Hess, 2001-07-19 This book looks at how sociological concepts that were first invented and applied to describe social inequality in Europe were also used to understand and explain inequality in the United States However under very different circumstances and conditions the concepts needed to be adjusted either through changing their precise meaning or by using related concepts In *Concepts of Social Stratification* the author tries to analyse this change by looking at how some of the most prominent American sociologists have tried to conceptualise their own society while at the same time addressing the complex relationship between an assumed political equality and de facto social inequality

*Western Society in Transition* Volker Bornschier, 2018-04-24 An enormous acceleration of history has occurred in the current decade thereby radically changing world society in many respects The core countries grouped

around the triad formed by the United States Japan and the European Union have experienced successive waves of change marked by phases of ascent unfolding and decay of societal models What seemed stable and predictable in past decades came close to collapse or broke down entirely As a result we are now living through a crisis of legitimation characterized by acute contradictions A new order with a fresh basic consensus around an overarching set of norms that allows problems to be solved efficiently has not yet crystallized

Western Society in Transition examines the succession of societal models of the Western world and indications of its probable shape in the future Bornschier characterizes the 1985 1995 period as a decade of Third World debt and depression continued economic decline in the United States a steady ascent of Japan Western Europe s move toward political union and the collapse of the Soviet Union Against this background he sketches various elements of a theoretical perspective he calls evolutionary conflict theory The primary focus of interest of this theory is not on single societies but on measures of social transformation at the core of world society Western Society in Transition deals with fundamental questions How does social order arise and why does it dissolve What provides social cohesion What makes society progress Institutional spheres of Western society such as technology firms the market state building education power conflict and social movements are analyzed in detail Peter Lengyel editor emeritus of the International Social Science Journal says of Western Society in Transition I have never seen such a succinct clear and persuasive treatment which adroitly draws together elements from economics history sociology and technology into a strictly contemporary kind of political economy This timely assessment of the Western world will be of interest to social scientists historians economists and international relations scholars

**Money, Morals, and Manners** Michèle Lamont, 1992-10-15 Appendix IV Ranking of Respondents on the Cultural Moral and Socioeconomic Dimensions

*Theory of Societal Constitutionalism* David Sciulli, 1992 The author argues that the existing conceptual frameworks of political and social theory restrict both theorists and empirical researchers to a narrow definition of authoritarianism that focuses on governmental structure and fails to take account of forms of social control exercised outside the governmental sphere Rather than define authoritarianism primarily by contrast to liberal democracy Sciulli argues we need to broaden our conception of authoritarianism to include social authoritarianism referring to social control imposed by private organizations and institutions such as business corporations and professional associations In this book Sciulli develops an alternative conceptual framework which he calls the theory of societal constitutionalism and he explains how the theory can be used to assess whether social order in a society whether democratic or authoritarian in political rule is characterized by some degree of social authoritarianism The book will be important reading for theorists in sociology political science and legal studies
