Social Tensions In Abam Middle Clab Politics:

The Sociology of Social Problems Adam Jamrozik, Luisa Nocella, 1998-07-13 Social problems such as unemployment poverty and drug addiction are a fact of life in industrialised societies This book examines the sociology of social problems from interesting and challenging perspectives It analyses how social problems emerge and are defined as such who takes responsibility for them who is threatened by them and how they are managed solved or ignored The authors examine and critique existing theories of social problems before developing their own theoretical framework Their theory of residualist conversion of social problems explains how certain social problems threaten legitimate power structures so that problems of a social or political nature are transformed into personal problems and the helping professions are left to intervene This book will become a key reference on class inequality and social intervention and an important text for students in sociology and social work courses

Problems of the Elderly in Alabama United States. Congress. House. Select Committee on Aging, 1976 **Problems of Communism** ,1975 *Comparing Armed Conflicts* Bruno Charbonneau, Adam Sandor, 2021-07-12 Comparing armed conflicts primes the production of categories that when mobilized can alter the trajectories of the conflicts Considering the political dynamism of spaces of conflict and intervention and that practitioners regularly seek out academic expertise this book discusses the possibilities and limits of comparative approaches to understanding armed conflict and intervention Capacity building experts development workers international organizations and diplomats use their previous experiences and bring them into new contexts to understand and respond to their environment Conflict actors can also make comparisons to buttress their political position in negotiations consolidate their control over fighters and as calls for transnational rebel solidarity The use of such comparisons is an inherently political move and it has an impact on the production of scientific knowledge on conflict dynamics themselves and on the formulation and implementation of conflict management policy comparison is inherently a practice of order making While there are important epistemological and methodological stakes associated with researchers engaging in comparison there are also important productive effects connected to the research avenues taken The chapters in this book were originally published in the Civil Wars

Hammer and Hoe Robin D. G. Kelley,2015-08-03 A groundbreaking contribution to the history of the long Civil Rights movement Hammer and Hoe tells the story of how during the 1930s and 40s Communists took on Alabama s repressive racist police state to fight for economic justice civil and political rights and racial equality The Alabama Communist Party was made up of working people without a Euro American radical political tradition devoutly religious and semiliterate black laborers and sharecroppers and a handful of whites including unemployed industrial workers housewives youth and renegade liberals In this book Robin D G Kelley reveals how the experiences and identities of these people from Alabama s farms factories

mines kitchens and city streets shaped the Party's tactics and unique political culture. The result was a remarkably resilient movement forged in a racist world that had little tolerance for radicals. After discussing the book's origins and impact in a new preface written for this twenty-fifth anniversary edition, Kelley reflects on what a militantly antiracist radical movement in the heart of Dixie might teach contemporary social movements confronting rampant inequality, police violence, mass incarceration, and neoliberalism.

Black Coal Miners in America Ronald L. Lewis, 2021-03-17 From the early days of mining in colonial Virginia and Maryland up to the time of World War II, blacks were an important part of the labor force in the coal industry. Yet in this, as in other enterprises, their role has heretofore been largely ignored. Now Roland L. Lewis redresses the balance in this comprehensive history of black coal miners in America. The experience of blacks in the industry has varied widely over time and by region, and the approach of this study is therefore more comparative than chronological. Its aim is to define the patterns of race relations that prevailed among the miners. Using this approach, Lewis finds five distinctive systems of race relations. There was in the South before and after the Civil War a system of slavery and convict labor, an enforced servitude without legal compensation. This was succeeded by an exploitative system whereby the southern coal operators, using race as an excuse, paid lower wages to blacks and thus succeeded in depressing the entire wage scale. By contrast, in northern and midwestern mines, the pattern was to exclude blacks from the industry so that whites could control their jobs and their communities. In the central Appalachians, although blacks enjoyed greater social equality, the mine operators manipulated racial tensions to keep the work force divided and therefore weak. Finally, with the advent of mechanization, black laborers were displaced from the mines to such an extent that their presence in the coal fields is now nearly a thing of the past. By analyzing the ways race, class, and community shaped social relations in the coal fields, *Black Coal Miners in America* makes a major contribution to the understanding of regional labor, social, and African American history.

