The Long Fuse:

The Long Fuse Laurence Davis Lafore, 1965 The interpretation of the origins of World War I
Laurence Lafore, 1997-05-15 In analyzing the causes of World War I without concern for the question of guilt the author places emphasis on two central facts first that when statesmen and peoples took actions they knew might lead to war they were not envisaging the catastrophe that the war became but rather a quick and limited war and second that among the many conflicts that might have led to war the one that did was the threat to the integrity of Austria Hungary posed by Serbia and Serb nationalism *The Long Fuse. An Interpretation to the Origins of World War I....* Laurence Lafore, 1966 *The Longest Boundary: How the US-Canadian Border's Line came to be where it is, 1763-1910 (Consolidated edition)* John Dunbabin, 2024-04-25 A consolidated eBook of Volume one and Volume two of *The Longest Boundary* by John Dunbabin These volumes are firmly based on primary sources but written in a way that should appeal to the general reader as much as to specialised historians Its chief actors are politicians and administrators but there is a range of others extending from First Nations chiefs to goldminers railway entrepreneurs prophets and policemen In the concluding chapter the book's general historical approach is supplemented by assessment of the main perspectives of international relations theory Finally attention is drawn to small anomalies created by the boundary line Official Gazette of the United States Patent and Trademark Office United States. Patent and Trademark Office, 1999 **Timetrees: Incorporating Fossils and Molecules, 2nd edition** Michel Laurin, Gilles Didier, Rachel C. M. Warnock, 2022-09-15 Calibrating phylogenies to time is central to addressing many questions in evolutionary biology and macroevolution The fossil record once provided our only source for establishing a timeline for evolution However the incompleteness of the fossil record and the non uniformity of fossil recovery rate make it challenging to obtain precise estimates of divergence times from fossil evidence alone Molecular dating which combines evidence from the geological and molecular records enables us to generate a much more complete and precise timeline of events The molecular clock can be time calibrated using temporal evidence from fossils and used to estimate divergence times based on the assumption that the rate of sequence evolution will be approximately constant over time and among lineages Methodological challenges to applying this concept in practice have been to relax the assumption of constant evolutionary rates and to model the uncertainty associated with paleontological and geological calibrations To this end available statistical methods have become increasingly complex in order to capture key features of empirical data These are typically applied using Bayesian inference which provides a powerful framework for incorporating multiple sources of uncertainty Although overall more effort has been expended in developing models of molecular sequence evolution critical advances have also included approaches to modeling taxonomic diversification and fossilization In particular recent advances in birth death process models have allowed for continuous sampling along lineages enabling more information from the fossil record to be incorporated into dating analyses in a statistically coherent way In addition available dating methods can now be

applied to scenarios in which no molecular data may be available allowing for novel insights into the evolution of entirely extinct clades Other recent innovations enable us to date divergence times among taxa that have no fossil record including the use of gene duplication events or biogeographic evidence Furthermore time calibrated trees are necessary for obtaining phylogenetic estimates of taxonomic diversification and extinction rates which can now be jointly inferred along with lineage divergence times These approaches offer an exciting opportunity to understand the evolution of life in deep time although key challenges remain especially with regards to modeling the processes of genome evolution taxonomic diversification and fossil recovery In this Research Topic we focus on recent advances in methodology outstanding challenges and the application of molecular and paleontological dating methods to empirical case studies across the Tree of Life

Each Goldfish is Hand Painted Jules Leigh Koch,2002 Koch is a poet who like the Impressionists works en plein air He is a colourist a sketcher with words who sets up his easel at the beach in city streets suburban backyards and gum forests With affection he records the quotidian details of our suburbs working with quick dabs bright splashes of colour and deftly caught feelings

