The Social Dynamics of Pronominal Systems Paul Bouissac, 2019-07-15 Personal pronouns have a special status in languages As indexical tools they are the means by which languages and persons intimately interface with each other within a particular social structure Pronouns involve more than mere grammatical functions in live communication acts They variously signal the gender of speakers as parts of utterances or in their anaphoric roles They also prominently indicate with a range of degrees the kind of social relationships that hold between speakers from intimacy to indifference from dominance to submission and from solidarity to hostility Languages greatly vary in the number of pronouns and other address terms they offer to their users with a distinct range of social values Children learn their relative position in their family and in their society through the correct use of pronouns When languages come into contact because of population migrations or through the process of translation pronouns are the most sensitive zone of tension both psychologically and politically This volume endeavours to probe the comparative pragmatics of pronominal systems as social processes in a representative set from different language families and cultural areas

Coordination: Neural, Behavioral and Social Dynamics Armin Fuchs, Viktor K. Jirsa, 2007-12-11 One of the most striking features of Coordination Dynamics is its interdisciplinary character The problems we are trying to solve in this field range from behavioral phenomena of interlimb coordination and coordination between stimuli and movements perception action tasks through neural activation patterns that can be observed during these tasks to clinical applications and social behavior It is not surprising that close collaboration among scientists from different fields as psychology kinesiology neurology and even physics are imperative to deal with the enormous difficulties we are facing when

we try to understand a system as complex as the human brain The chapters in this volume are not simply write ups of the lectures given by the experts at the meeting but are written in a way that they give sufficient introductory information to be comprehensible and useful for all interested scientists and students **Social Dynamics in Swiss Society** Robin

Doosselaere, 2009-04-27 Commercial Agreements and Social Dynamics in Medieval Genoa is an empirical study of medieval long distance trade agreements and the surrounding social dynamics that transformed the feudal organization of men of arms into the world of Renaissance merchants Drawing on 20 000 notarial records the book traces the commercial partnerships of thousands of people in Genoa from 1150 to 1435 and reports social activity on a scale that is unprecedented

for such an early period of history In combining a detailed historical reading with network modeling to analyze the change in the long distance trade relationships Quentin van Doosselaere challenges the prevailing western centric view of development He demonstrates that the history of the three main medieval economic frameworks that brought about European capitalism equity credit and insurance was not driven by strategic merchants economic optimizations but rather by a change in partners selections that reflected the dynamic of the social structure as a whole Integrations of Technology Utilization and Social Dynamics in Organizations Medlin, B.
