**Skin Shows** Judith Halberstam, Jack Halberstam, 1995 In this examination of the monster as cultural object Judith Halberstam offers a rereading of the monstrous that revises our view of the Gothic Moving from the nineteenth century and the works of Shelley Stevenson Stoker and Wilde to contemporary horror film exemplified by such movies as Silence of the Lambs Texas Chainsaw Massacre and Candyman *Skin Shows* understands the Gothic as a versatile technology a means of producing monsters that is constantly being rewritten by historically and culturally conditioned fears generated by a shared sense of otherness and difference Deploying feminist and queer approaches to the monstrous body Halberstam views the Gothic as a broad based cultural phenomenon that supports and sustains the economic social and sexual hierarchies of the time She resists familiar psychoanalytic critiques and cautions against any interpretive attempt to reduce the affective power of the monstrous to a single factor The nineteenth century monster is shown for example as configuring otherness as an amalgam of race class gender and sexuality Invoking Foucault Halberstam describes the history of monsters in terms of its shifting relation to the body and its representations As a result her readings of familiar texts are radically new She locates psychoanalysis itself within the gothic tradition and sees sexuality as a beast created in nineteenth century literature Excessive interpretability Halberstam argues whether in film literature or in the culture at large is the actual hallmark of monstrosity

**Skin Shows** Judith Halberstam, 1995-10-01 *Skin Shows* is the Gothic book that many of us have been waiting for and it is every bit as smart as we had hoped it would be Halberstam's notion of monstrosity will change Gothic studies for good The results are dazzling George E Haggerty University of California Riverside

*We Are All Monsters* Andrew Mangham, 2023-02-14 How the monsters of nineteenth century literature and science came to define us Was I then a monster a blot upon the earth from which all men fled and whom all men disowned In *We Are All Monsters* Andrew Mangham offers a fresh interpretation of this question uttered by Frankenstein's creature in Mary Shelley's 1818 novel in an expansive exploration of how nineteenth century literature and science recast the monster as vital to the workings of nature and key to unlocking the knowledge of all life forms and processes Even as gothic literature and freak shows exploited an abiding association between abnormal bodies and horror amazement or failure the development of monsters in the ideas and writings of this period showed the world to be dynamic varied plentiful transformative and creative In works ranging from Comte de Buffon's interrogations of humanity within natural history to Hugo de Vries's mutation theory and from Shelley's artificial man to fin de siècle notions of body difference Mangham expertly traces a persistent attempt to understand modern subjectivity through a range of biological and imaginary monsters In a world that hides monstrosity behind theoretical and cultural representations that reinscribe its otherness this enlightened book shows how innovative nineteenth century thinkers dismantled the fictive idea of normality and provided a means of thinking about life in ways that check the reflexive tendency to categorize and divide
