Social Science Research On Cad Cam Results Of A First European Workshop:

Social Science Research on CAD/CAM Michael Rader, Bernd Wingert, Ulrich Riehm, 2012-12-06 Computer Aided Design CAD and Computer Aided Manufacture CAM are but two of the more recent examples of computer applications in domains previously dominated by human labour The use of computers in such areas has increasingly attracted social science research There are several reasons one could suggest for this not least of them being the simple fact that public money is being provided for such research Of course some of the interest may be due to the wish to prove that technology is being used to inhuman ends but undoubtedly there is also some degree of fascination involved Can you really do all the things with computers that people claim you can There is certainly satisfaction to be had from smugly pointing out its shortcomings but many of the few sociologists in our own organisation are also among the most avid users of modern technology Needless to say they also belong to the most critical users of the technology A new strain of motivation for social science research which appears to be gaining significance is the desire to re direct technology or at least and probably more realistically to play a part in shaping future technology The entire range of motives may be recognised in the collection of papers contained in this volume

Social Science Research on CAD/CAM Michael Rader, Bernd Wingert, 1988 **Recent Developments in Job Analysis** Kurt Landau, Walter Rohmert, 2017-06-26 The analysis of the various components of human work is the most important approach to a systematic study of people at work This approach is aimed at the examination of individual activities with respect to the role they play in the conflict of humanitarian economic and technical aspects of work The main objective of this title which was first published in 1989 was to bring together researchers and practitioners from industry and academia who were interested in ergonomics and psychological aspects of job analysis This title will be of particular interest to students of human resource management

The Political Context of Collective Action Ricca Edmondson, 2003-12-16 The study of social and popular movements continues to attract great interest but little is known of political activity which takes place outside of traditional political structures This volume looks at informal political action which arises when conventional frameworks such as those provided by welfare states are in crisis or decline At such times the usual expectations about political action may not apply so what actually goes on Greatly expanding the scope for research into collective action this volume will be of great interest to students and researchers of politics and sociology interested in this important area
