Terapia Mortal:

Terapia génica Blanca Laffon Lage, Vanessa Valdiglesias García, Eduardo Pásaro Méndez, 2016-01-21 La terapia génica ha supuesto una revolución en la manera de abordar el tratamiento de las enfermedades humanas puesto que ha abierto un nuevo horizonte que permite la curación de aquellas para las que hasta el momento solo existían tratamientos orientados a paliar sus síntomas. Los importantes descubrimientos acerca de cómo manipular el material genético en el laboratorio y cómo introducir este material directamente en las células suscitaron la idea de que fuera posible aplicar estas metodologías al tratamiento de las enfermedades con componente genético. Así nace la terapia génica que consiste en introducir un gen en las células de un paciente para corregir un defecto genético o dotarlas de una nueva función. Este libro explica esta nueva rama de la medicina para que el lector conozca en qué consiste sus aplicaciones más frecuentes y sus posibles ventajas e inconvenientes. *Mundos Separdos* Jim Hartz, 2001 Terapias de cine Tabernero Holgado, Carlos, 2016-11-28 La medicina y el cine son parte de nuestro día a día. Acudimos a la consulta o a la sala en busca de algún tipo de alivio y de puertas a otros mundos. Y la consulta y la sala, la medicina y el cine se miran de reojo. La medicina quiere al cine para mirar, explorar y estudiar; diagnosticar y operar también como herramienta publicitaria y de propaganda para construir su autoridad. Y el cine cuenta muy a menudo con la medicina porque trabaja con experiencias rutinarias de salud y enfermedad, sus miedos y sus osadías, sus servidumbres y sus rebeliones. La medicina y el cine caminan de la mano con la experiencia cotidiana de la muerte y de la vida. Y la medicina es cine porque es soñar, cuestionar y luchar como lo es sufrir, morir y amar. Y es por esto mismo que también en nuestro día a día el cine es medicina. **Terapias de oxígeno** Nathaniel Altman, 1996-06 Describes bio-oxidative therapies which improve health and offers diet and exercise advice. **Terapias con células madre para animales de compañía** Elisabeth Napp, Carla Johansson, 2025-02-13 La investigación veterinaria ha logrado avances significativos en medicina regenerativa en los últimos años. Las terapias con células madre abren nuevas perspectivas en el tratamiento de enfermedades degenerativas, lesiones y dolencias crónicas en animales domésticos. Este libro ofrece una descripción exhaustiva y científicamente fundamentada de los avances actuales, las posibilidades terapéuticas y los fundamentos biológicos de la medicina con células madre en perros, gatos y caballos. Además de una visión detallada de los mecanismos de la biología celular, se describen aplicaciones prácticas que son importantes tanto para los veterinarios como para los propietarios de animales. Se presta especial atención a las enfermedades que pueden tratarse con células madre. Entre ellas se encuentran afecciones ortopédicas como la artrosis, las displasias articulares y las lesiones tendinosas; enfermedades neurológicas como la mielopatía degenerativa y las lesiones de la médula espinal; así como enfermedades inflamatorias crónicas e inmunomediadas como la dermatitis atópica y ciertas formas de enfermedades autoinmunes. Una obra imprescindible para todos aquellos que se ocupan de los métodos de curación regenerativa modernos para animales domésticos, ya sea desde una perspectiva científica veterinaria o práctica. Bremen University Press ha publicado más de 4.500 libros.

¿Qué es la terapia con fagos? El uso terapéutico de bacteriófagos también conocido como terapia con fagos, terapia con fagos virales o fagoterapia puede definirse como el tratamiento de enfermedades infecciosas causadas por bacterias dañinas. Esta técnica de tratamiento surgió a principios del siglo XX pero tras la Segunda Guerra Mundial fue suplantada paulatinamente por el uso de antibióticos en la mayor parte del mundo. Los bacteriófagos son un tipo de virus que se adhieren a las células bacterianas y luego inyectan su genoma en la célula bacteriana. Los bacteriófagos también se conocen como fagos. El genoma bacteriano se reemplaza con éxito por el genoma del virus lo que da como resultado el cese de la infección bacteriana. Debido a que no puede replicarse la célula bacteriana responsable de la infección crea fagos adicionales. Los fagos solo son efectivos contra especies bacterianas extremadamente específicas debido a su alto nivel de especificidad.