Bauman,2019-05-14 Winner of the 2023 Southern Jewish Historical Society Book Award Essays from a prolific career that challenge and overturn traditional narratives of southern Jewish history Mark K Bauman one of the foremost scholars of southern Jewish history working today has spent much of his career as he puts it rewriting southern Jewish history in ways that its earliest historians could not have envisioned or anticipated and doing so by specifically targeting themes and trends that might not have been readily apparent to those scholars A *New Vision of Southern Jewish History* Studies in Institution Building Leadership Interaction and Mobility features essays collected from over a forty year career including a never before published article The prevailing narrative in southern Jewish history tends to emphasize the role of immigrant Jews as merchants in small southern towns and their subsequent struggles and successes in making a place for themselves in the fabric of those communities Bauman offers assessments that go far beyond these simplified frameworks and draws upon varieties of subject matter time periods locations tools and perspectives over three decades of writing and scholarship A *New Vision of Southern Jewish History* contains Bauman s studies of Jewish urbanization acculturation and migration intra and inter group relations economics and business government civic affairs

transnational diplomacy social services and gender all complicating traditional notions of southern Jewish identity Drawing on role theory as informed by sociology psychology demographics and the nature and dynamics of leadership Bauman traverses a broad swath often urban of the southern landscape from Savannah Charleston and Baltimore through Atlanta New Orleans Galveston and beyond the country to Europe and Israel Bauman's retrospective volume gives readers the opportunity to review a lifetime of work in a single publication as well as peruse newly penned introductions to his essays The book also features an Additional Readings section designed to update the historiography in the essays

The New Deal and Texas History Ronald E. Goodwin, 2021-07-21 This book examines the many ways in which the New Deal revived Texas's economic structure after the 1929 collapse Ronald Goodwin analyzes how Franklin Roosevelt's initiative and in particular the Work Progress Administration remedied rampant unemployment and homelessness in twentieth century Texas

Science and Medicine in the Old South Ronald Numbers, Todd L. Savitt, 1999-03-01 With a few notable exceptions historians have tended to ignore the role that science and medicine played in the antebellum South The fourteen essays in Science and Medicine in the Old South help to redress that neglect by considering scientific and medical developments in the early nineteenth century South and by showing the ways in which the South's scientific and medical activities differed from those of other regions The book is divided into two sections The essays in the first section examine the broad background of science in the South between 1830 and 1860 the second section addresses medicine specifically The essays frequently counterpoint each other In the first section Ronald Numbers and Janet Numbers argue that the South's failure to keep pace with the North in scientific areas resulted from demographic factors William Scarborough asserts that slavery produced a social structure that encouraged agricultural and political careers rather than scientific and industrial ones Charles Dew offers a strong indictment of slavery suggesting that the conservative influence of the institution severely discouraged the adoption of modern technologies Other essays examine institutions of higher learning in the South southern scientific societies and the relationship between science and theology The section on medicine in the Old South also examines the ways in which the medical needs and practices of the Old South were both similar to and distinct from those of other regions K David Patterson argues that slavery in effect imported African diseases into the Southeast and created a modified West African disease environment James H. Cassidy points out that land management policies determined by slavery land clearing soil exhaustion also helped create a distinctive disease environment Other contributors discuss southern public health problems domestic medicine slave folk beliefs and the special medical needs of blacks Science and Medicine in the Old South is a long overdue examination of these segments of the southern cultural milieu These essays will do much to clarify misconceptions about the time and the region moreover they suggest directions for future research

Veiled Visions David Fort Godshalk, 2006-05-18 In 1906 Atlanta after a summer of inflammatory headlines and accusations of black on white sexual assaults armed white mobs attacked African Americans resulting in at least twenty five black fatalities Atlanta's black

residents fought back and repeatedly defended their neighborhoods from white raids Placing this four day riot in a broader narrative of twentieth century race relations in Atlanta in the South and in the United States David Fort Godshalk examines the riot s origins and how memories of this cataclysmic event shaped black and white social and political life for decades to come Nationally the riot radicalized many civil rights leaders encouraging W E B Du Bois s confrontationist stance and diminishing the accommodationist voice of Booker T Washington In Atlanta fears of continued disorder prompted white civic leaders to seek dialogue with black elites establishing a rare biracial tradition that convinced mainstream northern whites that racial reconciliation was possible in the South without national intervention Paired with black fears of renewed violence however this interracial cooperation exacerbated black social divisions and repeatedly undermined black social justice movements leaving the city among the most segregated and socially stratified in the nation Analyzing the interwoven struggles of men and women blacks and whites social outcasts and national powerbrokers Godshalk illuminates the possibilities and limits of racial understanding and social change in twentieth century America **The Southern Historian**
