The Modeller Frits Scholten,2025-06-30 In these days the most famous modeller this is how the Dutch sculptor Adriaen de Vries 1556 1626 was characterised in 1621 A virtuoso modeller De Vries explored new ways to enliven his art His bronze sculptures were made in a radically new sketchy style with free figure compositions and a vigorous treatment of human anatomy often balancing on the border between realism and distortion This book explores how and why a Late Renaissance sculptor broke so drastically with the prevailing stylistic paradigm of his time in search of vivezza natural liveliness and the viva figura the statue on the brink of coming to life Adriaen de Vries aimed to create sculptures that move in the metaphorical no man s land between death and life back and forth from inert bronze to apparent vitality as this study will argue

Image, Imagination, and Cognition, 2018-07-03 How were the relations among image, imagination and cognition characterized in the period 1500–1800? The authors of this volume argue that in those three centuries a thoroughgoing transformation affected the following issues i) what it meant to understand phenomena in the natural world cognition ii) how such phenomena were visualized or pictured images including novel types of diagrams, structural models, maps etc and iii) what role was attributed to the faculty of the imagination psychology, creativity. The essays collected in this volume examine the new conceptions that were advanced and the novel ways of comprehending and expressing the relations among image, imagination and cognition. They also shed light from a variety of perspectives on the elusive nexus of conceptions and practices
