Theodore Hoppen, 2000-06-30 This the third volume to appear in the New Oxford History of England covers the period from the repeal of the Corn Laws to the dramatic failure of Gladstone's first Home Rule Bill In his magisterial study of the mid Victorian generation Theo Hoppen identifies three defining themes The first he calls established industrialism the growing acceptance that factory life and manufacturing had come to stay It was during these four decades that the balance of employment shifted irrevocably For the first time in history more people were employed in industry than worked on the land The second concerns the multiple national identities of the constituent parts of the United Kingdom Dr Hoppen's study of the histories of Ireland Scotland Wales and the Empire reveals the existence of a variety of particular and overlapping national traditions flourishing alongside the increasingly influential structure of the unitary state The third defining theme is that of interlocking spheres which the author uses to illuminate the formation of public culture in the period This he argues was generated not by a series of influences operating independently from each other but by a variety of intermeshed political economic scientific literary and artistic developments This original and authoritative book will define these pivotal forty years in British history for the next generation **Popular Culture in London C.1890-1918** Andrew Horrall, 2001-12-07 Reg Prentice remains the most high profile politician to cross the floor of the House of Commons in the post war period His defection reflected an important sea change in British politics the end of the post war consensus and the beginnings of the Thatcher era This book examines the key events surrounding Prentice's transition from a front line Labour politician to a Conservative minister in the first Thatcher government It focuses on the shifting political climate in Britain during the 1970s as the post war settlement came under pressure from adverse economic conditions militant trade unionism and an assertive New Left Prentice's story provides an important case study on the crisis that afflicted social democracy highlighting Labour's left right divide and the possibility of a realignment of British politics. This study will be invaluable to anyone interested in the turbulent and transitional nature of British politics during a watershed period **Working-Class** 

**Community in the Age of Affluence** Stefan Ramsden, 2017-02-24 It has appeared to many commentators that the most fundamental change in what it is meant to be working class in twentieth century Britain came not as a result of war or of want but of prosperity Social investigators documented how the relative affluence of the 1950s and 1960s improved the material conditions of life for working class Britons whilst eroding their commitment to the shared life of traditional communities Utilising an oral history case study of sociability and identity in the Yorkshire town of Beverley between the end of the Second World War and the election of Margaret Thatcher's government Working Class Community in the Age of Affluence challenges this influential narrative An introductory essay outlines how sociologists and historians understood the complex social cultural and economic changes of the post war decades through the prism of affluence and traces how these changes came to be seen as deleterious to the traditional working class community. The book then proceeds thematically exploring change across areas of social life including family neighbourhood workplace and associational life This book represents the first sustained historical analysis of change and continuity in working class community living during the age of affluence It suggests not only that older social practices persisted but also that new patterns of sociability could strengthen as much as undermine community Ultimately Working Class Community in the Age of Affluence asks us to rethink assumptions about the decline of local solidarities in this pivotal period and to recognise community as a key feature of The Making of a Racist State Bernard Magubane, 1996 How did the Union working class life across the twentieth century of South Africa come to be dominated by a white minority That is the obvious but haunting question addressed in this remarkable historical survey which documents and analyses the chain of events that led up to the passing in 1909 of the South African Act by the British Parliament Victorians and the Case for Charity Marilyn D. Button, Jessica A. Sheetz-Nguyen, 2013-11-18 This collection of all new essays seeks to answer a series of questions surrounding the Victorian response to poverty in Britain In short what did various layers of society say the poor deserved and what did they do to help them The work is organized against the backdrop of the 1834 New Poor Laws recognizing that poverty garnered considerable attention in England because of its pervasive and painful presence Each essay examines a different initiative to help the poor Taking an historical tack the essayists begin with the royal perspective and move into the responses of Church of England members Evangelicals and Roman Catholics the social engagement of the literati is discussed as well This collection reflects the real monetary spiritual and emotional investments of individuals public institutions private charities and religious groups who struggled to address the needs of the poor **The British Working Class 1832-1940** Andrew August, 2014-06-11 In this insightful new study Andrew August examines the British working class in the period when Britain became a mature industrial power working men and women dominated massive new urban populations and the extension of suffrage brought them into the political nation for the first time Framing his subject chronologically but treating it thematically August gives a vivid account of working class life between the mid nineteenth and mid twentieth centuries

