**Social Life of Early Man** S.L. Washburn, 2013-10-11 Attempting to reconstruct the life of early societies particular emphasis is laid upon social behaviour among primates as well as approaches from ethnology prehistoric archaeology geography genetics human stress biology and psychology First published in 1962 The Politics of Human Nature Thomas Fleming, 1988-01-01 The effort to understand human nature in a political context is a daunting challenge that has been undertaken in a variety of ways and by a myriad of disciplines through the ages From Plato to Hobbes and Burke to Wallas and Oakeschott in our era efforts have been made to provide some organic framework for the political study of mankind What has added greatly to the complexity of the task is the increasing denial even rejection in the positivist and behaviorist traditions of the very notion of a human nature The work can be described as a series of interlocking propositions the proverbial view of human nature can be explained by evolutionary theory Biological differences between men and women are responsible for family community and group life Social evolution goes through stages which are recapitulated in the moral life of individuals A well defined federal system mirrors human development And finally for Fleming most problems in social and political life stem from violations of this federalist system Fleming s volume takes up a variety of issues sex and gender differences democracy and dictatorship individual and familial patterns of association He does so in the context of showing how forms of legitimate authority such as families communities and nations establish such authority by appeals to human nature and that these appeals while presumably resting on empirical evidence also confirm the existence of normative structures Fleming s work is an effort of synthesis that is sure to arouse discussion and debate It represents a serious addition to a literature retrieved from the historical dustbins to which it has been repeatedly consigned **Human Behavioral Ecology** Jeremy Koster, Brooke Scelza, Mary K. Shenk, 2024-03-14 Human behavioral ecology HBE applies the principles of evolutionary theory and optimisation to the study of human behavioural and cultural diversity Among other things HBE attempts to explain variation in behaviour as adaptive solutions to the competing life history demands of growth development reproduction parental care and mate acquisition This book is a comprehensive introduction to the theoretical orientation and specific findings of HBE It consolidates the insights of evolution and human behaviour into a single volume that reflects the current state and future of the field It brings together leading scholars from across the evolutionary social sciences to provide a comprehensive and thought provoking review of the state of the topic Throughout the authors explain the latest developments in theory and highlight critical debates in the literature while also engaging readers with ethnographic insights and field based studies that remain at the core of human behavioral ecology Understanding Human Evolution Jeffrey K. McKee, Frank E. Poirier, W Scott McGraw, 2015-10-16 For the one term course in human evolution paleoanthropology or fossil hominins taught at the junior senior level in departments of anthropology or biology This new edition provides a comprehensive overview to the field of paleoanthropology the study of human evolution by analyzing fossil

remains It includes the latest fossil finds attempts to place humans into the context of geological and biological change on the planet and presents current controversies in an even handed manner *Erect Men/Undulating Women* Melanie G.

Wiber,2006-01-01 Based on intensive study of human origin illustrations responses from students and colleagues and research into reconstructive illustration and feminist criticism of Western art this ground breaking book traces the subtle ways in which paleoanthropological conventions have influenced and have shifted in the creation of these illustrations Wiber reveals that embedded meanings in these illustrations go beyond gender to include two other ubiquitous themes racial superiority and upward cultural progress Underlying all these themes she found a basic conservatism in the paleoanthropological approach to evolutionary theory *Erect Men Undulating Women* provides a deeper understanding of popularized illustrations of human origins but more importantly it encourages readers to gain a sensitivity to the ways in which Western culture constructs scientific findings that are compatible with its deeply held beliefs and values **KPS**

*The Wrong Ape for Early Human Origins* M. Kay Martin, 2023-04-11 The Wrong Ape for Early Human Origins examines ways in which the chimpanzee referential model has exerted a primary influence on evolutionary theory dominating portraits of proto and early human social life and in the broader sense of human nature itself Evidence on which this model is based is revisited along with new cross disciplinary findings that point to alternative scenarios for hominin phylogeny ecology and subsistence primeval kinship cognition and language and the respective roles played by aggression and cooperation as evolutionary drivers Recent advances in phylogenetics evolutionary biology and new additions to the fossil record are rendering linear monotypic models obsolete Contemporary theories on species divergence and change over time are shifting attention from ancient genotypes to factors that influence gene expression and from innate prescriptive behaviors to epigenesis and the capacity for behavioral plasticity This broader platform has the potential to fundamentally revise current notions about the basic nature phenotypic traits and lifeways of ancestral humans It informs a different profile of our progenitors one that reflects greater ecological bandwidth reliance on creative niche construction and hominin agency in the structuring of ancient reproductive and social groups

