*The Black Social Economy in the Americas* Caroline Shenaz Hossein, 2017-09-18 This pioneering book explores the meaning of the term Black social economy a self help sector that remains autonomous from the state and business sectors With the Western Hemisphere s ignoble history of enslavement and violence towards African peoples and the strong anti black racism that still pervades society the African diaspora in the Americas has turned to alternative practices of socio economic organization Conscientious and collective organizing is thus a means of creating meaningful livelihoods In this volume fourteen scholars explore the concept of the Black social economy bringing together innovative research on the lived experience of Afro descendants in business and society in Argentina Brazil Canada Colombia Guyana Haiti Jamaica and the United States The case studies in this book feature horrific legacies of enslavement colonization and racism and they recount the myriad ways that persons of African heritage have built humane alternatives to the dominant market economy that excludes them Together they shed necessary light on the ways in which the Black race has been overlooked in the social economy literature

*The Social Economy* Ash Amin, 2009-10-15 As the current economic crisis spreads around the globe questions are being asked about what kind of capitalist or post capitalist economy will follow There is increasing talk of the need for stringent economic regulation the need to temper greed and individualism to make the economy work for human and social development The search is on for a kinder greener less unequal and more redistributive economy This transitional moment with its pointed questions about the economy to come provides an opportunity to assess the role and potential of the social economy that is economic activity in between market and state oriented towards meeting social needs Until a decade ago the term was used mainly by the fringe to describe the alternative economy Typically organisations providing affordable child care to low wage families in a poor neighbourhood or those making goods from recycled materials for low income households were considered to be residual or marginal to a mainstream dominated by markets and states In the last decade expectation in both the developed and developing world has changed in quite radical ways Mainstream opinion is starting to see the social economy as a source of building social capabilities as well as developing new markets in welfare provision Policymakers around the world have begun to support the social economy and increasingly on business grounds jostling with traditional interest on the fringe in the sector as a moral and social alternative to the capitalist economy It is precisely this emerging but disputed centrality of the social economy that makes this book so timely The book positions the social economy conceptually and normatively with the help of case evidence

from a number of developed and developing countries. Uniquely it brings together in English the work of leading scholars of the social economy who are also actively engaged in national and international policy formulation. Although it argues a case for seeing the social economy as distinctive from the state and market in terms of aims, values and actors, it also notes many overlaps and complementarities once the economy is conceptualised as a plural entity responding to needs in diverse organisational combinations. The book also shows that expectations social and economic cannot be divorced from local institutional and historical circumstances and legacies. Accordingly, while certain generic policy principles can be shared internationally, interventions on the ground cannot ignore the demands of situated practice and legacy. *The Theory of Social Economy* Gustav Cassel, 1924

**The New Social and Impact Economy** Benjamin Gidron, Anna Domaradzka, 2021-05-11 This edited volume discusses the development of the new social and impact economy in ten countries around the globe. The new social and impact economy is an attempt to conceptualize developments after the 2008 economic crisis which emphasized the pitfalls of the Neo Liberal economic system. In the aftermath of the crisis, new organizational entities evolved which combined social and business objectives as part of their mission. Using data gathered by two recent international research projects, the ICSEM project and the FAB MOVE project, the book provides an initial portrait of the forces at play in the evolution of the new social and impact economy, linking those to the past crisis as well as to Covid19 and comparing the emergence of the phenomenon in a varied group of countries. The book begins with an overview of the classical definitions of social economy and proposes a comprehensive concept of new social and impact economy, its characteristics and sources. Ten country chapters as well as a comparative chapter on international social economy organizations follow. The volume concludes with an overall analysis of the data from the country chapters, forming a typology of social economy traditions and linking it to recent Post Capitalism trends. Creating a conceptual framework to analyze the new phenomena in social economy, this volume is ideal for academics and practitioners in the fields of social economy, social economic and welfare policies, social and business entrepreneurship in a comparative fashion, social and technological innovation as well as CSR specialists and practitioners. *The Law of Third Sector Organizations in Europe* Antonio Fici, 2023-12-31

Chapters in Part I present the ways in which each national jurisdiction deals with the group of organizations identified by the authors as third sector organizations, regardless of the ways in which these organizations are denominated or are commonly known in each country or the place in which their regulation is found. Chapters in Part II share a synthesis and comparative approach and draw the lines for further developments of the research activity culminated in the book. *The Challenges of the New Social Democracy* Raju J. Das, Jamie Gough, Aram Eisenschitz, 2023-07-10 Raju J. Das, Jamie Gough and Aram Eisenschitz provide a

Marxist critique of new social democracy as the dominant contemporary strategy for local economic and social development In both the global North and South new social democracy seeks to develop social capital strengthen civil society build not for profit enterprises encourage self help and foster community ties It seeks participatory forms of local politics to achieve a local class consensus It promises to improve people s economic and social conditions in the face of neoliberal capitalism and to empower them The authors argue that this strategy is severely limited by and internalises its capitalist environment They show that social enterprise can be developed in socialist ways and contribute to a local politics based in class struggle But social capital cannot replace the struggle of the exploited and oppressed against capitalism and for a socialist society a strategy which the authors outline for the local scale
