Bishirjian, 1982 Recognition and Ambivalence Heikki Ikäheimo, Kristina Lepold, Titus Stahl, 2021-07-06 Recognition is one of the most debated concepts in contemporary social and political thought Its proponents such as Axel Honneth hold that to be recognized by others is a basic human need that is central to forming an identity and the denial of recognition deprives individuals and communities of something essential for their flourishing Yet critics including Judith Butler have questioned whether recognition is implicated in structures of domination arguing that the desire to be recognized can motivate individuals to accept their assigned place in the social order by conforming to oppressive norms or obeying repressive institutions Is there a way to break this impasse Recognition and Ambivalence brings together leading scholars in social and political philosophy to develop new perspectives on recognition and its role in social life It begins with a debate between Honneth and Butler the first sustained engagement between these two major thinkers on this subject Contributions from both proponents and critics of theories of recognition further reflect upon and clarify the problems and challenges involved in theorizing the concept and its normative desirability Together they explore different routes toward a critical theory of recognition departing from wholly positive or negative views to ask whether it is an essentially ambivalent phenomenon Featuring original systematic work in the philosophy of recognition this book also provides a useful orientation to the key debates on this important topic *APAIS 1994: Australian public affairs information service* , **Liberalism, Nationalism, Citizenship** Ronald Beiner, 2003 Liberals believe that the purpose of politics is to guarantee that individuals

do not face unfair impediments in pursuing the lives they choose for themselves Nationalists believe that the purpose of politics is to ensure that a people's sense of authentic nationhood wins full expression in powers of collective sovereignty or self rule Both of these forms of political commitment yield world transforming political philosophies but do either of these visions do adequate justice to a philosophically robust ideal of shared citizenship and civic membership In Liberalism Nationalism Citizenship Ronald Beiner engages critically with a wide range of important political thinkers and current debates in light of the Aristotelean idea that shared citizenship is an essential human calling Virtually every aspect of contemporary political experience globalization international migration secessionist movements the politics of multiculturalism pose urgent challenges to modern citizenship Beiner's work on the philosophy of citizenship is essential reading not just for students of politics and political philosophy but for all those who rightly sense that these kinds of recent challenges

Public Reason and Courts Silje A. Langvatn, Mattias Kumm, Wojciech Sadurski, 2020-06-04 Public Reason and Courts is an interdisciplinary study of public reason and courts with contributions from leading scholars in legal theory political philosophy and political science The book's chapters demonstrate the breadth of ways in which public reason and public justification is currently seen as relevant for adjudicative reasoning and review practices and includes critical assessments of different ways that the idea of public reason has been applied to courts It shows that public reason is not just an abstract theoretical concept used by political philosophers but an idea that spurs new perspectives and normative frameworks also for legal scholars and judges In particular the book demonstrates the potential and the limitations of the idea of public reason as a source of legitimacy for courts in a context where many courts face political backlashes and crisis of trust
