Social Moral Development Emerging Evid:

The Oxford Handbook of Moral Development Lene Arnett Jensen, 2020-01-24 The nature of people's moral lives the similarities and differences in the moral concepts of individuals and groups and how these concepts emerge in the course of human development are topics of perennial interest In recent years the field of moral development has turned from a focus on a limited set of theories to a refreshingly vast array of research questions and methods This handbook offers a comprehensive international and up to date review of this research on moral development Drawing together the work of over 90 authors hailing from diverse disciplines such as anthropology education human development psychology and sociology the handbook reflects the dynamic nature of the field Across more than 40 chapters this handbook opens the door to a broad view of moral motives and behaviors ontogeny and developmental pathways and contexts that children adolescents and adults experience with respect to morality It offers a comprehensive and timely tour of the field of moral development

Human Morality and Sociality Henrik Hogh-Olesen, Christophe Boesch, Leda Cosmides, 2009-12-09 Human nature is enigmatic Are we cruel selfish creatures or good merciful Samaritans This book takes you on a journey into the complexities of human mind and kind from altruism sharing and large scale cooperation to cheating distrust and warfare What are the building blocks of morality and sociality Featuring contributions from leading researchers such as Christophe Boesch Leda Cosmides and John Tooby Azar Gat Dennis Krebs Ara Norenzayan and Frans B M de Waal this fascinating interdisciplinary reader draws on evolutionary and comparative perspectives and is essential reading for any students interested in the unique characteristics that define humanity and society

Resilience in Children, Families, and Communities Ray D. Peters, Bonnie Leadbeater, Robert J. McMahon, 2006-11-22 Despite the numerous benefits derived from major technological and medical innovations of the past century we continue to live in a world rife with significant social problems and challenges Children continue to be born into lives of poverty others must confront daily their parent's mental illness or substance abuse still others live amid chronic family discord or child abuse For some of these children life's difficulties become overwhelming Their enduring trauma can lead to a downward spiral until their behavioral and emotional problems become lifelong barriers to success and wellbeing Almost no one today would deny that the world is sometimes an inhospitable even dangerous place for our youth Yet most children even those living in high risk environments appear to persevere Some even flourish And this begs the question why in the face of such great odds do these children become survivors rather than casualties of their environments For many decades scholars have pursued answers to the mysteries of resilience Now having culled several decades of research findings the editors of this volume offer an in depth leading edge description and analysis of Resilience in Children Families and Communities Linking Context to Practice and Policy The book is divided into three readily accessible sections that both define the scope and limits of resilience as well as provide hands on programs that families neighborhoods and communities can implement In addition several chapters provide real life intervention strategies and

social policies that can be readily put into practice The goal to enable children to develop more effective problem solving skills to help each child to improve his or her self image and to define ways in which role models can affect positive outcomes throughout each child's lifetime For researchers, clinicians and students *Resilience in Children: Families and Communities Linking Context to Practice and Policy* is an essential addition to their library It provides practical information to inform greater success in the effort to encourage resilience in all children and to achieve positive youth development ***Moral Development: New research in moral development*** Bill Puka, 1994 First published in 1994 Routledge is an imprint of Taylor Francis, an informa company ***Neurobiology of Human Values*** Jean-Pierre P. Changeux, Antonio Damasio, Wolf Singer, 2006-03-30 Man has been pondering for centuries over the basis of his own ethical and aesthetic values Until recent times such issues were primarily fed by the thinking of philosophers, moralists and theologians or by the findings of historians or sociologists relating to universality or variations in these values within various populations Science has avoided this field of investigation within the confines of philosophy Beyond the temptation to stay away from the field of knowledge, science may also have felt itself unconcerned by the study of human values for a simple heuristic reason, namely the lack of tools allowing objective study For the same reason, researchers tended to avoid the study of feelings or consciousness until over the past two decades this became a focus of interest for many neuroscientists It is apparent that many questions linked to research in the field of neuroscience are now arising The hope is that this book will help to formulate them more clearly rather than skirting them The authors do not wish to launch a new moral philosophy but simply to gather objective knowledge for reflection ***The Child Surveillance Handbook*** David Hall, Jonathan Williams, David Elliman, 2018-05-08 Previous editions of *The Child Surveillance Handbook* have built its reputation as the essential reference guide for GPs, health visitors and other members of the healthcare team in primary care Now thoroughly revised and updated, this new edition remains the authoritative guide to child surveillance, promoting the health, welfare and life chances of children ***New Frontiers in Mirror Neurons Research*** Pier Francesco Ferrari, Giacomo Rizzolatti, 2015-10-08 The discovery of mirror neurons caused a revolution in neuroscience and psychology Nevertheless, because of their profound impact within life sciences, mirror neurons are still the subject of numerous debates concerning their origins and their functions With more than 20 years of research in this area, it is timely to synthesise the expanding literature on this topic *New Frontiers in Mirror Neurons* provides a comprehensive overview of the latest advances in mirror neurons research, accessible both to experts and to non-experts In the book, leading scholars draw on the latest research to examine methodological approaches, theoretical implications and the latest findings on mirror neurons research A broad range of topics are covered within the book: basic findings and new concepts in action perception theory, functional properties and evolution, development and clinical implications In particular, the last two sections of the book outline the importance of the plasticity and development of the mirror neuron system This knowledge will be key in future research for helping us understand possible disorders associated