examining the issues and concerns central to working class identity Identifying shared patterns of experience in the lives of workers he avoids the limitations of both traditional historiography dominated by economic determinism and party politics and the revisionism which too readily dismisses the importance of class in British society Translation and Global Asia Uganda Sze-pui Kwan, Lawrence Wang-chi Wong, 2014-12-15 The present volume originates from The Fourth Asian Translation Traditions Conference held in Hong Kong in December 2010 The conference generated stimulating discussions relating to the richness and diversity of nonWestern discourses and practices of translation focusing on translational exchanges between nonWestern languages and the change and continuity in Asian translation traditions Translation and Global Asia shows a rich diversification of historical and geographical interests and covers a broad array of topics ranging from ninthcentury Buddhist translation in Tibet to twentyfirstcentury political translation in Malaysia This collection is strikingly rich Its authors deal with a wide range of topics in geographically diverse locations from India Thailand Japan Korea and the Philippines to different parts of China They evoke different linguistic and historical contexts from ancient times right up to the contemporary period and take a variety of approaches strongly supported by current theories in translation and cultural studies Presenting vital case studies this essential volume illustrates the importance of examining translation from a historical perspective of taking account of power relations and of studying the unique role of translators in **Telling Histories**, 2022-06-08 The proliferation of historical novels with initiating change and transmitting new ideas more or less overt metafictional traits in the late seventies and eighties in Britain is a particularly arresting phenomenon at a time when historians are openly questioning the validity of the traditional concept of history understood as a scientific search for knowledge This apparent contradiction justifies the attempt made by the contributors of this volume to analize the relationship between history and literature in English The reader will find four preliminary essays on The End of the Classical Period establishing the characteristics of the appropriation of history since the appearance of Sir Walter Scott s historical romances with special emphasis on the Victorian novel Dickens Eliot Mrs Humphry Ward the Irish ballad and Post Independence Indian historical fiction as a necessary preface to the main group of essays on The Postmodernist Era devoted to establishing the common as well as the individually distinctive traits in the writings of some of the most accomplished contemporary writers in English the more centered British novelists Margaret Drabble Julian Barnes and William Golding as well as the more ex centric Angela Carter Salman Rushdie and Jeanette Winterson plus the playwright Caryl Churchill and the black American novelist David Bradley Burglars and Bobbies Gregory J. Durston, 2012-11-30 The early decades of the nineteenth century witnessed an apparent deterioration in public order and security in the London area This continued to worsen until the middle of the century During this period the Metropolitan Police was established ostensibly transforming policing in the capital By the 1860s crime seemed to be falling rapidly and continued to do so until the end of the century so that it was no longer normally a subject that occasioned acute political concern This book examines the reality of crime levels

within the Metropolis the extent to which they differed from public perception and the manner in which they changed over time It considers how the police might have had an impact on public security after 1829 the use of the broken windows paradigm for crime control in an historical context and the extent to which the police can take credit for the post 1860 improvement in offending levels and order However it also discusses other factors both economic and social that might explain these developments At the same time the book charts the general history and development of urban policing in London during the nineteenth century the complicated and sometimes competing mixture of political and financial concerns operational priorities public and expert opinion that it reflected and the controversies that it engendered In particular it discusses the traditional form of policing that was replaced in 1829 and why this occurred the importance of foot patrol to the new force with its strengths and weaknesses the re emergence of detective policing and the legal powers and judicial support available to officers in the capital Very importantly this study also considers the problems thrown up by the new style of policing its potential for abuse and the public resistance that this sometimes encouraged Sixties Britain Mark Donnelly, 2014-01-14 Sixties Britain provides a more nuanced and engaging history of Britain This book analyses the main social political cultural and economic changes Britain undertook as well as focusing on the silent majority who were just as important as the rebellious students the residents if Soho and the icons of popular culture Sixties Britain engages the reader without losing sight of the fact that the 1960s were a vibrant fascinating and controversial time in British History Universities Past and Present Robert Anderson, 2006-09-27 This book is both a concise history of British universities and their place in society over eight centuries and a penetrating analysis of current university problems and policies as seen in the light of that history It explains how the modern university system has developed since the Victorian era and gives special attention to changes in policy since the Second World War including the effects of the Robbins report the rise and fall of the binary system the impact of the Thatcher era and the financial crises which have beset universities in recent years A final chapter on the past and the present shows the continuing relevance of the ideals inherited from the past and makes an important contribution to current controversies by identifying a distinctively British university model and discussing the Making a Man Gwen Hyman, 2009 Gruel and truffles wine and gin opium and historical relationship of state and market cocaine Making a Man addresses consumption of food drink and drugs in the conspicuously consuming nineteenth century in order to explore the question of what in fact makes a man in novels of the period Clothing the Poor in **Nineteenth-Century England** Vivienne Richmond, 2013-09-19 A pioneering study of the importance of dress to the collective and individual identities of the nineteenth century English poor London Francis Sheppard, 2000 London has for most of 2000 years been the hub of the political economic and cultural life of the British Isles No other city has held such a dominant national position for so long This new study by the doyen of London historians describes London's diverse past from its origins as aRoman settlement at the first bridging of the Thames to the world class metropolis it is today It provides