The Young Lions Irwin Shaw,2013-02-26 One of the great World War II novels this New York Times bestselling masterpiece captures the experiences of three very different soldiers The Boston Globe Standing alongside Norman Mailer s The Naked and the Dead and James Jones s From Here to Eternity The Young Lions is one of the most powerful American novels to tackle the Second World War Ambitious in its scope and robust in its prose Irwin Shaw s work is also deeply humanistic presenting the reality of war as seen through the eyes of ordinary soldiers on both sides The story follows the individual dramas and ultimately intertwined destinies of Christian Diestl a Nazi sergeant Noah Ackerman a Jewish American infantryman and Michael Whitacre an idealistic urbanite from the New York theatrical world Diestl first appears as a dashing ski instructor in Austria mouthing his loyalty to Nazi ideals As the war progresses Diestl s character continues to erode as he descends into savagery Ackerman must endure domestic anti Semitism and beatings in boot camp before proving himself in the European theater Eventually as part of the liberating army he comes face to face with the unimaginable horrors of the death camps Whitacre trading cocktail parties for Molotov cocktails confronts the barbarism of war and in fighting simply to survive finds his own capacity for heroism Shaw s sweeping narrative is at once vivid exciting and brutally realistic as well as poignant in its portrayal of the moral devastation and institutional insanity of war Penned by a master storyteller at the height of his craft The Young Lions stands the test of time as a classic novel of war and the human experience This ebook features an illustrated biography of Irwin Shaw including rare images and never before seen documents from the author s estate

Jane Goodall: What She Taught Us About a Long Life Konstantin Titov,2025-10-05 Jane Goodall didn t just live a long life she lived a charged one Even into her nineties she filled auditoriums boarded red eye flights and spoke with the same luminous clarity that once turned a Tanzanian forest into the most famous classroom on Earth This book distills what her life suggests about length with depth why purpose outperforms comfort why work can be nourishment why a plant

forward table supports a planet forward conscience why hope practiced daily protects both the mind and the mission It s not a hagiography and not a diet manual It s a field guide to living long without living small Part I traces the durability of purpose From Gombe s first days to a global stage we follow the arc that kept Goodall moving curiosity that never aged service that never retired and a public voice that stayed soft yet immovable We examine how meaning compounds energy how saying yes to one talk becomes a cascade of commitments and why that rhythm rather than idling often maintains stamina in late life Part II is the body s side of the story sleep that is protected daily movement that is practical walking stretching standing speeches and nutrition that aligns ethics with fuel You ll find a plain English synthesis of the research that supports plant based eating for cardiovascular health and longevity with a candid section on common pitfalls protein panic social friction and practical fixes anyone can adopt Part III is the mind at work how Goodall used rituals journals letters travel routines boundaries saying no to distraction so she could say yes to mission critical requests and recovery quiet moments in green places to guard her attention We break hope into verbs observe closely act locally connect widely and show how these habits insulated her against cynicism without denying reality Part IV turns lessons into action We give you a 30 day Long Life Lab with tiny repeatable experiments a daily 15 minute walk with intent a weekly friendship ritual one plant strong swap one nature appointment one community touchpoint You ll also build a mission sentence that fits your life stage because longevity worth having is longevity used Goodall s passing at 91 closes the narrative but not the instruction If you admired her for the science come for the rigor If you admired her for the spirit stay for the practices that make spirit hold This is a humane evidence attentive handbook for readers who want more years and better ones and who suspect as she did that joy is a discipline as much as a feeling

The Origin and Evolution of Mammals T. S. Kemp, 2005 Mammals are the dominant large animals of today occurring in virtually every environment This book is an account of the remarkable 320 million year long fossil record that documents their origin their long spell as no more than small nocturnal creatures and their explosive radiation since the extinction of the dinosaurs 65 million years ago Tom Kemp also unveils the exciting molecular evidence which coupled with important new fossils is presently challenging current thinking on the interrelationships and historical biogeography of mammals *The Origin and Evolution of Mammals* will be of interest to advanced undergraduate and graduate students as well as researchers in vertebrate palaeontology biogeography mammalian systematics and molecular taxonomy It will also be welcomed by vertebrate fossil enthusiasts and evolutionary biologists of all levels with an interest in macroevolutionary problems
