

Social theory in archaeology

Michael Shanks

Stanford University, California USA

This is an expanded draft, June 2023, of an essay intended for an encyclopaedia of archaeology.

Abstract

Social theory in archaeology is often summarized as different schools of thought (paradigms and isms) that aim to reconstruct past societies. They are usually associated with thought leaders in the discipline who advocate for and against the different schools of thought. Involved are questions of social ontology (asking — what is society and its components?), epistemology (asking — how might we come to know societies?), and modeling (capturing key aspects of social process as well as how to use archaeological evidence in reconstructing societies). In contrast, this essay avoids the description of schools of thought and, following a pragmatist line, treats social theory in archaeology as a key component of thoughtful practice, what archaeologists do, how they work. The components of practice such as opening brief, orientation, deliverable, frame, and project management are related to social theory. The concepts of social theory are argued to be a tool kit mobilized in archaeological practice. A section outlines some concepts of social theory, including society, culture, systems, networks, agency, power, identity, personhood, complexity.

Key points/objectives

- Orthodox accounts of social theory in archaeology focus upon abstract schools of thought and thought leaders. This oversimplifies complex debates and promotes an adversarial academic politics.
- Social theory is best treated in pragmatist terms as a key component of archaeological practice, what archaeologists do.
- In this approach, often associated with science studies, the concepts of social theory are a tool kit for constructing what may be offered as candidates for archaeological knowledge, among other things.

Social Theory and Archaeology Michael Shanks, Christopher Y. Tilley, 1988 Social Theory in Archaeology Michael B. Schiffer, 2000 A handbook to an array of theoretical approaches that contribute something provocative or significant to the enterprise of constructing social theory in archaeology setting the agenda for future research *Companion to Social Archaeology* Lynn Meskell, Robert W. Preucel, 2008-04-15 The Companion to Social Archaeology is the first scholarly work to explore the encounter of social theory and archaeology over the past two decades Grouped into four sections Knowledges Identities Places and Politics each of which is prefaced with a review essay that contextualizes the history and developments in social archaeology and related fields Draws together newer trends that are challenging established ways of understanding the past Includes contributions by leading scholars who instigated major theoretical trends *Social Theory and Archaeology* Michael Shanks, Christopher Tilley, 1996 **Framing Archaeology in the Near East** Ianir Milevski, Thomas Evan Levy, 2017 This volume presents a series of studies by scholars working in Middle Eastern archaeology who actively apply social theory to interpret their fieldwork It aims to highlight the value of using social theory in the interpretation of field work in a region where traditionally such approaches have not played a major role There are a number of factors that account for why social theory is often under exploited by archaeologists in this part of the world In many countries where large numbers of the foreign archaeologists are involved a division between those doing fieldwork and those undertaking archaeological interpretation can easily arise Or the lack of interest in social theory may stem from a legacy of positivism that overrides other approaches There is also the fact that archaeology and anthropology often belong to separate academic departments and are considered two separate disciplines disconnected from each other In some cases the centrality of historical paradigms has precluded the use of social theory There are also divisions between universities and other research institutions such as departments of antiquities which is not conducive to interdisciplinary cooperation This factor is especially debilitating in contexts of rapid destruction of sites and the exponential growth of salvage excavations and emergency surveys The papers integrate a wide range of perspectives including New or Processual archaeology Marxist Post Processual evolutionist cognitive symbolic and Cyber archaeologies and touch on many topics including 3D representation GIS mapping and social theory semiotics and linguistics gender and bioarchaeology social and technical identities and modern historical modelling and social practices in Middle Eastern archaeology **Social Theory in Archaeology and Ancient History** Geoff Emberling, 2016 This book reflects on big questions in archaeology and ancient history including how societies grew and how they collapsed Social Theory in Archaeology and Ancient History Geoff Emberling, 2015-11-24 At a time when archaeology has turned away from questions of the long term and large scale this collection of essays reflects on some of the big questions in archaeology and ancient history how and why societies have grown in scale and complexity how they have maintained and discarded aspects of their own cultural heritage and how they have collapsed In addressing these

long standing questions of broad interest and importance the authors develop counter narratives new ways of understanding what used to be termed cultural evolution Encompassing the Middle East and Egypt India Southeast Asia Australia the American Southwest and Mesoamerica the fourteen essays offer perspectives on long term cultural trajectories on cities states and empires on collapse and on the relationship between archaeology and history The book concludes with a commentary by one of the major voices in archaeological theory Norman Yoffee **Archaeological Theory** Norman Yoffee, Andrew Sherratt, 1993-07-22 This volume assesses the real achievements of archaeology in increasing an understanding of the past Without rejecting the insights either of traditional or more recent approaches it considers the issues raised in current claims and controversies about what is appropriate theory for archaeology The first section looks at the process of theory building and at the sources of the ideas employed The following studies examine questions such as the interplay between expectation and evidence in ideas of human origins social role and material practice in the formation of the archaeological record and how the rise of states should be conceptualised further papers cover issues of ethnoarchaeology visual symbols and conflicting claims to ownership of the past The conclusion is that archaeologists need to be equally wary of naive positivism in the guise of scientific procedure and of speculation about the unrecorded intentions of prehistoric actors *Handbook of Archaeological Theories* R. Alexander Bentley, Herbert D. G. Maschner, Christopher Chippindale, 2009-09-16 This handbook a companion to the authoritative Handbook of Archaeological Methods gathers original authoritative articles from leading archaeologists on all aspects of the latest thinking about archaeological theory It is the definitive resource for understanding how to think about archaeology **Social Theory and Archaeology [by] Michael Shanks and Christopher Tilley** David J. Meltzer, **Archaeological Theory** Robert Chapman, 2022-11-22 Archaeological Theory The Basics is an accessible introduction to an indispensable part of what archaeologists do The book guides the reader to an understanding of what theory is how it works and the range of theories used in archaeology The growth of theory and the adoption of theories drawn from both the natural and social sciences have broadened our ability to produce trustworthy knowledge about the past This book helps readers to see the value of archaeological theory and beyond what is sometimes thought to be just the use of indigestible jargon Key theories and concepts are introduced to the reader Among the main questions discussed are the following What is theory and why do we need it What major areas of theory are and have been used and debated in archaeology What do they tell us about themes including human society evolution culture identity and agency How might archaeological theory change in the future This book is written mainly for readers new to archaeology and will help them to understand archaeological theory It assumes no prior knowledge of archaeological theory and presents it in a selective and clear way with case studies showing how theory is used in practice **Handbook of Contemporary European Social Theory** Gerard Delanty, 2006-09-27 This innovative publication maps out the broad and interdisciplinary field of contemporary European social theory It covers sociological theory the wider theoretical traditions in

the social sciences including cultural and political theory anthropological theory social philosophy and social thought in the broadest sense of the term This volume surveys the classical heritage the major national traditions and the fate of social theory in a post national and post disciplinary era It also identifies what is distinctive about European social theory in terms of themes and traditions It is divided into five parts disciplinary traditions national traditions major schools key themes and the reception of European social theory in American and Asia Thirty five contributors from nineteen countries across Europe Russia the Americas and Asian Pacific have been commissioned to utilize the most up to date research available to provide a critical international analysis of their area of expertise Overall this is an indispensable book for students teachers and researchers in sociology cultural studies politics philosophy and human geography and will set the tone for future research in the social sciences
