Social Work In Higher Education Demise Or Development Published In Association With Cedr:

Social Work in Higher Education Karen Lyons, 2019-01-22 First published in 1999 in the light of recent moves towards deprofessionalisation and instrumentalism Karen Lyons has conducted extensive research into the challenges facing social work training as a higher education discipline Here these challenges are located in a discussion of wider changes in both higher education and the personal social services and are also linked to debates about professional education and the nature of knowledge The analysis is based on original data and includes reference to pedagogical and cultural factors and to internal and external policies which might make social work viable or vulnerable in the higher education context This multi disciplinary perspective reflects a characteristic of social work study itself a quality which might be seen as either problematic or as a strength The book concludes that while the future scale and form of the social work subject area lie partly outside the control of social work educators they have a key role to play in the development of the discipline This includes the promotion of research which should underpin the creation of knowledge and inform professional practice in the changing field of personal social services

Social Work in a Corporate Era Linda Davies, 2017-09-29 A striking new feature of the welfare systems in many Western countries is the extent to which market relations have permeated social services Conceptions of risk management now dominate the way parents and children are responded to while new technologies aim to measure their relationship with state service providers Bureaucratic control is increasing while resources are reduced These factors have led to the demise of the traditional role of the social worker as one who engages with the client in a supportive encounter Professional competence within social work is increasingly tied to mastering scientific knowledge and new technical skills The result of collaboration between authors from Canada Britain and Australia **Social Work in a Corporate Era** offers a critical overview of these developments and their implications It provides a re evaluation of the assumptions and practices of the critical social work tradition and explores the possibility of rebuilding an emancipatory social work The authors aim to disentangle the debate between Marxism feminism and anti racism in the context of both postmodern challenges and the corporate restructuring of the welfare state Calling for the development of a new politics of social work practice this book addresses many of the urgent issues facing welfare state practitioners in health and social services today

Reflecting on Social Work - Discipline and Profession Karen Lyons, 2017-03-02 Social work has always been a contested activity and its status as an academic discipline remains uncertain There is currently renewed interest in the theoretical and research dimensions of social work at a time when significant changes in the broad social political and economic context in which practice takes place require a re evaluation of social work s role and a re examination of its identity This timely book brings together leading social work academics to examine the state of social work at the beginning of the 21st century With their focus on the relationships between research theory and practice they reflect critically on the nature of social work as a discipline in higher education and the importance of this to the profession as a

whole The book represents an exploratory conversation among social work academics about the current state and future aspirations of the discipline and the profession It aims to stimulate wider debate about the dominant constraints and opportunities for social work in the 21st century **Revitalising Communities in a Globalising World** Lena

Dominelli,2018-02-06 Revitalising Communities in a Globalising World explores the opportunities and constraints that the dynamics of globalisation present for human development in a range of different countries and situations Arguing that globalisation is currently a system of organising social relations along neoliberal lines this timely volume examines practical examples of how people respond to significant social changes in their communities The idea of communities is deconstructed to show that globalisation has collapsed the boundaries of time space and place in ways that have exacerbated inequalities at the same time giving rise to unparalleled riches for some The book encompasses a number of case studies that speak to policymakers practitioners educators and students interested in studying globalisation and making the most of its potential for change

Beyond Racial Divides Lena Dominelli,Walter Lorenz,2017-03-02 Written by leading authorities in the field this challenging book addresses complex issues of ethnicity and racial discrimination in ways that encourage further debate and analysis Its main theme is that social work has been and remains deeply implicated in racist policies and practices that have been locality specific but that racism is also recognizable across borders as a phenomenon that appears everywhere At the same time the book focuses on innovative theories and practice which seek to promote an emancipatory social work which sets itself the goal of eradicating social injustice particularly that applying to race The contributors come from a wide range of countries and describe their experiences in tackling racism in social work at the levels of both theory and practice This provides an impressive range of perspectives which cover models of social work created by people who have had to live with racism and find ways of overcoming it as well as those who have struggled to become able to express their own ethnicity without oppressing others The concluding message of the book is a positive one people can create a world that goes beyond racial divides by accepting validating and celebrating diversity while at the same time recognizing that people share many commonalities with others which can be used to establish egalitarian relationships realize social justice and communicate effectively with each other

Broadening Horizons Wanda Thomas Bernard,2017-03-02 While the remit of social work professionals is in general locality based social work has a long tradition of concern about international issues Broadening Horizons provides an engaging and original contribution to the debate on how to tackle social work problems on a global scale Filling both a theoretical and a practice gap in the literature the book discusses the experiences of academics practitioners and students involved in international exchanges in social work It draws on a major EU Canadian exchange project as well as separate projects in countries including South Africa the USA China and Australia The contributors highlight the opportunities and barriers that shaped their experience and give guidance on how to deal with both the practicalities and aspirations of living and working across borders This book will thus be invaluable both to readers

interested in the meaning and realities of international social work and to those hoping to embark on an exchange programme themselves

Community Approaches to Child Welfare Lena Dominelli, 2018-08-13 Published in 1999
Community Approaches to Child Welfare is written by both practitioners and academics to explore ways in which community based preventative approaches to child welfare can be used to support families experiencing behavioural problems with children or undergoing difficulties in raising them Specific practice examples developed in Britain Canada and Sweden provide an international dimension to this book Comparing and contrasting developments within these countries reveal that there are both similarities in the methods adopted and difference in the ways in which these are applied Common themes which appear across the stories that are presented include the importance of ensuring cultural specificity to respond to identity issues and local traditions the need to adhere to legislation that is country specific the importance of dealing with some child welfare issues on an international basis e g child abductions and the importance of giving children the space within which to articulate their own voice Additionally the book reveals how working with families from a community perspective which is centered in acknowledging children s rights and parental rights may challenge professionals in ways that they find uncomfortable Nevertheless the book concludes that practice can more effectively serve children s interests if parents and workers work in partnership with each other

Valuing the Field Marilyn Callahan, Sven Hessel, Susan Strega, 2018-02-06 This title was first published in 2000 This text provides international perspectives on examples of best practice in child welfare and proposes organizational structures and policies to support this practice Practice innovations span the range of child welfare services including prevention protection and out of family care The contributors describe the child welfare context in each of their particular jurisdictions producing an addition to the literature comparing child welfare in different countries Moreover existing books on the subject are primarily descriptive and examine overall child welfare legislation and policy The work adopts an analytical approach proposing policies and focusing on the largely unexamined topic of excellence in child welfare practice
