

What is social experimentation?

- Social experimentation uses randomised control groups to evaluate the specific value added of the measure (What would have been the situation of the people if the measure had not been implemented?)

Highly robust information about the measure and the context

Linksz, Marvin Mandell**

Social Experimentation:

Social Experimentation Donald T. Campbell, M. Jean Russo, 1998-12-10 Social Experimentation offers a user friendly presentation of Donald Campbell's essential work in social experimentation. It includes exploration of the experimenting society, the compatibility of quantitative and qualitative methods, validity, seeking threats to the validity of social experiments, and how they can be controlled, the degree to which the social sciences can achieve scientific status, and the degree to which the operations, products, and consequences of science have a social impact. Social Experimentation and Public Policymaking David H. Greenberg, Donna Links, Marvin Mandell, 2003 Social experimentation randomly assigns individuals or groups to coverage by the policy of interest or a control group, and then the groups are compared in terms of outcome. Greenberg, economics, U of Maryland; Links, mathematics/science and engineering, Community College of Baltimore County; and Mandell, policy sciences, U of Maryland, seek to assess whether the substantial investment in social experimentation in the United States has resulted in significant public policy changes. After explaining the general concepts behind social experimentation, they analyze five case studies and determine that they are not of decisive importance in state policy making, but they often serve useful purposes of policy formation. Annotation c 2003 Book News, Inc., Portland, OR, booknews.com. Validity and Social Experimentation Leonard Bickman, 2000-01-21 Annotation Leading social research methodologists and evaluators address the issues of validity, research design, and social experimentation in this first of two volumes inspired by the work of Donald Campbell and sponsored by the American Evaluation Association. The first part of the book focuses on three types of validity: external, construct, and statistical. Much attention is given to meta-analysis, statistical testing, and effect sizes. The second part is a major critique of Campbell's vision and practice of social experimentation. Contributors review and extend Campbell's ideas, concentrating on their relevance to evaluation and social intervention, and seeking to define an experimenting society. **The Digest of Social Experiments** David H. Greenberg, Mark Shroder, 2004 Contains brief summaries of 240 known completed social experiments. Each summary outlines the cost and time frame of the demonstration, the treatments tested, outcomes of interest, sample sizes, and target population, research components, major findings, important methodological limitations, and design issues encountered, and other relevant topics. In addition, very brief outlines of 21 experiments and one quasi-experiment still in progress as of April 2003 are also provided. p 3 **Social Experimentation, Program Evaluation, and Public Policy** Maureen A. Pirog, 2009-04-27 This volume provides a single collection of some of the best articles on social experimentation and program evaluation that have appeared in the Journal of Policy Analysis and Management (JPAM). It provides exposure to a variety of well-executed social experiments and evaluations for evidence-based public policy. Examines the theory and conduct of evaluations and social experiments as they relate to their practical implementation in evidence-based policy making. Provides exposure to the fundamental issues surrounding the conduct of evaluations, as well as to the relative merits of social experiments and the ethics and use of evaluations. *Social*

Experimentation Henry W. Riecken, Robert F. Boruch, 2013-09-11 *Social Experimentation A Method for Planning and Evaluating Social Intervention* summarizes the available knowledge about how randomized experiments might be used in planning and evaluating ameliorative social programs The book presents various aspects of social experimentation design measurement execution sponsorship and utilization of results Chapters are devoted to topics on experimentation as a method of program planning and evaluation experimental design and analysis institutional and political factors in social experimentation and aspects of time and institutional capacity Sociologists will find the book a valuable piece of reference

Social Experiments with Information Technology and the Challenges of Innovation Lars Qvortrup, Claire Ancelin, Jim Frawley, Jill Hartley, Franco Pichault, Peter Pop, 1987-04-30 A Selection of Papers from the EEC Conference on Social Experiments with Information Technology in Odense Denmark January 13 15 1986 *Social Experimentation* Rand Corporation, 1976 *Handbook of Labor Economics* Orley Ashenfelter, David Card, 2010-10-28 What new tools and models are enriching labor economics Developments in Research Methods and their Application Volume 4A summarizes recent advances in the ways economists study wages employment and labor markets Mixing conceptual models and empirical work contributors cover subjects as diverse as field and laboratory experiments program evaluation and behavioral models The combinations of these improved empirical findings with new models reveal how labor economists are developing new and innovative ways to measure key parameters and test important hypotheses Investigates recent advances in methods and models used in labor economics Demonstrates what these new tools and techniques can accomplish Documents how conceptual models and empirical work explain important practical issues **Randomized Control Trials in the Field of Development** Florent Bédécarrats, Isabelle Guérin, François Roubaud, 2020-09-17 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read at Oxford Academic and offered as a free PDF download from OUP and selected open access locations In October 2019 Abhijit Banerjee Esther Duflo and Michael Kremer jointly won the 51st Sveriges Riksbank Prize in Economic Sciences in Memory of Alfred Nobel for their experimental approach to alleviating global poverty But what is the exact scope of their experimental method known as randomized control trials RCTs Which sorts of questions are RCTs able to address and which do they fail to answer The first of its kind *Randomized Control Trials in the Field of Development A Critical Perspective* provides answers to these questions explaining how RCTs work what they can achieve why they sometimes fail how they can be improved and why other methods are both useful and necessary Bringing together leading specialists in the field from a range of backgrounds and disciplines economics econometrics mathematics statistics political economy socioeconomics anthropology philosophy global health epidemiology and medicine it presents a full and coherent picture of the main strengths and weaknesses of RCTs in the field of development Looking beyond the epistemological political and ethical differences underlying many of the disagreements surrounding RCTs it explores the implementation of RCTs on the ground outside of their ideal theoretical conditions and

