provision of health care for all Jewish citizens regardless of their age income or ability to pay However the system has shifted

in recent decades becoming increasingly privatized and market based In a familiar paradox the wealthy the young and the healthy have relatively easy access to health care and the poor the old and the very sick confront increasing obstacles to medical treatment In *Circles of Exclusion* Dani Filc both a physician and a human rights activist forcefully argues that in present day Israel equal access to health care is constantly and systematically thwarted by a regime that does not extend an equal level of commitment to the well being of all residents of Israel whether Jewish Israeli Palestinians migrant workers or Palestinians in the Occupied Territories Filc explores how Israel s adoption of a neoliberal model has pushed the system in a direction that gives priority to the strongest and richest individuals and groups over the needs of society as a whole and to profit and competition over care Filc pays special attention to the repercussions of policies that define citizenship in a way that has serious consequences for the health of groups of Palestinians who are Israeli citizens particularly the Bedouins in the unrecognized villages and to the ways in which this structure of citizenship affects the health of migrant workers The health care situation is even more dire in the Occupied Territories where the Occupation especially in the last two decades has negatively affected access to medical care and the health of Palestinians Filc concludes his book with a discussion of how human rights public health and economic imperatives can be combined to produce a truly equal health care system that provides high quality services to all Israelis
