Social Context Of Learning And Development:

The Social Context of Learning and Development John C. Glidewell, 1977 **The Social Context of Learning and Development** John C. Glidewell, 1977 **The Social Contexts of Young People**, 2024-02-14 This edited volume investigates young people within their social contexts. The focus is on engaging young people as they transition from youth into young adulthood. Key advantages of this book are its embodiment of interdisciplinarity in gathering research across a range of diverse methods, theories, settings, and countries. The volume begins with reviews of key theories and methods in understanding young people within their social networked contexts of generosity, networks, identity, and ethnic heritage. The second section includes chapters attending to education and work as contexts for transitions to adulthood, counseling, meaning, and aesthetics from high school to college and into workplaces. The third section includes chapters studying community engagement and the well-being of young people, including social support, meaning in life, religiosity, spirituality, stress, coping, yoga, and sports. The diverse topics addressed in this edited volume are generosity, philanthropy, voluntary action, social networks, social identity, personhood, ethnic heritage, post colonialism, intersectionality, personality, lived experiences, informal economy, sustainability, pandemic, family support, educational counselors, motivation, Not in Education Employment or Training, NEET, everyday aesthetics, built environment, generativity, community, adult allies, youth engagement, life satisfaction, spiritual identity, religious affiliation, stress, practicing yoga, sexual violence, athletes, sports, climate pressures, to perform resilience, and neurodiversity. Disciplines span economics, business, education, sociology, psychology, medical science, geography, journalism, architecture, engineering, science, and technology, and applied sciences. Methods include quantitative surveys, qualitative in depth interviews, life course biographies, ethnographic case studies, bibliometric analysis, and integrative reviews. Young people are investigated across thirteen countries including the United States, United Kingdom, Yemen, Ghana, Bahrain, Norway, Denmark, Finland, Sweden, Iceland, Canada, Romania, and the Netherlands. **Work, Subjectivity and Learning** Stephen Billett, Tara Fenwick, Margaret Somerville, 2007-06-03 In recent years, efforts to understand learning for and throughout working life have moved away from a focus on workplace training to concerns about learning as a component and outcome of engaging in work and work-related activities and interactions. This shift acknowledges a broader set of workplace factors that shape workers' learning and development. Yet equally, it acknowledges that this learning through engagement is also necessarily shaped by the diverse ways that individuals elect to engage or participate in workplace activities. Central here is the issue of individuals' subjectivity and how this is shaped by but shapes engagement in work and therefore what learning flows from their participation. It is in considering the relations among subjectivity, learning, and work that it is possible to advance both the conceptual and procedural bases for understanding learning through and for working life. Moreover, the focus on relations among subjectivity, work, and learning represents a point of convergence for diverse disciplinary traditions and practices that are provided by the book's contributors. In this way

the contributions represent something of the emerging perspectives that are elaborating the complex relations among subjectivity work and learning and circumstances in which they are played out

The Wiley Blackwell Handbook of the Psychology of Training, Development, and Performance Improvement Kurt Kraiger, Jonathan Passmore, Nuno Rebelo dos Santos, Sigmar Malvezzi, 2020-06-02. This Handbook is sure to become a key resource for any researcher or professional looking for the latest and most innovative thinking from around the world on the full range of topics related to training, development and performance management. Bradford S. Bell, PhD, Cornell University, USA, Editor, Personnel Psychology. I wish I could have accessed this book many years ago. Comprehensive and scholarly, the four sections: training, e-learning, personal and professional development, and performance management, fit well together and address a gap in the literature that has been apparent for some time. The psychological perspective speaks to growing interest in the micro-foundations of strategic success, and the blending together of both formal and informal perspectives on learning in organizations ensures a holistic rather than piecemeal approach to the question of how to build individual knowledge, skills, and competences in organizations. I believe that this book will make a significant impact on its target audience in this critical area.