reveals some unsuspected uses and effects their disruptive potential but also their political uses The contributions uncover the implicit worldview that many RCTs draw on and disseminate and probe the gap between the method s narrow scope and its success while also proposing improvements and alternatives Without disputing the contribution of RCTs to scientific knowledge Randomized Control Trials in the Field of Development warns against the potential dangers of their excessive use arguing that the best use for RCTs is not necessarily that which immediately springs to mind Written in plain language this book offers experts and laypeople alike a unique opportunity to come to an informed and reasoned judgement on RCTs and what they can bring to development

Nonprofit Organizations and the Intellectual Commons Jyh-An Lee,2012-01-01

There is no issue more fundamental to the growth of the open source society than a more mature and penetrating understanding of the nature of the nonprofit organization in a digital culture Professor Lee s book is essential reading to this fundamental topic beautifully written and brilliantly conceived Lawrence Lessig Harvard Law School US Jyh An Lee provides the first comprehensive account of nonprofit organizations and their overlooked role in setting and working around intellectual property policy The reader will find a wealth of information and a novel theory of NPOs as part of the IP ecosystem Mark A Lemley Stanford Law School US Over the past twenty years a number of nonprofit organizations NPOs such as Creative Commons the Electronic Frontier Foundation and the Free Software Foundation have laid essential building blocks for intellectual commons as a social movement Through a detailed description of these NPOs and a series of in depth interviews with their officials this book demonstrates that NPOs have provided the social structures that are necessary to support the production of intellectual commons By illustrating NPOs role in shaping the commons realm this book provides a new lens through which to understand the intellectual commons environment Protecting intellectual commons has been one of the most important goals of recent innovation and information policies This book focuses on the NPOs that occupy an increasingly critical and visible position in the intellectual commons environment in recent years This detailed study will appeal to academics in intellectual property and internet law nonprofit organizations academics and professionals and those involved in the Free Culture and Open Source Software Movement

The Consciousness Reformation Robert Wuthnow,2023-11-15 The late 1960s and early 1970s marked an era of profound social experimentation and cultural transformation This period saw an explosion of countercultural movements ranging from communes and alternative family structures to radical political organizations like SDS Students for a Democratic Society and SLA Symbionese Liberation Army Alongside these visible upheavals subtler shifts occurred in societal attitudes toward sexuality race religion and politics reflecting a broader reimagining of fundamental social norms These changes collectively signify a pivotal moment in American history with enduring implications for understanding social conflict and transformation This book seeks to explain the underlying forces driving these shifts by focusing on what we term the new consciousness a

cultural evolution that legitimized and encouraged social experimentation Departing from traditional analyses that attribute unrest to economic or institutional strains this study explores symbolic cultural constructions and their role in reshaping societal values By emphasizing how individuals interpret their circumstances rather than solely examining objective conditions we align with theoretical traditions like those of Weber and symbolic interactionism Our inquiry examines four dominant meaning systems in American culture Theism Individualism Social Determinism and Mysticism and their varying relationships with social experimentation aiming to uncover how these symbolic frameworks influence attitudes behaviors and societal change This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1976 **Evaluating New Telecommunications Services** Martin C.J.

