Spaces and Places in Central and Eastern Europe Gyula Horváth,2014-08-21 Across Europe there is a rapidly changing context for undertaking regional development In the 20th century development of the former planned economies Bulgaria Czech Republic Hungary Poland Romania and Slovakia was defined by these countries differences rather than their common ideological roots These disparities altered over time and were marked by changing social structures However the ranking of regions has remained the same as core areas have strengthened their positions while the structural obstacles to the modernisation of peripheral areas have remained due to a lack of coherent regional policy This book examines the specific regional development paths of Central and Eastern European countries and evaluates the effects of the determining factors of this process Through analysis of the system of objectives instruments and institutions used in different eras and case studies of Hungary East Germany and Germany development models are established and compared with Western European patterns The book summarises the experiences of Central and Eastern European regional cooperation and examines the basic nature of the cohesion problems of the Carpathian Basin trans national macro region It confirms by comparative historical analyses that the transformation was indeed unique This book will make a welcome addition to the literature for students and academics interested in the broader picture of Central and Eastern European politics future integration within the European Union and the history of regional development processes

**The Political Economy of**

**Capital Cities** Heike Mayer,Fritz Sager,David Kaufmann,Martin Warland,2017-09-11 Capital cities that are not the dominant economic centers of their nations so called secondary capital cities SCCs tend to be overlooked in the fields of economic geography and political science Yet capital cities play an important role in shaping the political economic social and cultural identity of a nation As the seat of power and decision making capital cities represent a nation s identity not only through their symbolic architecture but also through their economies and through the ways in which they position themselves in national urban networks The Political Economy of Capital Cities aims to address this gap by presenting the dynamics that influence policy and economic development in four in depth case studies examining the SCCs of Bern Ottawa The Hague and Washington D C In contrast to traditional accounts of capital cities this book conceptualizes the modern national capital as an innovation driven economy influenced by national local and regional actors Nationally overarching trends in the direction of outsourcing and tertiarization of the public sector influence the fate of capital cities Regional policymakers in all four of the highlighted cities leverage the presence of national government agencies and stimulate the economy by way of various locational policy strategies While accounting for their secondary status this book illustrates how capital city actors such as firms national regional and local governments policymakers and planning practitioners are keenly aware of the unique status of their city The conclusion provides practical recommendations for policymakers in SCCs and highlights ways in which they can help to promote economic development

Urban Sores Hans Skifter Andersen,2019-01-15 This title was first published in 2003 Most European cities have experienced problems in certain neighbourhoods that are termed deprived or excluded Traditionally these were found in the oldest urban areas with lowest quality housing but since the 1980s such areas have emerged in housing estates built around the cities edges These neighbourhoods are marked by visible physical and social problems that disfigure the otherwise pleasant urban landscape and can be seen as urban sores This engaging and thought provoking book provides a deeper understanding of why urban decay and deprived neighbourhoods appear in certain parts of cities as well as how they affect residents and cities in general Drawing on in depth empirical research from Denmark it compares this with other studies from Europe and the United States The author combines theories and methodologies from the fields of geography on segregation economics on processes of urban decay and social research on social exclusion and deprived neighbourhoods to provide original illuminating and invaluable insights

*The Urban Design Reader* Michael Larice, Elizabeth Macdonald, 2013-05-07

The second edition of *The Urban Design Reader* draws together the very best of classic and contemporary writings to illuminate and expand the theory and practice of urban design. Nearly 50 generous selections include seminal contributions from Howard Le Corbusier, Lynch and Jacobs to more recent writings by Waldheim, Koolhaas and Sorkin. Following the widespread success of the first edition of *The Urban Design Reader* this updated edition continues to provide the most important historical material of the urban design field but also introduces new topics and selections that address the myriad challenges facing designers today. The six part structure of the second edition guides the reader through the history, theory and practice of urban design. The reader is initially introduced to those classic writings that provide the historical precedents for city making into the twentieth century. Part Two introduces the voices and ideas that were instrumental in establishing the foundations of the urban design field from the late 1950s up to the mid 1990s. These authors present a critical reading of the design professions and offer an alternative urban design agenda focused on vital and lively places. The authors in Part Three provide a range of urban design rationales and strategies for reinforcing local physical identity and the creation of memorable places. These selections are largely describing the outcomes of mid century urban design and voicing concerns over the placeless quality of contemporary urbanism. The fourth part of the Reader explores key issues in urban design and development. Ideas about sprawl, density, community health, public space and everyday life are the primary focus here. Several new selections in this part of the book also highlight important international development trends in the Middle East and China. Part Five presents environmental challenges faced by the built environment professions today including recent material on landscape urbanism, sustainability and urban resiliency. The final part examines professional practice and current debates in the field where urban designers work: what they do, their roles, their fields of knowledge and their educational development. The section concludes with several position pieces and debates on the future of urban design practice. This book provides an essential resource for students and practitioners of urban design, drawing together important but widely dispersed writings. Part and section introductions are provided to assist readers in understanding the context of the material, summary messages, impacts of the writing and how they fit into the larger picture of the urban design field.
