premodern mindset and discard modernity and its concepts of secularization autonomy and finitude The Embarrassment of Being Human not only demonstrates how these magical materialisms are beset by grave theoretical and practical inconsistencies and self contradictions It also demonstrates how their demand for humans to step down and allow for an emancipation of things qualifies the new materialisms as a metaphysics of neoliberalism that reproduces and fortifies the self contradictions rampant in the current neoliberal hegemony While helping us to gain a comprehensive understanding of the tenets of the eerie ills of our epoch the critique of the new materialisms can furthermore inspire us to appreciate how the exact inversion of the new materialist complex amounts to a revitalization of the modern project A revitalization that is critical to think our epoch differently **American Women and Flight since 1940** Deborah G. *The Other Women's Movement* Dorothy Sue Cobble, 2011-08-15 American feminism has always been about more than the struggle for individual rights and equal treatment with men There's also a vital and continuing tradition of women's reform that sought social as well as individual rights and argued for the dismantling of the masculine standard In this much anticipated book Dorothy Sue Cobble retrieves the forgotten feminism of the previous generations of working women illuminating the ideas that inspired them and the reforms they secured from employers and the state This socially and ethnically diverse movement for change emerged first from union halls and factory floors and spread to the pink collar domain of telephone operators secretaries and airline hostesses From the 1930s to the 1980s these women pursued answers to problems that are increasingly pressing today how to balance work and family and how to address the growing economic inequalities that confront us The Other Women's Movement traces their impact from the 1940s into the feminist movement of the present The labor reformers whose stories are told in *The Other Women's Movement* wanted equality and special benefits and they did not see the two as incompatible They argued that gender differences must be accommodated and that equality could not always be achieved by applying an identical standard of treatment to men and women The reform agenda they championed an end to unfair sex discrimination just compensation for their waged labor and the right to care for their families and communities launched a revolution in employment practices that carries on today Unique in its range and perspective this is the first book to link the continuous tradition of social feminism to the leadership of labor women within that movement

Are we alone in the universe or have alien lifeforms already made contact      From Birdwomen to Skygirls Fred Erisman, 2009-11-30 Close on the heels of the American public's early enthusiasm over the airplane came aviation stories for the young. From 1910 until the early 1960s they exalted flight and painted the airplane as the most modern and adventuresome of machines. Most of the books were directed at boys; however, a substantial number sought a girl's audience. Erisman's account of several aviation series and other aviation books for girls fills a gap in the history and criticism of American popular culture. It examines the stories of girls who took to the sky, the sources where authors found their inspiration, and of the evolution of aviation as an enterprise open to all. From the heady days of early aviation through the glory days of commercial air travel, girls' aviation books trace American women's participation in the field. They also reflect changes in women's roles and status in American society as the sex sought greater equality with men. As aviation technology improved, the birdwomen of the pre-World War I era, capable and independent-minded, gave way to individualistic 1930s adventurers patterned on Amelia Earhart, Jacqueline Cochran, and other feminine notables of the air. Their stories lead directly into the coming of commercial air travel. Career stories paint the increasingly glamorous world of the 1940s and 1950s airline stewardess, the unspoken assumptions lying behind that profession, and the inexorable effects of technological and economic change. By recovering these largely forgotten books and the social debates surrounding women's flying, Erisman makes a substantial contribution to aviation history, women's history, and the study of juvenile literature. This first comprehensive study of a long overlooked topic recalls aviation experiences long past and poses provocative questions about Americans' attitudes toward women and how those attitudes were conveyed to the young      Wyoming's Friendly Skies Starley Talbott, 2020-08-10 Boeing Air Transport, a precursor of United Air Lines, began carrying passengers in 1927 on small, uncomfortable airplanes with few amenities. Steve Stimpson, manager of Boeing's San Francisco office, considered hiring stewards to alleviate passengers' concerns. Ellen Church convinced him that employing women, especially nurses, as stewardesses would be a visionary solution. Eight brave young women entered Boeing's brief training program in Cheyenne in May 1930, making them the first airline stewardesses in the world. In 1947, United Air Lines established its Stewardess Training Center in Cheyenne, operating for nearly two decades. Authors Starley Talbott and Michael Kassel celebrate the world's first stewardesses as well as the thousands who followed in their footsteps.