with impairments in the mirror neurons system as well as in helping us design new therapeutic tools for interventions within the field of neurodevelopmental disorders and in neurorehabilitation New Frontiers in Mirror Neurons is an exciting new work for neuroscientists psychologists and philosophers of mind **Self-Regulation in Adolescence** Gabriele

Oettingen, Peter M. Gollwitzer, 2015-09-25 This interdisciplinary volume examines the challenges adolescents face and the self regulation tools that most effectively ease the transition to adulthood **Developmental Psychology** Penney

Upton, 2011-05-12 Covering core topics such as the development of attachment social relations cognitive and language development and social and cultural contexts of development this introductory text addresses the core knowledge domain of developmental psychology It provides concise and focused coverage of the central concepts research and debates while developing students higher level skills Key chapters cover development across the lifespan including the prenatal period infancy childhood adolescence and adulthood while activities help readers build the underpinning generic critical thinking and transferable skills they need to become independent learners and to meet the requirements of their programme of study

Development Through The Lifespan Laura E. Relations in Childhood Through Adulthood Sheri R. Levy, Melanie Killen, 2008-02-15 This edited volume captures an exciting new trend in research on intergroup attitudes and relations which concerns how individuals make judgments and interact with individuals from different group categories broadly defined in terms of gender race age culture religion sexual orientation and body type This new approach is an integrative perspective one which draws on theory and research in the areas of developmental and social psychology Throughout human history intergroup conflict has often served as the basis for societal conflict strife and tension Over the past several decades individual and group mobility has enabled individuals to interact with a wider range of people from different backgrounds than ever before On the one hand this level of societal heterogeneity contributes to intergroup conflict On the other hand the experience of such heterogeneity has also reduced stereotypes and increased an understanding of others perspectives and experiences Where does it begin When do children acquire stereotypes about the other What are the sources of influence and how does change come about To provide a deeper understanding of the origins stability and reduction of intergroup conflict scholars in this volume report on current cutting edge theory and new research findings Progress in the area of intergroup attitudes relies on continued advances in both the understanding of the origins and the trajectory of intergroup conflict and harmony as historically studied by developmental psychologists and the understanding of contexts and conditions that contribute to positive and negative intergroup attitudes and relations as historically studied by social psychologists Recent social and developmental psychology research clarifies the multifaceted nature of prejudice and the need for an interdisciplinary approach to addressing prejudice The recent