Helen Shipton, Professor of International Human Resource Management, Nottingham Trent University, UK. The Wiley Blackwell Handbook of the Psychology of Training, Development and Performance Improvement provides up-to-date contemporary information for researchers and professionals by reviewing the latest literature and research in the interconnected fields of training, development and performance appraisal. It brings a psychological perspective to bear on a multidisciplinary field that links to management, human resources and education. Unique to reference works in this area, it maintains a truly global focus on the field with top international contributors looking at research and practice from around the world, including South America, Europe, Canada and Australia, as well as the United States and the United Kingdom. The chapters cover a diverse range of important contemporary topics such as needs analysis, job design, active learning, self-regulation, simulation, approaches, 360-degree feedback and virtual learning environments. Together, they offer researchers and professionals essential information for building a talented organization, a critical and challenging task for organizational success in the twenty-first century.

Development and Learning Lynn S. Liben, 2013-05-13. This volume juxtaposes two different domains of developmental theory: the Piagetian approach and the information processing approach. Articles by experts in both fields discuss how concepts of development and learning, traditionally approached through cognitive developmental theories such as Piaget's, are analyzed from the perspective of a task-analytic information processing approach.

Király, David Buttelmann, 2017-05-25 One of the distinctive features of humans is their unique sociality. Humans live in organized societies that are characterized by a high level of interdependence of group members in various aspects of life ranging from the economic phenomenon of labour division to providing emotional support to others. Under these circumstances, the capacity to track social connections within and between groups has great adaptive value in managing everyday life. We may understand the importance and adaptive value of tracking the scope of culturally shared knowledge if we consider the importance of cultural norms in guiding behaviour. To become a competent member of their cultural group, one must be able to conform to the group's specific behavioural norms and to accumulate culturally shared knowledge. Acquiring this knowledge is essential for successful social interactions. In contrast to current dominant explanatory theories emphasizing that social category formation is simply rooted in humans' need to belong and affiliate with a group, the aim of this e-book is to provide evidence that, in addition to its affiliative role, children form social categories for epistemic purposes. We show that children use specific cues like kinship patterns of resource allocation and consensus to understand group cohesion. Section 1: Once children figured out who is in group and who is out group, they show a significant in-group bias in attention, acting and learning. Section 2: Yet this in-group bias can be attenuated by induced synchronous behavior. Section 3:

Engagement, Motivation, and Students' Achievement Joseph Zajda, 2024-06-21 This book analyses discourses of the use of engagement and motivation in schools globally. It focuses on the overall impact of engagement on teachers' students' motivation, students' well-being and standards. It examines the role of engagement and motivation impacting teachers and students in the classroom and the overall impact of inclusive classroom models to improve their performance in the classroom. The book analyses topics such as cultural identities and engagement, students' personalities and their impact on learning, the role of intelligence in learning, social learning, engagement in collaborative groups and teachers' role in promoting engagement in the classroom. The book contributes in a very scholarly way to a more holistic understanding of the nexus between globalisation, dominant models of motivation and students' engaging learning environments and their academic achievement. *Constructing Educational Achievement* Sivan Phillips, Kelly Y.L. Ku, Shane N.

Phillips, 2014-06-03 International interest focuses on why pupils from East Asia tend to outperform pupils from the West and scholars have proposed a number of possible explanations to account for these international trends. Using Vygotsky's theory (1978) as a conceptual framework to construct school achievement, this book puts forward culturally relevant context for understanding developmental aspects of children's school achievement and their implication to classroom practice and education progress. Converging the two important lines of inquiry, the child factor and the sociocultural factor, this book showcases evidence-based scholarly works from across the globe that shed light on causes of academic achievement in different contexts. The book brings together eminent scholars from early childhood, primary education, secondary and vocational education who expertly capture the vitality of development and processes of specific child factors and their

interaction with their environment that explain their school achievement Foregrounded in the five planes of cultural historical institutional social personal and mental the research explain how children think learn and form the will to perform amidst the changing social and family environment and challenging school and educational environment Learners, Learning and Educational Activity Judith Ireson,2008-03-05 Offers a new and creative approach to the psychology of learning The central idea in the book is that learning in schools and other educational settings is best understood by paying attention to both individual learners and the educational contexts in which learning takes place **The Online Teaching Survival Guide** Judith V.
