Sound Tracks:

Sound Tracks John Connell, Chris Gibson, 2003 Sound Tracks is the first comprehensive book on the new geography of popular music examining the complex links between places music and cultural identities. It provides an interdisciplinary perspective on local national and global scenes from the Mersey and Icelandic sounds to world music and explores the diverse meanings of music in a range of regional contexts. In a world of intensified globalisation links between space music and identity are increasingly tenuous yet places give credibility to music not least in the country and music is commonly linked to place as a stake to originality a claim to tradition and as a marketing device. This book develops new perspectives on these relationships and how they are situated within cultural and geographical thought.
