Health Disparities in the United States Donald A. Barr, 2019-08-20 Challenging students to think critically about the complex web of social forces that leads to health disparities in the United States The health care system in the United States has been called the best in the world Yet wide disparities persist between social groups and many Americans suffer from poorer health than people in other developed countries In this revised edition of *Health Disparities in the United States* Donald A Barr provides extensive new data about the ways low socioeconomic status race and ethnicity interact to create and perpetuate these health disparities Examining the significance of this gulf for the medical community and society at large Barr offers potential policy and physician based solutions for reducing health inequity in the long term This thoroughly updated edition focuses on a new challenge the United States last experienced more than half a century ago successive years of declining life expectancy Barr addresses the causes of this decline including what are commonly referred to as deaths of despair from opiate overdose or suicide Exploring the growing role geography plays in health disparities Barr asks why people living in rural areas suffer the greatest increases in these deaths He also analyzes recent changes under the Affordable Care Act and considers the literature on how race and ethnicity affect the way health care providers evaluate and treat patients As both a physician and a sociologist Barr is uniquely positioned to offer rigorous medical explanations alongside sociological analysis An essential text for courses in public health health policy and sociology this compelling book is a vital teaching tool and a comprehensive reference for social science and medical professionals

The Social Determinants of Health Kathryn Strother Ratcliff, 2017-08-31 This timely book takes seriously the idea of understanding how our social world and not individual

responsibility or the healthcare system is the primary determinant of our health Kathryn Strother Ratcliff puts into practice the upstream imagery from public health discourse which locates the causes and solutions of health problems within the social environment Each chapter explains how the policies politics and power behind corporate and governmental decisions and actions produce unhealthy circumstances of living such as poverty pollution dangerous working conditions and unhealthy modes of food production and demonstrates that putting profit and politics over people is unhealthy and unsustainable While the book examines how these unhealthy conditions of life generate significant class and ethnic health disparities the focus is on everyone's health Arguing that none of us should be placed in health threatening situations that could have been prevented Ratcliff's provocative analysis uses social justice and human rights lenses to guide the discussion upstream toward possible changes that should produce a healthier world for us all Using data and ideas from many disciplines the book provides a synthesis of invaluable information for activists and policymakers as well as for professionals and students in sociology public health and other fields related to health

the translation of policies and actions to improve health and health equity for all citizens of our society The major health problems of our time cannot be solved by health care alone They cannot be solved by public health alone Collective action is needed and it is needed now

Social Determinants of Health and Health Disparities Paula Braveman, 2023 If you ask most people what influences health almost invariably the first reply will be health care the services that individuals receive from physicians nurses and other medical professionals to treat or prevent illness also called medical care Many people in fact presume the role of health care medical care in affecting health to be so predominant that they often use the terms health and health care interchangeably Many people would probably also cite behaviors such as diet exercise smoking and use of alcohol or drugs as key influences on health While ample evidence supports the importance of both health care and behaviors for health a compelling body of scientific knowledge now calls for a wider and deeper set of explanations for why some of us experience good health and others do not This body of knowledge challenges us to think beyond common assumptions about the key causes of health and illness to ask not only What influences health but also What factors shape those influences i e What influences the influences This knowledge tells us that to achieve real and lasting improvements in health we must shift the focus to identifying and addressing the root or fundamental causes Link and Phelan 1995 the underlying factors that set in motion other factors that may be more easily observed but play a less fundamental role in shaping health Ethical concerns furthermore require us to focus not only on a

population's overall or average health but also on health equity whether everyone has a fair and just opportunity to be as healthy as possible which includes whether the resources opportunities and conditions required for good health are distributed equitably within the population

Social Determinants of Health, 1999 *Social Determinants of Health* Laurie W. Hinnant, Sara Hairgrove, Heather L. Kane, Jason Williams, Jessica Duncan Cance, 2022 In recent years the number of publicly available tools and indices assessing social determinants of health SDOH has grown exponentially While many of these indices have been developed to assist researchers and practitioners with identifying vulnerable communities it is difficult to determine the most appropriate measure index or combination of indices to use given the research question of interest This paper presents an overview of the most commonly included indices highlights commonalities and identifies some differences in what they measure We also discuss challenges with using these measures including the use of state level data to examine local level issues and how the use of atheoretical indices challenges the application of SDOH measurement Findings are intended to provide researchers and practitioners with information about SDOH data available through these common indices to inform how they are applied based on the needs of their work

Integrating Social Care into the Delivery of Health Care National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Care Services, Committee on Integrating Social Needs Care into the Delivery of Health Care to Improve the Nation's Health, 2019-12-30 Integrating Social Care into the Delivery of Health Care Moving Upstream to Improve the Nation's Health was released in September 2019 before the World Health Organization declared COVID 19 a global pandemic in March 2020 Improving social conditions remains critical to improving health outcomes and integrating social care into health care delivery is more relevant than ever in the context of the pandemic and increased strains placed on the U S health care system The report and its related products ultimately aim to help improve health and health equity during COVID 19 and beyond The consistent and compelling evidence on how social determinants shape health has led to a growing recognition throughout the health care sector that improving health and health equity is likely to depend at least in part on mitigating adverse social determinants This recognition has been bolstered by a shift in the health care sector towards value based payment which incentivizes improved health outcomes for persons and populations rather than service delivery alone The combined result of these changes has been a growing emphasis on health care systems addressing patients social risk factors and social needs with the aim of improving health outcomes This may involve health care systems linking individual patients with government and community social services but important questions need to be answered about when and how health care systems should integrate social care into their practices and what kinds of infrastructure are required to facilitate such activities Integrating Social Care into the Delivery of Health Care Moving Upstream to Improve the Nation's Health examines the potential for integrating services addressing social needs and the social determinants of health into the delivery of health care to achieve better health outcomes This report assesses approaches to social care integration currently being taken by health care providers and systems and new or emerging approaches and opportunities current roles in such integration by different disciplines and organizations and new or emerging roles and types of providers and current and emerging efforts to design health care systems to improve the nation's health and reduce health inequities
