The LNER 2-6-0 Classes John Frederic Clay, Joseph Cliffe, 1978 **The LNER Handbook** David Wragg, 2017-07-03

Renowned for its express locomotive Mallard setting a world speed record 126mph for steam locomotives that endures to this day the London North Eastern Railway was the second largest of the Big Four railway companies to emerge from the 1923 grouping and also the most diverse with its prestigious high speed trains from King s Cross balanced by an intensive suburban and commuter service from Liverpool Street and a high dependence on freight. Noted for its cautious board and thrifty management the LNER gained a reputation for being poor but honest. Forming part of a series along with The GWR Handbook, The LMS Handbook and The Southern Railway Handbook, this new edition provides an authoritative and highly detailed reference of information about the LNER.

The East Coast Main Line 1939-1959 (Volume 2) Peter Tuffrey, B. W. L. Brooksbank, 2022-07-02. The first detailed study of this huge mainline through its operational history. Features extended commentaries from the authors rich in detail. Superbly illustrated with black and white photographs many never seen before. In this second and final volume the whole of the East Coast Main Line between King s Cross and Edinburgh Waverley stations is examined closely with a particular emphasis on the ways and structures, the line, stations, connections, yards and other physical features. Interposed are accounts of the traffic at the principal stations including connecting and branch line services with observations on changes over the period 1939 to 1959. Some emphasis is placed on freight traffic on account of its importance and perhaps its relative unfamiliarity to the reader. The lines, stations and many other elements are described as they were in August 1939 but as some plans on which they are based are dated before the late 1930s there may be marginal differences from the precise layout in 1939.

The Great Eastern Railway - From the Grouping to the Elizabeth Line 1923-2023 Charles Phillips, 2025-03-06. Explores the transformation of the Great Eastern Section from a backwater to a modernized railway hub from 1923 to 2023. This book is the sequel to the author s two previous volumes on the history of the Great Eastern covering the Early Years from 1811 to 1862 and the Late 19th Century and early 20th Century from 1862 to 1924. This book covers the years 1923 to 2023, describes how the Great Eastern Section of the London and North Eastern Railway was transformed from being something of a backwater during the inter war years to being very much at the forefront of modernisation under British Railways. Within the book will be found how the Great Eastern Section coped with the threat of road competition during the inter war years, its involvement in the Second World War and how under British Railways it came to be seen the epitome of modernisation beginning with the arrival of the Britannia Class locomotives in 1951 and culminating in the complete elimination of steam power in the East of England at the end of 1963. The book describes the impact of the Beeching Report on the former Great Eastern. It chronicles the progress of the Section s through the electrification of its two main lines and the construction and opening of the Elizabeth Line. Preservation is also mentioned as are possible future developments. It is a book for anyone who is interested in the history of the railways of the East of England.
