**Fragmentation of Policing in American Cities** Hung-En Sung, 2001-11-30 The relationship between police and the communities and citizens they serve has long been a topic of study and controversy Sung provides a place oriented theory of policing to guide strategies for crime control and problem oriented policing He contends that community policing is a product of power relations among communities Sung also explores how police and citizens interact with each other in stratified and residentially segregated communities how services are delivered by police how citizens respond to those charged with protecting them and enforcing the law Illuminating the police neighborhood and advancing a clear hypothesis for explaining and predicting changes in police behavior this both provides a conceptual platform for public policy debate planning and evaluation of police public safety and democratic governance According to Sung place has everything to do with the success of community policing and the attitudes of both police and citizens contribute to the success or failure of police initiatives as well as the level of crime inherent in a community By focusing on the social and political forces that shape the residential patterns of American cities and the organization of police work Sung provides a theoretical framework for considering the relations between police and citizens in different neighborhoods He concludes that current modes of police community relations and crime prevention will improve only if the policies adopted encourage the transformation of marginal communities into communities where citizens feel a shared responsibility for maintaining and peace and order This unique contribution to a growing field of study provides an ecological theory of police citizen relations that begins with the inequality and segregation inherent in many American cities

**Contention and Trust in Cities and States** Michael Hanagan, Chris Tilly, 2011-04-15 The catalyst for this book is the fact that noted sociologist Charles Tilly upon his death in 2008 left one completed chapter of an unfinished manuscript entitled Cities States and Trust Networks examining the relationships between cities and nation states over the sweep of history and in particular the role of trust networks in mediating this relationship Though this was the catalyst the book serves a broader purpose to survey recent frontier work on cities nation states and the relations between the two in historical and contemporary perspective Essays in the book will address four main themes city state relations trust networks and commitment democracy and inequality and the importance of historical legacies in shaping state structures practices and capacities They will be global in scope with research on the United States Latin America Europe Asia and Africa a number of the pieces will be comparative They will also be interdisciplinary including works of geography history political science sociology urban planning The book addresses several confluent needs of readers One is to simply update themes addressed in earlier edited work such as Bringing the State Back In 1985 A second is to bring together current thinking about cities on the one hand and nation states on the other literatures that are often segregated from each other A third is to perform those two purposes in a way that is global in scope

and combines both historical and current analyses to pull together insights from the full range of human experience

**State Power in Ancient China and Rome** Walter Scheidel, 2014-12-01 Two thousand years ago the Qin Han and Roman empires were the largest political entities of the ancient world developing simultaneously yet independently at opposite ends of Eurasia Although their territories constituted only a small percentage of the global land mass these two Eurasian polities controlled up to half of the world population and endured longer than most pre modern imperial states Similarly their eventual collapse occurred during the same time The parallel nature of the Qin Han and Roman empires has rarely been studied comparatively Yet here is a collection of pioneering case studies compiled by Walter Scheidel that sheds new light on the prominent aspects of imperial state formation This essential new volume builds on the foundation of Scheidel's *Rome and China* 2009 and opens up a comparative dialogue among distinguished scholars They provide unique insights into the complexities of imperial rule including the relationship between rulers and elite groups the funding of state agents the determinants of urban development and the rise of bureaucracies By bringing together experts in each civilization *State Power in Ancient China and Rome* provides a unique forum to explore social evolution helping us further understand government and power relations in the ancient world

**Informal Cities** Charlotte Vorms, Brodwyn Fischer, 2025-09-04 An empirically rich reconstruction of how informality became an intrinsic part of urban life across three continents Over a quarter of the world's urban population lives in informal settlements While informality as a concept has been widely debated we still know very little about the phenomenon's urban history or how that history has shaped the evolution of world cities Spotlighting the historical processes that have created and sustained urban informality for more than a century editors Charlotte Vorms and Brodwyn Fischer and this volume's contributors reveal informality as an intrinsic feature of urbanity shaping not only cities across the globe but also deeper processes of state formation socioeconomic stratification and political struggle The volume brings together case studies spanning more than a hundred years drawn from Latin America Brazil Chile Venezuela and Mexico Northern Africa Morocco and Algeria and Latin Europe France Spain and Italy Together they show that informality is neither a contemporary crisis nor a predicament unique to the Global South Topics include the origins of informal settlements and their relationship with law and institutional power grassroots efforts to legitimize shantytown communities mass social movements for rights to the city the role that shantytown removal campaigns played in populist politics fascism and colonialism and the ways that informality perpetuated racial and ethnic inequalities *Informal Cities* is an indispensable guide to the complex and fraught terrain of urban informality in its many historical guises
