Telling Their Stories Puerto Rican Women And Abortion:

Telling Their Stories Jean P. Peterman, 2019 Abortion and the right of a woman to control her fertility cross boundaries of race ethnicity and social class In this revealing and in depth study Jean P Peterman focuses on a group of Puerto Rican women in Chicago whose decisions about abortion highlight the contradictions between the sexually conservative ethnic and religious beliefs of this community and the fact that Latina women including Puerto Rican women have abortions at a rate one and a half times as high as non Latinas For more than half the women Peterman interviewed their decision to have an abortion allowed them to maintain opportunities for themselves or to resist male control Despite their resistance to traditional gender roles their Puerto Rican identity remains strong The term cultural story coined by sociologist Laurel Richardson explains how cultures create and support their social worlds their cultural and social frameworks as well as beliefs about home community sex roles and family A collective story is an oppositional story a form of resistance and a catalyst for change In this book the stories recounted by these women involve struggles against barriers intrinsic to their social structure such as poverty prejudice and discrimination that ultimately shape newfound feelings of independence inner strength and control over their own fertility and their lives

Kimball,2020-06-12 Many women throughout the world face the challenge of confronting an unexpected or an unwanted pregnancy yet these experiences are often shrouded in silence An Open Secret draws on personal interviews and medical

records to uncover the history of women's experiences with unwanted pregnancy and abortion in the South American country of Bolivia. This Andean nation is home to a diverse population of indigenous and mixed race individuals who practice a range of medical traditions. Centering on the cities of La Paz and El Alto, the book explores how women decided whether to continue or terminate their pregnancies and the medical practices to which women recurred in their search for reproductive health care between the early 1950s and 2010. It demonstrates that far from constituting private events with little impact on the public sphere, women's intimate experiences with pregnancy contributed to changing policies and services in reproductive health in Bolivia. Telling to Live Latina Feminist Group, 2001-09-18. An anthology of testimonials from Latina Chicana feminists, some of whom are well known, which give insight into their personal life experiences and break barriers and assumptions.

Latina/o Sexualities Marysol Asencio, 2010. Latina/os are currently the largest minority population in the United States. They are also one of the fastest growing. Yet we have very limited research and understanding of their sexualities. Instead, stereotypical images flourish even though scholars have challenged the validity and narrowness of these images and the lack of attention to the larger social context. Gathering the latest empirical work in the social and behavioral sciences, this reader offers us a critical lens through which to understand these images and the social context framing Latina/os and their sexualities. Situated at the juncture of Latina/o studies and sexualities studies, *Latina/o Sexualities* provides a single resource that addresses the current state of knowledge from a multidisciplinary perspective. Contributors synthesize and critique the literature and carve a separate space where issues of Latina/o sexualities can be explored given the limitations of prevalent research models. This work compels the current wave in sexuality studies to be more inclusive of ethnic minorities and sets an agenda that policy makers and researchers will find invaluable.

Selective Reproduction in the 21st Century Ayo Wahlberg, Tine M. Gammeltoft, 2017-08-12. This book explores how conditions for childbearing are changing in the 21st century under the impact of new biomedical technologies. Selective reproductive technologies (SRTs), technologies that aim to prevent or promote the birth of particular kinds of children, are increasingly widespread across the globe. Wahlberg and Gammeltoft bring together a collection of essays providing unique ethnographic insights on how SRTs are made available within different cultural, socio-economic, and regulatory settings and how people perceive and make use of these new possibilities as they envision and try to form their future lives. Topics covered include sex-selective abortions, termination of pregnancies following detection of fetal anomalies during prenatal screening, the development of preimplantation genetic diagnosis techniques, as well as the screening of potential gamete donors by egg agencies and sperm banks. This is invaluable reading for scholars of medical anthropology, medical sociology, and science and technology studies, as well as for the fields of gender studies, reproductive health, and genetic disease research.
