In this delightful phenomenological account, Kittelson writes in lively pursuit of the language of hearing, an ode to the persistent primacy of the ear. It's right here, she says, just around the corner from our noses. *The Power of Sound* Joshua Leeds, 2010-08-30. Customize your sound environment for a better quality of life. Shows how to use music and sound to reduce stress, enhance learning, and improve performance. Provides detailed guidelines for musicians and health care professionals. Includes a new 75 minute CD of psychoacoustically designed classical music. What we hear and how we process it has a far greater impact on our daily living than we realize. From the womb to the moment we die, we are surrounded by sound, and what we hear can either energize or deplete our nervous systems. It is no exaggeration to say that what goes into our ears can harm us or heal us. Joshua Leeds, a pioneer in the application of music for health, learning, and productivity, explains how sound can be a powerful ally. He explores chronic sensory overload and how auditory dysfunction often results in difficulties with learning and social interactions. He offers innovative techniques designed to invigorate auditory skills and provide balanced sonic environments. In this revised and updated edition of *The Power of Sound*, Leeds includes current research, extensive resources, analysis of the maturing field of soundwork, and a look at the effect of sound on animals. He also provides a new 75 minute CD of psychoacoustically designed classical music for a direct experience of the effect of simplified sound on the nervous system. With new information on how to use music and sound for enhanced health and productivity, *The Power of Sound* provides readers with practical solutions for vital and sustained well-being.

Supportive Therapy Lawrence H. Rockland, H. Rockland, 2003-04-17. The main goal of the therapy described here is to improve ego functions and adaptations rather than to explore unconscious conflicts. Thus, the emphasis is on strengthening reality testing, discouraging impulsivity, and clarifying confused thinking while minimizing the regression and negative transference characteristic of exploratory therapy. In chapters richly illustrated with clinical material, the author details the strategies and rationales of this practice, covering such topics as transference and countertransference, resistance, working through, and the relationship between supportive therapy and psychopharmacology. Clinically sophisticated yet immensely practical, this valuable resource will enhance the skill and understanding of every therapist, student, clinician, or teacher who practices supportive psychotherapy. **Return to the Brain of Eden** Tony Wright, Graham Gynn, 2014-05-14. An exploration of our fall from the pinnacle of human evolution 200,000 years ago and how we can begin our return. Explores recent neurological and psychological research on the brain and the role of plant biochemistry in human brain expansion. Explains how humanity's prehistoric diet change led to a neurodegenerative condition characterized by aggression and a fearful perception of the world. Outlines a strategy of raw foods, tantric sexuality, shamanic practices, and entheogens to reverse our mental degeneration and restore our advanced abilities. Over a period of a million years, the human brain expanded at an

increasingly rapid rate and then 200 000 years ago the expansion abruptly stopped Modern science has overlooked this in order to maintain that we are at the pinnacle of our evolution However the halt in brain expansion explains not only recently uncovered anomalies within the human brain but also the global traditions of an earthly paradise lost and of humanity's degeneration from our original state of perpetual wonder and joy Drawing on more than 20 years of research authors Tony Wright and Graham Gynn explore how our modern brains are performing far below their potential and how we can unlock our higher abilities and return to the euphoria of Eden They explain how for millions of years early forest dwelling humans were primarily consuming the hormone rich sex organs of plants fruit each containing a highly complex biochemical cocktail evolved to influence DNA transcription rapid brain development and elevated neural and pineal gland activity Citing recent neurological and psychological studies the authors explain how the loss of our symbiotic fruit based diet led to a progressive neurodegenerative condition characterized by aggressive behaviors a fearful perception of the world and the suppression of higher artistic mathematical and spiritual abilities The authors show how many shamanic and spiritual traditions were developed to counteract our decline They outline a strategy of raw foods tantric sexuality shamanic practices and entheogen use to reverse our degeneration restore our connection with the plant world and regain the bliss and peace of the brain of Eden