**Human Infancy** Daniel G. Freedman, 2016-07-07 Originally published in 1974 this volume is primarily devoted to what is known about human infancy from an ethological evolutionary viewpoint Included are discussions of pan specific traits presumably shared by all infants individual genetic variations on these behaviours as

judged by twin studies sex differences presumably shared by infants of all ethnic groups and genetically based ethnic differences However the author favours neither biological determinism nor cultural determinism and does not consider interactionism to be a viable solution Instead a monistic position is taken stressing the inseparability of the innate and the acquired of genetics and environment and of biology and culture The heredity environment issue is tackled head on throughout the volume The interaction between the two an implied dualism is described as a statistical abstraction from measured populations while the position here is that heredity and environment are not separable in any single organism In the same vein the author argues that on logical grounds everything one does every cultural act has within it some biological component Classification and Human Evolution Sherwood L. Washburn, 2017-07-28 The names given to the variety of man like fossils known to scientists should reflect no more than scientific views of the nature of human evolution However often in the past these names have also reflected confusion regarding the basic principles of scientific nomenclature and the matter has been further complicated by the many new finds of recent decades It is the unique purpose of this book to clarify the present state of knowledge regarding the main lines of human evolution by expressing what is known and what is surmised about them in appropriate taxonomic language The papers in this volume were prepared by the world's leading authorities on the subject and were revised in the light of discussions at a remarkable conference held in Austria in 1962 under the auspices of the Wenner Gren Foundation The authors review first the meaning of taxonomic statements as such and then consider the substance of our present knowledge regarding the number and characteristics of species among living and extinct primates including man and his ancestors They also examine the relationship of behavior changes and selection pressures in evolutionary sequences Ample illustrations bibliographies and an index enhance the permanent reference value of the book which will undoubtedly prove to be among the fundamental paleoanthropological works of our time

**Organizational Studies: Objectivity and its other**, 2001 *The Human Lineage* Matt Cartmill, Fred H. Smith, 2011-09-20 This textbook aimed at advanced undergraduates and postgraduates in paleoanthropology courses tackles a rather difficult task that of presenting the substantial body of paleontological genetic geological and archaeological evidence regarding human evolution and the associated scientific history in a logical and readable way without sacrificing either clarity or detail the sheer quality of the writing and explanatory synthesis in this book will undoubtedly make it a valuable resource for students for many years PaleoAnthropology 2010 This book focuses on the last ten million years of human history from the hominoid radiations to the emergence and diversification of modern humanity It draws upon the fossil record to shed light on the key scientific issues principles methods and history in paleoanthropology The book proceeds through the fossil record of human evolution by historical stages representing the acquisition of major human features that explain the success and distinctive properties of modern Homo sapiens Key features Provides thorough coverage of the fossil record and sites with data on key variables such as cranial capacity and body size estimates Offers a balanced critical

assessment of the interpretative models explaining pattern in the fossil record Each chapter incorporates a Blind Alley box focusing on once prevalent ideas now rejected such as the arboreal theory seed eating single species hypothesis and Piltdown man Promotes critical thinking by students while allowing instructors flexibility in structuring their teaching Densely illustrated with informative well labelled anatomical drawings and photographs Includes an annotated bibliography for advanced inquiry Written by established leaders in the field providing depth of expertise on evolutionary theory and anatomy through to functional morphology this textbook is essential reading for all advanced undergraduate students and beginning graduate students in biological anthropology

