The Navy List Great Britain. Admiralty, 1861 Federal Register , 1985 *Upper Canada Law Journal* James Patton, W. D. Ardagh, Robert Alexander Harrison, Henry O'Brien, Charles Bagot Labatt, Arthur Henry O'Brien, Charles Morse, 1863

Includes section Book reviews **A Documentary History of the American Civil War Era** Thomas C. Mackey, 2014-06-30

A Documentary History of the American Civil War Era is the first comprehensive collection of public policy actions political speeches and judicial decisions related to the American Civil War Collectively the four volumes in this series give scholars teachers and students easy access to the full texts of the most important fundamental documents as well as hard to find rarely published primary sources on this critical period in U S history The first two volumes of the series Legislative Achievements and Political Arguments were released last year The final installment Judicial Decisions is divided into two volumes The first volume spanning the years 1857 to 1866 was released last year This second volume of Judicial Decisions covers the years 1867 to 1896 Included here are some of the classic judicial decisions of this time such as the 1869 decision in *Texas v White* and the first judicial interpretation of the 1868 Fourteenth Amendment the 1873 Slaughter House Cases Other decisions are well known to specialists but deserve wider readership and discussion such as the 1867 state and 1878 federal cases that upheld the separation of the races in public accommodations and thus constituted the common law of common commerce long before the more notorious 1896 case of *Plessy v Ferguson* also included These judicial voices constitute a lasting and often overlooked aspect of the age of Abraham Lincoln Mackey's headnotes and introductory essays situate cases within their historical context and trace their lasting significance In contrast to decisions handed down during the war these judicial decisions lasted well past their immediate political and legal moment and deserve continued scholarship and scrutiny This document collection presents the raw stuff of the Civil War era so that students scholars and interested readers can measure and gauge how that generation met Lincoln's challenge to think anew and act anew A Documentary History of the American Civil War Era is an essential acquisition for academic and public libraries in addition to being a valuable resource for courses on the Civil War and Reconstruction legal history political history and nineteenth century American history **Capacity**

Mechanisms in the EU Energy Market Leigh Hancher, Adrien De Hauteclocque, Malgorzata Sadowska, 2015 Ensuring an adequate long term energy supply is a paramount concern in Europe The security of a country's energy supply must be guaranteed and within the EU individual member states are acting in order to safeguard future energy production Governments now intervene by encouraging investment in generation capacity offering an additional revenue stream for conventional power plants in addition to the existing heavily subsidized investments in renewable energy sources These capacity remuneration mechanisms or simply capacity mechanisms have become a hot topic in the wider European regulatory debate European electricity markets are increasingly interconnected so the introduction of a capacity mechanism in one country not only distorts its national market but may have unforeseeable consequences for neighboring electricity

markets If these mechanisms are adopted by several member states with no supra national coordination and no consideration for their cross border impact they may cause serious market distortions and put the future of the European internal electricity market at risk These national developments are giving great cause for concern and without a clear understanding of capacity mechanisms and their potential consequences it is difficult to predict the impact these measures will have on the internal European electricity market This book provides readers with a thorough explanation and analysis of capacity mechanisms written by an expert team of policy makers economists and legal professionals It will be a first point of reference for regulators and policy makers responsible for designing optimal capacity mechanisms in Europe and will be an invaluable resource for academics and practitioners in the fields of energy regulation and competition
