notre monde nous plonge de plus en plus dans un univers de prothèses, l'âge venant peu à peu nous y chapeauter. Cette hybridation passe presque inaperçue alors même qu'elle change nos vies et notre quotidien. Elle concerne des aspects la fois variés et essentiels : les gestes, moteurs, les perceptions, l'expression de soi, l'esthétique, l'identité, l'interface et la connexion avec le monde. Les prothèses peuvent compenser une capacité défaillante. Elles peuvent aussi apporter des capacités modifiées, voire inversées. Elles transforment la relation que nous entretenons avec le monde, avec autrui et avec nous-mêmes. Certaines prothèses ne relèvent plus de la compensation mais de l'augmentation ou de la modification d'une capacité ordinaire. Il semble ainsi bienvenu d'étudier l'abondante source de réflexions prothétiques qu'apporte la science-fiction sous toutes ses

in the noise music that has emerged since the mid 1970s whether through industrial music punk free jazz or the purer noise of someone like Merzbow The book progresses seamlessly from discussions of John Cage Erik Satie and Pauline Oliveros through to bands like Throbbing Gristle and the Boredoms Sharp and erudite and underpinned throughout by the ideas of thinkers like Adorno and Deleuze Noise Music is the perfect primer for anyone interested in the louder side of experimental music    **Livres hebdo** ,2002    Cahiers du Musée national d'art moderne Musée national d'art moderne (France),2007
