Science Research P. Ratcliffe, 2001-06-18 This book addresses some of the key questions facing contemporary social scientists What is the point of our research Who undertakes it Does it have any impact on the social world it attempts to characterize if so what It does so by focusing on international research on identity and inequality grounded in race and ethnic difference The contributors to the volume ask searching questions about the politics of research funding the empowerment of minorities and the prospects for meaningful change *Beyond Evidence Based Policy in Public Health* K. Smith, 2013-10-07 This book explores the complex relationship between public health research and policy employing tobacco control and health inequalities in the UK as contrasting case studies It argues that focusing on research informed ideas usefully draws attention to the centrality of values politics and advocacy for public health debates *Poor Relation* Stuart Macintyre, 2010-07-01 What are the social sciences What do they do How are they practised in Australia The Poor Relation examines the place of the social sciences from economics and psychology to history law and philosophy in the teaching and research conducted by Australian universities Across sixty years The Poor Relation charts the changing circumstances of the social sciences and measures their contribution to public policy In doing so it also relates the arrangements made to support them and explains why they are so persistently treated as the poor relation of science and technology **Doing Research**

on Sensitive Topics Raymond M. Lee, 1993-03-16 This book is a comprehensive guide to the methodological ethical and practical issues involved in undertaking research on sensitive topics Raymond M Lee explores the reasons why social research may be politically or socially contentious its relation to issues of social or political power its capacity to encroach on people's lives and its potentially problematic nature for the researcher Issues examined include the choice of methodologies for sensitive research problems of estimating the size of hidden populations questions of sampling surveying and interviewing and sensitivity in access and the handling of data The book also discusses the political and ethical issues at

stake in the relations between the researcher and the researched and in the disclosure dissemination and publication of research *Evidence-Based Policymaking* Karen Bogenschneider, Thomas Corbett, 2011-01-11 This book is for those who believe that good government should be based on hard evidence and that research and policy ought to go hand in hand Unfortunately no such bond exists Rather there is a substantial gap some say chasm between the production of knowledge and its utilization Despite much contrary evidence the authors propose there is a way of doing public policy in a more reflective manner and that a hunger for evidence and objectivity does exist The book is pragmatic drawing on advice from some of the best and brightest informants from both the research and policy communities In their own voices researchers provide incisive analysis about how to bridge the research policy divide and policymakers provide insights about why they use research what kind is most useful where they seek it and how they screen its quality The book breaks through stereotypes about what policymakers are like and provides an insiders view of how the policy process really works Readers will learn what knowledge skills approaches and attitudes are needed to take research findings from the laboratory to lawmaking bodies and how to evaluate one s success in doing so The book s balance between theory and practice will appeal to students in graduate and upper level undergraduate courses in family studies and family policy educational policy law political science public administration public health social work and sociology This book will also be of interest to researchers who want to bring their ideas into policy debate and to those who work with policymakers to advance an evidence based policy agenda *America's Social Health* Marque-Luisa Miringoff, Sandra Opdycke, 2014-12-18 Calling for a fundamental change in the focus of public policy in America this book paints a vivid portrait of the nation s social health Miringoff and Opdycke clearly show that social progress has stalled and the country s energies need to be directed at critical domestic issues in the years ahead The authors propose a new agenda for monitoring America s social well being built around sixteen key indicators of American life such as infant mortality teenage suicide health insurance coverage and affordable housing They maintain that social conditions like economic conditions must be constantly monitored in order to have a clear sense of how we are doing as a society The book builds on the work of the Institute for Innovation in Social Policy and argues that there needs to be a greater visibility for social issues and a closer link between social reporting and public action to better address the nation s social problems It considers the critical role of the media in advancing public understanding of social issues and examines important advances in the community indicators movement and international social reporting Eye opening and compelling the book is a provocative centerpiece for policy debates and national initiatives on today s crucial domestic concerns Michael Young, Social Science, and the British Left, 1945-1970 Lise Butler, 2020-09-02 In post war Britain left wing policy maker and sociologist Michael Young played a major role in shaping British intellectual political and cultural life using his study of the social sciences to inform his political thought In the mid twentieth century the social sciences significantly expanded and played a major role in shaping British intellectual political and cultural life Central to

this intellectual shift was the left wing policy maker and sociologist Michael Young As a Labour Party policy maker in the 1940s Young was a key architect of the Party's 1945 election manifesto Let Us Face the Future He became a sociologist in the 1950s publishing a classic study of the East London working class Family and Kinship in East London with Peter Willmott in 1957 which he followed up with a dystopian satire The Rise of the Meritocracy about a future society in which social status was determined entirely by intelligence Young was also a prolific social innovator founding or inspiring dozens of organisations including the Institute of Community Studies the Consumers Association Which magazine the Social Science Research Council and the Open University Moving between politics social science and activism Young believed that disciplines like sociology psychology and anthropology could help policy makers and politicians understand human nature which in turn could help them to build better political and social institutions This book examines the relationship between social science and public policy in left wing politics between the end of the Second World War and the end of the first Wilson government through the figure of Michael Young Drawing on Young's prolific writings and his intellectual and political networks it argues that he and other social scientists and policy makers drew on contemporary ideas from the social sciences to challenge key Labour values like full employment and nationalisation and to argue that the Labour Party should put more emphasis on relationships family and community Showing that the social sciences were embedded in the project of social democratic governance in post war Britain it argues that historians and scholars should take their role in British politics and political thought seriously