a vivid account of a city which was the deere sweete place which Chaucer loved more than any other city on earth which was for Dickens his magic lantern and to Keats a great sea howling for more wrecks It is also a story of much contrast and remarkable resilience through great fires and pestilence civil war and the Blitz London has rebuilt and reinvented itself for each generation The Detective as Historian Ray Browne, Lawrence Kreiser, 2009-03-26 Deeper understanding of history is enhanced by encasing it in art and interest Crime fiction is one of the widest and most rapidly growing forms of literature Historical crime fiction serves effectively the double purpose of entertaining while it teaches The truth of the narrative account the editors of this volume believe is dependent on the understanding of human nature reflected in the author who writes the narrative Historical crime fiction the editors of this volume write has an obligation and a golden opportunity It must bring the past up to the present through the device of timeless crime and it must take the reader into the world about which is being written so that the characters are alive and the events interesting and challenging Professional writers of fiction need to be more effective than mere authors of dates and assumed motivations Therefore they can fill in human motivations and drives where no records exist and can aid the professional historians in what historian David Thelen calls the challenge of history which is to recover the past and interpret it for the present The essays in this volume accept the challenge and make major accomplishments for meeting it The International Co-operative Movement Johnston Birchall, 1997 Examines the development of the international cooperative movement from the 19th century to the mid 1990s Includes a chapter on the founding and development of the International Co operative Alliance ICA Work: Theory and Practice Keith Popple, 2015-04-16 Community work is a unique and important activity that has the potential to help individuals groups and communities achieve change This brand new update of an established and acclaimed text explores and analyses different theoretical approaches to community work Written in a highly accessible style this book is grounded in practice issues and tackles political and theoretical issues head on New to the second edition Analysis of the work of New Labour Consideration of Coalition government policies for example the Big Society project and the impact of budget cuts A new international dimension throughout the text and an important new chapter on international community work New definitions of community explored to take into account a diverse population Increased emphasis on community work values skills and challenges Updated pedagogy including end of chapter summaries and reflective questions References the latest writings in the field Written by an established international expert this book will be valuable for students on qualifying programmes practitioners policy makers and commentators and those engaged in community work in all capacities Analysing Community Work provided a key text tackling issues of theory and practice in accessible ways for some two decades This second edition builds upon the strengths of the first updating the book to take account of the major changes that have been taking place since then both in Britain and internationally Popple's critical consideration of the impacts of globalization neo liberalism changing technologies increasing inequalities and increasing concerns with environmental issues

will be particularly welcomed This edition will be essential reading for those who read and appreciated the first as well as for a new generation of readers Marjorie Mayo Emeritus Professor of community development Goldsmiths University of London UK Popple s book was one of the key overviews of British community work when it first appeared in 1995 In the last few years the need for a revised and updated version has been increasingly obvious and Popple has now obliged The last twenty years have seen substantial changes in the political economic and organisational context within which community work operates and Popple has fully reflected this whilst remaining clear about its basic tenets and goals This is a highly welcome addition to contemporary community work literature Gary Craig Professor of Community Development and Social Justice Durham University UK 

Uncle Tom Mania Sarah Meer, 2005 Tom Mania looks at the novel Uncle Tom s Cabin and the songs plays sketches translations and imitations it inspired In particular it shows how the theatrical mode of blackface minstrelsy the slavery question and America's emerging cultural identity affected how the novel was read discussed dramatized merchandized and politicised
