Social Inequalities In Comparative Perspective:

Social Inequalities in Comparative Perspective Fiona Devine, Mary C. Waters, 2008-04-15 This unique collection of original essays brings a comparative perspective to issues of social inequality. First rate sociologists from around the world have contributed to this exciting and rigorous volume drawing upon their own research in the fields of race and ethnicity, class and inequality and gender and sexuality. Contains original essays by first rate scholars on issues of social inequalities around the world. Features research and examples from the USA, Canada, UK, Australia, France, Portugal, Finland and Japan. Reviews research on issues of social inequalities from the fields of race, class and gender. Provides students with an important overview of the development of social stratification studies. *Towards a Comparative Analysis of Social Inequalities between Europe and Latin America* Pedro López-Roldán, Sandra Fachelli, 2020-11-13 This open access volume identifies the common and specific aspects of social mechanisms that generate inequalities through comparative analyses of different dimensions in which inequalities are expressed. It includes studies on social inequalities in 5 European and 5 Latin American countries along 11 thematic axes: inequalities in the labour market and labour trajectories, asymmetries in the relationship between training and employment, inequalities in work and family life, educational inequalities, geographical and social inequalities, ethnicity and language, social inequalities, migration and space, uncertainty, strategies, resources and capabilities, inequality of opportunity, intergenerational social mobility, social policies, gender inequalities and research methodology. This volume is the result of a large collaborative project on social inequality funded by the European Commission, the International Network for Comparative Analysis of Social Inequalities. Taking into account diverse perspectives and approximations, the collaborators have created a general analytical framework as a model of analysis of social inequalities. The various contributions in this volume help readers gain a global outlook and help reflect on social inequalities in a comparative perspective. This volume addresses social science graduate and postgraduate students, researchers, social policy makers as well as a broader academic audience interested in social inequality. *Changing Structures of Inequality* Yannick Lemel, Heinz Noll, 2002-05-02 *Changing Structures of Inequality* examines these questions in a new comparative perspective covering five national societies: Canada, France, Germany, Spain and the United States. The authors offer a deep analysis of country specific research traditions in the fields of class analysis and social stratification, revealing important conceptual differences which have consequences for the diagnoses. They present the results of substantial comparative studies on different aspects of inequality in developed societies: the inequality of income and wealth, educational inequalities, status, crystallization, migration and inequality, gender inequality and the structuring effect of social class, highlighting similarities as well as substantial differences between the societies under examination. The authors offer a nuanced conclusion that puts in perspective the different topics of this contemporary debate. Developed societies are now characterized by more dynamic and pluralistic structures of inequalities where classes have lost

some of their previous importance but to some extent still have a place Contributors include Howard M Bahr Mathias B s Gary Caldwell Salustiano del Campo Theodore Caplow Louis Chauvel Michel Forse Wolfgang Glatzer Richard Huaser Paul W Kingston Denise Lemieux Laura Maratou Alipranti and Marion Mohle

The Sociology of Health and Illness Sarah Nettleton,2006-07-04 This reader brings together recent writing on health illness and health care in contemporary society It emphasizes the empirical nature of medical sociology and its relationship with the development of sociological theory *Whiteness and Nationalism* Nasar Meer,2020-12-17 Naming whiteness is becoming an increasingly pressing issue across a variety of social and political contexts In this book an international set of authors discuss how and why this has come to be the case Studying whiteness as either a social identity or political ideology is a relatively recent area of scholarship Unusually within the fields of race and ethnicity it is a concept that sits at an intersection between historical privilege and identity At the same time white privilege is not universally shared in or can be distant to how many white people feel they experience their identities Whiteness as a site of privilege is therefore not

absolute but rather cross cut by a range of other concerns too Nonetheless recent political developments serve to illustrate the political potency of appeals to whiteness in a way that suggests whiteness coupled with nationhood is a central social and political topic In this book authors from the USA Australia and Europe consider the contemporary relationships between whiteness and national identity by focusing on mainstream electoral politics the normalisation of white supremacy and where whiteness stands in relation to pluralised national identities The chapters in this book were originally published as a special issue of the journal *Identities Global Studies in Culture and Power*
