The Oxford Handbook of Music Education, Volume 2 Gary McPherson, Graham Welch, 2012-07-15 Music education takes place in many contexts both formal and informal Be it in a school or music studio while making music with friends or family or even while travelling in a car walking through a shopping mall or watching television our myriad sonic experiences accumulate from the earliest months of life to foster our facility for making sense of the sound worlds in which we live The Oxford Handbook of Music Education offers a comprehensive overview of the many facets of musical experience behavior and development in relation to this diverse variety of contexts While the first volume primarily focuses on children during school age years this second collects an international list of contributors to explore how music learning takes place outside of the traditional classroom environment Discussing a range of issues such as music education for the special needs population music learning in adulthood and music learning through media and technology these chapters help to broaden conceptions of music and musical involvement Whether they are used individually or in tandem the two volumes of The Oxford Handbook of Music Education update and redefine the discipline and show how individuals across the world learn enjoy and share the power and uniqueness of music "Rival Sisters, Art and Music at the Birth of Modernism, 1815?915 "

JamesH. Rubin, 2017-07-05 Introducing the concept of music and painting as rival sisters during the nineteenth century this interdisciplinary collection explores the productive exchange from rivalry to inspiration to collaboration between the two media in the age of Romanticism and Modernism The volume traces the relationship between art and music from the opposing claims for superiority of the early nineteenth century to the emergence of the concept of synesthesia around 1900 This collection puts forward a more complex history of the relationship between art and music than has been described in earlier works including an intermixing of models and distinctions between approaches to them Individual essays from art history musicology and literature examine the growing influence of art upon music and vice versa in the works of Berlioz Courbet Manet Fantin Latour Rodin Debussy and the Pre Raphaelites among other artists **The Art of Walter Anderson** Walter Inglis Anderson, 2003 This illustrated volume celebrates the centennial of one of the South s greatest artists **The ^AHearing Eye** Graham Lock, David Murray, 2009-01-02 The widespread presence of jazz and blues in African American visual art has long been overlooked The Hearing Eye makes the case for recognizing the music s importance both as formal

Sound, Sin, and Conversion in Victorian England Julia Grella O'Connell, 2018-04-19 The plight of the fallen woman is one of the salient themes of nineteenth century art and literature indeed the ubiquity of the trope galvanized the Victorian conscience and acted as a spur to social reform In some notable examples Julia Grella O'Connell argues the iconography of the Victorian fallen woman was associated with music reviving an ancient tradition conflating the practice of music with sin and the abandonment of music with holiness The prominence of music symbolism in the socially committed quasi religious paintings of the Pre Raphaelites and their circle and in the Catholic Wagnerian novels of George Moore gives evidence of the survival of a pictorial language linking music with sin and conversion and shows even more remarkably that this language translated fairly easily into the cultural lexicon of Victorian Britain Drawing upon music iconography art history patristic theology and sensory theory Grella O'Connell investigates female fallenness and its implications against the backdrop of the social and religious turbulence of the mid nineteenth century