blossoming of research on the integration of developmental and social psychology represented in this volume will appeal to scholars and students in the areas of developmental psychology social psychology cognitive psychology education social neuroscience law business and political science Primates and Philosophers Frans de Waal, 2016-03-22 Can virtuous behavior be explained by nature and not by human rational choice It's the animal in us we often hear when we've been bad But why not when we're good Primates and Philosophers tackles this question by exploring the biological foundations of one of humanity's most valued traits morality In this provocative book renowned primatologist Frans de Waal argues that modern day evolutionary biology takes far too dim a view of the natural world emphasizing our selfish genes and reinforcing our habit of labeling ethical behavior as humane and the less civilized as animalistic Seeking the origin of human morality not in evolution but in human culture science insists that we are moral by choice not by nature Citing remarkable evidence based on his extensive research of primate behavior de Waal attacks Veneer Theory which posits morality as a thin overlay on an otherwise nasty nature He explains how we evolved from a long line of animals that care for the weak and build cooperation with reciprocal transactions Drawing on Darwin recent scientific advances and his extensive research of primate behavior de Waal demonstrates a strong continuity between human and animal behavior He probes issues such as anthropomorphism and human responsibilities toward animals His compelling account of how human morality evolved out of mammalian society will fascinate anyone who has ever wondered about the origins and reach of human goodness Based on the Tanner Lectures de Waal delivered at Princeton University's Center for Human Values in 2004 Primates and Philosophers includes responses by the philosophers Peter Singer Christine M Korsgaard and Philip Kitcher and the science writer Robert Wright They press de Waal to clarify the differences between humans and other animals yielding a lively debate that will fascinate all those who wonder about the origins and reach of human goodness *International Perspectives on Children and Mental Health* Hiram E. Fitzgerald, Kaija Puura M.D., Mark Tomlinson, Campbell Paul, 2011-07-06 This unprecedented set examines the most prominent factors that harm or support healthy development in children outside the United States from abuse and economics to social injustice and poor public policy In International Perspectives on Children and Mental Health expert contributors from around the world examine the forces affecting the psychological well being of children in regions worldwide They consider such factors as family conditions and economic status including single parents poverty disease war child abuse substance abuse in the home and a loss of community stability And they look at political religious national and global matters including racism and class inequality Since education is key to children's success the essays consider these factors largely in the context of how they affect educational readiness and academic adjustment Volume 1 of the set considers development and context while volume 2 focuses on prevention and treatment Specific examples enable readers to better understand the often horrific challenges to child development and mental health across nations But the work is not limited to exploring problems It also looks at various programs and actions that mitigate risks helping children to be mentally healthy despite the

odds **The Encyclopedia of Theoretical Criminology** ,2014-04-07 The Encyclopedia of Theoretical Criminology in zwei Bänden ist zweifelsohne das aktuellste Referenzwerk der theoretischen Kriminologie. Fachlich geprägte Beiträge internationaler Experten machen den Leser mit wegweisenden Theorien, Konzepten und Schlüsselfiguren vertraut. Das Nachschlagewerk präsentiert klassische und zeitgenössische Themen zu den wichtigen Straftatbeständen, Zusammenhängen fachspezifische Soziologie, Biologie und Psychologie und fachübergreifende Erklärungen zu Kriminalität, Kriminalitätsrate und Fragestellungen aus der Rechtssoziologie.

Improving Services for Young Children Angela Anning, Mog Ball, 2008-06-24 This book is a welcome addition to the field of Early Childhood studies and would appeal to both students and professionals working with children and families in any area. The format of the book is clear and the style of writing is very readable and engaging.

ESCalate In this excellent book two of the principal investigators from the huge national evaluation of Sure Start bring together key findings of what works as the local programmes are turned into children's centres and rolled out across England. Chapters on all aspects of Sure Start and children's centres reflect the services themselves in providing a valuable one-stop shop for those who want to understand how to work effectively with young children and their parents.

Dame Gillian Pugh Visiting Professor Institute of Education University of London This book sets out important insights gained from the National Evaluation of Sure Start (NESS). The contributors present the effects of Sure Start from a range of perspectives and explore the successful and problematic aspects of the programme with its vision of improving the life chances of the most disadvantaged families. They also map and evaluate the progression of the programme into Children's Centres and Extended Schools. Each contributor provides an overview of their specialist area before outlining the findings from the study and its implications for developing Children's Services. These areas include Ethnicity, Childcare, Parents, Special Needs, Maternity, Services, Domestic Violence, Buildings and Spaces. The chapters set out the practical lessons learned from these areas for practitioners, professionals and policy makers in the field of children's services as well as those involved in the setting up of Children's Centres and reform of multi-agency children's services. The book will be relevant to undergraduate students on Childhood Studies Degrees, Early Years Professional Foundation Degrees, students, postgraduate students on National Qualification for Managers of Children's Centres and Masters related to Integrated Children's Services. It is also for those with an interest in anti-poverty intervention programmes for young children and their families around the world.