Elton,William A. Lucas,David W. Conrath,2012-12-06 This book contains the proceedings of the first international symposium devoted to research on the evaluation and planning of new person to person telecommunication systems It was sponsored by NATO's Special Programme Panel on Systems Science and took place in September 1977 at the University of Bergamo in the north of Italy Telecommunication systems which provide for communication between people rather than computers or other instruments are of two kinds There are mass communication systems broadcast radio and television and interpersonal systems for example the telephone and Telex which join together individuals or small groups Here we have included in the interpersonal category certain systems for retrieving information from computers essentially those systems in which the role of the computer is primarily to act as a store and to identify that information which best fits a user's request This excludes management information systems in which the computer performs important transformation functions Distinctions between interpersonal and mass communication systems and between these two and data communication systems are increasingly breaking down for those who provide the services In the U K broadcasters are piloting information retrieval services and the British Post Office is competing with a more sophisticated system which could also be used for the exchange of messages Elsewhere computer data networks are increasingly employed for the exchange of personal messages *Experiments in Practice* Astrid Schwarz,2015-10-06

Traditionally experimentation has been understood as an activity performed within the laboratory but in the twenty first century this view is being challenged Schwarz uses ecological and environmental case studies to show how scientific experiments can transcend the laboratory **Handbook of Field Experiments** Esther Duflo,Abhijit Banerjee,2017-03-21 Handbook of Field Experiments provides tactics on how to conduct experimental research also presenting a comprehensive catalog on new results from research and areas that remain to be explored This updated addition to the series includes an entire chapter on field experiments the politics and practice of social experiments the methodology and practice of RCTs and the econometrics of randomized experiments These topics apply to a wide variety of

fields from politics to education and firm productivity providing readers with a resource that sheds light on timely issues such as robustness and external validity Separating itself from circumscribed debates of specialists this volume surpasses in usefulness the many journal articles and narrowly defined books written by practitioners Balances methodological insights with analyses of principal findings and suggestions for further research Appeals broadly to social scientists seeking to develop an expertise in field experiments Strives to be analytically rigorous Written in language that is accessible to graduate students and non specialist economists

Public Program Evaluation Laura Langbein,2014-12-18 This readable and comprehensive text is designed to equip students and practitioners with the statistical skills needed to meet government standards regarding public program evaluation Even those with little statistical training will find the explanations clear with many illustrative examples case studies and applications Far more than a cookbook of statistical techniques the book begins with chapters on the overall context for successful program evaluations and carefully explains statistical methods and threats to internal and statistical validity that correspond to each evaluation design Laura Langbein then presents a variety of methods for program analysis and advise readers on how to select the mix of methods most appropriate for the issues they deal with always balancing methodology with the need for generality the size of the evaluator s budget the availability of data and the need for quick results

Field Experiments in Political Science and Public Policy Peter John,2017-01-06 Field experiments randomized controlled trials have become ever more popular in political science as well as in other disciplines such as economics social policy and development Policy makers have also increasingly used randomization to evaluate public policies designing trials of tax reminders welfare policies and international aid programs to name just a few of the interventions tested in this way Field experiments have become successful because they assess causal claims in ways that other methods of evaluation find hard to emulate Social scientists and evaluators have rediscovered how to design and analyze field experiments but they have paid much less attention to the challenges of organizing and managing them Field experiments pose unique challenges and opportunities for the researcher and evaluator which come from working in the field The research experience can be challenging and at times hard to predict This book aims to help researchers and evaluators plan and manage their field experiments so they can avoid common pitfalls It is also intended to open up discussion about the context and backdrop to trials so that these practical aspects of field experiments are better understood The book sets out ten steps researchers can use to plan their field experiments then nine threats to watch out for when they implement them There are cases studies of voting and political participation elites welfare and employment nudging citizens and developing countries

The Punishment Imperative Todd R. Clear,Natasha A. Frost,2015-09-04 Clear and Frost chart the rise of penal severity in the U S and the forces necessary to end it Over the last 40 years the US penal system has grown at an unprecedented rate five times larger than in the past and grossly out of scale

with the rest of the world In *The Punishment Imperative* eminent criminologists Todd R Clear and Natasha A Frost argue that America's move to mass incarceration from the 1960s to the early 2000s was more than just a response to crime or a collection of policies adopted in isolation it was a grand social experiment Tracing a wide array of trends related to the criminal justice system this book charts the rise of penal severity in America and speculates that a variety of forces fiscal political and evidentiary have finally come together to bring this great social experiment to an end The authors stress that while the doubling of the crime rate in the late 1960s represented one of the most pressing social problems at the time it was instead the way crime posed a political problem and thereby offered a political opportunity that became the basis for the great rise in punishment Clear and Frost contend that the public's growing realization that the severe policies themselves not growing crime rates were the main cause of increased incarceration eventually led to a surge of interest in taking a more rehabilitative pragmatic and cooperative approach to dealing with criminal offenders that still continues to this day Part historical study part forward looking policy analysis *The Punishment Imperative* is a compelling study of a generation of crime and punishment in America
