It's absolutely crucial for anyone who wants to know the automobile's basic components from the engine to the electronic systems and to understand how they work, what can go wrong and how to make repairs. — *De Gruyter Handbook of Digital Criminology* Mareile Kaufmann, Heidi Mork Lomell, 2025-03-17

The *De Gruyter Handbook of Digital Criminology* examines how digital devices spread and cut across all fields of crime and control. Providing a glossary of key theoretical, methodological and criminological concepts, the book defines and further establishes a vibrant and rapidly developing field. At the same time, Digital Criminology is not only presented as a novelty but also as a continuation of the discipline's history. Each chapter can be read as a free-standing contribution or texts can be combined to gain a more holistic understanding of Digital Criminology or to design a research project. Expert contributions vary from Criminology, Sociology, Law, Science and Technology Studies to Information Science and Digital Humanities. Together, these supply readers with rich and original perspectives on the digitization of crime and control. — *High Tech, Low Tech, No Tech* William W. Falk, Thomas A. Lyson, 1988-08-29

Fifty years ago, the quality of life in the 13 states of the Old South was judged to be among the lowest in the country. A lack of industrial development and the pervasiveness of a sharecropping system of agricultural production combined to keep the South mired in the backwaters of the American economy. Over the past five decades, however, the South has moved to the forefront as an area of economic growth. The authors show that significant improvements have taken place almost entirely in and around the major cities. Rural areas, especially those with a high percentage of blacks, remain saddled with an economic base dominated almost entirely by slow-growing, stagnating and declining industries. The uneven development of the region is the result of a set of industrial policies in which communities attempt to lure prospective employers with lucrative business incentive packages. Guarantees of cheap, unorganized labor, tax holidays and giveaways of land and buildings are some of the chips community leaders use in this high-stakes game. Rural communities are often caught in bidding wars among themselves in which they are forced to offer even more lucrative incentives and in the process reallocate resources away from needed human services. Consequently, Falk and Lyson target the need for a national industrial policy that will bring some order to the industrial recruitment process. — Guide for the Selection of Drug Detectors for Law Enforcement Applications John E.