Assessment of Trauma in Youths Kathleen Nader, 2016-05-06 Assessment of Trauma in Youths Understanding issues of age complexity and associated variables is a collection of articles by well-known specialists in the field of childhood trauma. The articles describe developmental issues in addition to others that are important to the assessment of trauma exposed youth to the ongoing refinement of trauma-related diagnoses for children and to understanding PTSD and more complicated reactions to trauma for young people. The book explores trauma in very young to middle childhood, aged children, trauma in adolescents, childhood complicated trauma and childhood complicated grief. It considers PTSD and Reactive Attachment

Disorder as well as discussing disorders that are under continued study such as Developmental Trauma Disorder Prolonged Grief Disorder and Traumatic Grief In the second half of the book chapters look at the associated features of childhood traumatic response such as genetics and personality cortisol poly victimization and guilt and shame Variables such as cortisol reactivity and guilt shame may influence or follow traumas in children This book was originally published as a special issue of the Journal of Child and Adolescent Trauma

Child Development Michael Little, 2017-03-02 This book provides a good foundation for understanding influences on children's health and development The volume brings together in a single reference source the world's leading thinkers on children's health and development It sets out the basic concepts that underpin the study of child development and response to impairments to development including attachment changes in brain structure and resilience The book explores the idea of life course development explaining how experiences at each stage in a person's life shape his or her future It goes on to example the relative contribution of societal neighbourhood school family and individual influences to child well being This includes a look at the way these forces interact such as when genes shape environments and vice versa The book summarises the evidence on the incidence and consequences of impairments to children's health and development covering both the majority of typical children and the minority who experience significant problems

Crime and Schizophrenia Adrian Raine, 2006 While the link between crime and schizophrenia has been noted for almost a century it is only recently that research has provided convincing broad based evidence for this association This advance in knowledge also brings with it the troublesome danger that schizophrenia patients could be doubly stigmatised in society they suffer from a serious mental illness and furthermore they are potentially dangerous This understandable fear has both lead to significant resistance in accepting that the crime schizophrenia relationship truly exists While well meaning this resistance has resulted in three unfortunate consequences First by not recognising that the relationship exists the comorbid antisocial and violent behaviour of schizophrenia patients has gone unchecked and consequently the stigma associated with this comorbidity goes on unabated Second research in this area has become almost fixated on the simple establishment of a link between the two conditions and has not moved on to more important research that could help develop new perspectives on the nature of the crime schizophrenia relationship in a way which will significantly benefit our understanding and treatment of both conditions Frustratingly we actually know surprisingly little about the crime schizophrenia relationship The third and more indirect consequence is that the issue of schizophrenia spectrum disorder in antisocial criminal populations is almost entirely ignored Such individuals literally fall between the cracks in both the mental health system and the criminal justice system For these reasons it is argued that ignoring or denying the crime schizophrenia relationship ultimately does more harm than good The main goal of this book is to stimulate a new generation of research on the crime schizophrenia relationship which could benefit not just individuals with these two conditions but also society in general Going beyond the fundamental issue of whether there is a relationship between crime and schizophrenia contributors to this book both outline

risk factors for crime and schizophrenia and also develop hypotheses on which factors may give rise to both conditions and hence in part explain the comorbidity issue Furthermore contributors go on to outlining intervention and prevention programs for not just crime and schizophrenia but also for both conditions simultaneously From the Preface On Being Moved Stein Bråten,2007-01-01 In this collective volume the origins neurosocial support and therapeutic implications of pre verbal intersubjectivity are examined with a focus on implications of the discovery of mirror neurons Entailing a paradigmatic revolution in the intersection of developmental social and neural sciences two radical turnabouts are entailed First no longer can be upheld as valid Cartesian and Leibnizian assumptions about monadic subjects with disembodied minds without windows to each other except as mediated by culture Supported by a mirror system specified in this volume by some of the discoverers modes of participant perception have now been identified which entail embodied simulation and co movements with others in felt immediacy Second no longer can be retained the Piagetian attribution of infant egocentricity Pioneers who have broken new research grounds in the study of newborns protoconversation and early speech perception document in the present volume infant capacity for interpersonal communion empathic identification and learning by altercentric participation Pertinent new findings and results are presented on these topics i Origins and multiple layers of intersubjectivity and empathy ii Neurosocial support of pre verbal intersubjectivity participant perception and simulation of mind iii From preverbal sharing and early speech perception to meaning acquisition and verbal intersubjectivity iv New windows on other centred movements and moments of meeting in therapy and intervention Series B **The Development and Structure of Conscience** Willem Koops,Daniel Brugman,Tamara J.
