The Logic Of Affect:

The Logic of Affect Paul Redding, 2019-04-15 Most attempts to trace the roots of current scientific approaches to the mind have ignored the contributions of post Kantian German idealism Paul Redding here shows the relevance of this philosophical tradition to an understanding of the mind and its embodiment as well as the relation of feeling to cognition Redding observes how Fichte Schelling and Hegel struggled with the problem of reconciling Kant's normative approach to experience and thought with the naturalistic stance of the emerging medical sciences A century later William James Freud and Jung also addressed the interconnection of thought and feeling reaching views similar to those of the post Kantian idealists In particular Redding argues the idealists conceived of a logic of affect that reemerged in Freud's concept of the primary process and in modern evolutionary ideas of subcortical processing This innovative book demonstrates how new insights can be brought to the study of mentality and consciousness by considering previously overlooked interpretations Redding shows that these early theorists of the unconscious can bring scholars to a better appreciation not only of classical thinkers like James and Freud but also of contemporary debates about the mind and emotions Emotional Choices Robin Markwica, 2018 This book examines coercive diplomacy and presents a theory of emotional choice to analyse how affect enters into decision making

The Ascent of Affect Ruth Leys, 2017-11-10 In recent years emotions have become a major vibrant topic of research not merely in the biological and psychological sciences but throughout a wide swath of the humanities and social sciences as well Yet surprisingly there is still no consensus on their basic nature or workings Ruth Leys's brilliant much anticipated history therefore is a story of controversy and disagreement The Ascent of Affect focuses on the post World War II period when interest in emotions as an object of study began to revive Leys analyzes the ongoing debate over how to understand emotions paying particular attention to the continual conflict between camps that argue for the intentionality or meaning of emotions but have trouble explaining their presence in non human animals and those that argue for the universality of emotions but struggle when the question turns to meaning Addressing the work of key figures from across the spectrum considering the potentially misleading appeal of neuroscience for those working in the humanities and bringing her story fully up to date by taking in the latest debates Leys presents here the most thorough analysis available of how we have tried to think about how we feel