The Political Economy of Expertise Kevin Esterling, 2009-12-10 The Political Economy of Expertise is a carefully argued examination of how legislatures use expert research and testimony Kevin Esterling demonstrates that interest groups can actually help the legislative process by encouraging Congress to assess research and implement well informed policies More than mere touts for the interests of Washington insiders these groups encourage Congress to enact policies that are likely to succeed while avoiding those that have too great of a risk of failure The surprising result is greater legislative efficiency The Political Economy of Expertise illustrates that this system actually favors effective and informed decision making thereby increasing the likelihood that new policies will benefit the American public Kevin M Esterling is Assistant Professor at the University of California Riverside

Managing the Global Commons Decision Making and Conflict Resolution in Response to Climate Change Steve Rayner, 1990 The Budget-Maximizing Bureaucrat Andre Blais, Stephane Dion, 1991-11-15 Thirteen scholars reexamine one of the most provocative and debated models of bureaucratic behavior as developed by William A

Niskanen in his seminal book *Bureaucracy and Representative Government* The essays evaluate a wide array of findings both qualitative and quantitative relevant to the various aspects of the model and offer conclusions about its merits and limits suggesting alternative explanations of bureaucratic behavior Niskanen provides his own reassessment and reflections on the debate

Trust in Numbers Theodore M. Porter, 2020-08-18 A foundational work on historical and social studies of quantification What accounts for the prestige of quantitative methods The usual answer is that quantification is desirable in social investigation as a result of its successes in science *Trust in Numbers* questions whether such success in the study of stars molecules or cells should be an attractive model for research on human societies and examines why the natural sciences are highly quantitative in the first place Theodore Porter argues that a better understanding of the attractions of quantification in business government and social research brings a fresh perspective to its role in psychology physics and medicine Quantitative rigor is not inherent in science but arises from political and social pressures and objectivity derives its impetus from cultural contexts In a new preface the author sheds light on the current infatuation with quantitative methods particularly at the intersection of science and bureaucracy

evaluation information dissemination and education at different levels in the public private and voluntary sectors in society especially in a developmental context **Unravelling Criminal Justice** David Downes, 2016-07-27 Brings together the major findings of 11 projects funded under the Crime and the Criminal Justice System Initiative by the Economic and Social Research Council in the mid 1980s *What Has Sociology Achieved?* Henk A. Becker, Christopher G.A. Bryant, 2016-07-27 In an age when continued financial and other support for teaching and research in sociology cannot be taken for granted sociologists have been surprisingly slow to provide a clear statement of the achievements of sociology in the western world since 1950 *What Has Sociology Achieved* does this by assembling twelve essays specially commissioned from distinguished authors to which the editors add an introduction setting out the issues and a concluding chapter which draws together recurrent themes *The Reality of Nursing Research* Davina Allen, Patricia Lyne, 2006-09-27 With illustrative case studies and practical advice for nurse researchers this invaluable text looks at the real life dilemmas faced by nurse researchers at key stages of the research process from developing a research question through to disseminating the findings **From transmitted deprivation to social exclusion** Welshman, John, 2007-09-13 John Welshman's new book fills a major gap in social policy the history of debates over transmitted deprivation and their relationship with current initiatives on social exclusion The book explores the content and background to Sir Keith Joseph's famous cycle of deprivation speech in 1972 examining his own personality and family background his concern with problem families and the wider policy context of the early 1970s Tracing the direction taken by the DHSS SSRC Research Programme on Transmitted Deprivation it seeks to understand why the Programme was set up and why it took the direction it did With this background the book explores New Labour's approach to child poverty initiatives such as Sure Start the influence of research on inter generational continuities and its new stance on social exclusion The author argues that while earlier writers have acknowledged the intellectual debt that New Labour owes to Joseph and noted similarities between current policy approaches to child poverty and earlier debates the Government's most recent attempts to tackle social exclusion mean that these continuities are now more striking than ever before Making extensive use of archival sources private papers contemporary published documents and oral interviews with retired civil servants and social scientists *Policy Poverty and Parenting* is the only book length treatment of this important but neglected strand of the history of social policy It will be of interest to students and researchers working on contemporary history social policy political science public policy sociology and public health