**African Ecology and Human Evolution** Francis Clark Howell, François Bourlière, 2008 The record of man's early evolution though still fragmentary is more complete on the African continent than anywhere else in the world The ecological context of this evolution however has been studied intensively only in recent years This pioneering volume draws together eminent specialists from many fields physical anthropologists zoologists geologists paleontologists and prehistorians who summarize here the results of their diverse research on Pleistocene environments and the cultural and biological evolution of man in Africa This volume was sponsored by the Wenner Gren Foundation for Anthropological Research Inc which met at Burg Wartenstein Austria The editors have field experience in Africa especially eastern and equatorial Africa This experience is coupled with their awareness of the need to integrate results of numerous field studies bearing on the biological behavioral evolution of higher primates with other field studies on the paleoecology and the mammalian ecology of sub Saharan Africa The book includes contributions on Pleistocene stratigraphy and climatic changes throughout the African continent on the origin and evolution of the earliest man like creatures in Africa on the dating distribution and adaptation of Pleistocene hunter gatherer peoples and on the ecology biology and social behavior of African primate and human populations The chapters reflect vividly the state of current knowledge at the time and indicate paths for future research Over 100 maps and figures detailed bibliographies and a comprehensive index contribute to the importance of the volume for basic reference use F Clark Howell is professor emeritus of paleoanthropology at the University of California Berkeley where he is co director of the Laboratory of Human Studies He is also curator at The University of California Museum of Paleontology François Bourlière 1913-1993 was professor of physiology at the University of Paris He is also credited with founding the Gerontology Research Unit of Institute of Health and Medical Research and was a member of Paris hospitals

**African Ecology and Human Evolution** François Bourlière, 2017-07-12 The record of man's early evolution though still fragmentary is more complete on the African continent than anywhere else in the world The ecological context of this evolution however has been studied intensively only in recent years This pioneering volume draws together eminent specialists from many fields physical anthropologists zoologists geologists paleontologists and prehistorians who summarize here the results of their diverse research on Pleistocene environments and the cultural and biological evolution of man in Africa This volume was sponsored by the Wenner Gren

Foundation for Anthropological Research Inc which met at Burg Wartenstein Austria The editors have field experience in Africa especially eastern and equatorial Africa This experience is coupled with their awareness of the need to integrate results of numerous field studies bearing on the biological behavioral evolution of higher primates with other field studies on the paleoecology and the mammalian ecology of sub Saharan Africa The book includes contributions on Pleistocene stratigraphy and climatic changes throughout the African continent on the origin and evolution of the earliest man like creatures in Africa on the dating distribution and adaptation of Pleistocene hunter gatherer peoples and on the ecology biology and social behavior of African primate and human populations The chapters reflect vividly the state of current knowledge at the time and indicate paths for future research Over 100 maps and figures detailed bibliographies and a comprehensive index contribute to the importance of the volume for basic reference use

### **Evolution of Human Behavior**

Warren G. Kinzey, 1987-01-01 This book represents an important meeting ground in the primatology field by exploring the various primate models that have been used in the reconstruction of early human behavior While some models are based on the proposition that a key behavioral feature such as hunting eating of seeds or monogamous mating led to the evolutionary separation of apes and humans other models suggest that one primate species such as the baboon or chimpanzee best exemplifies the behavior of our early ancestors Several contributors to the book take the position that no single primate is a good model and contend instead that a model must be eclectic One of the more innovative essays suggests that ancestral behavioral states can in fact be derived by comparing the behavior of all living hominid ape and human species Additionally several other contributors analyze and discuss the concept of model making noting deficiencies in earlier models while offering suggestions for future development Although it is true that a powerful conceptual model for reconstructing hominid behavior does not yet exist The Evolution of Human Behavior Primate Models suggests ways one may be constructed based on behavioral ecology and evolutionary theory

**Archaeology of Human Ancestry** Stephen Shennan, James Steele, 2005-08-15 Human social life is constrained and defined by our cognitive and emotional dispositions which are the legacy of our foraging ancestors But how difficult is it to reconstruct the social systems and cultural traditions of those ancestors The Archaeology of Human Ancestry provides a stimulating and provocative answer in which archaeologists and biological anthropologists set out and demonstrate their reconstructive methods Contributors use observations of primates and modern hunter gatherers to illuminate the fossil and artefactual records Thematic treatment covers the evolution of group size group composition and the emotional structure of social bonds sexual dimorphism and the sexual division of labour and the origins of human cultural traditions The Archaeology of Human Ancestry is an essential introduction to the subject for advanced undergraduates and researchers in archaeology and biological anthropology It will also be used by workers in psychology sociology and feminist studies as a resource for understanding human social origins

*Ride of the Second Horseman* Robert L. O'Connell, 1997-10-23 In Ride of

the Second Horseman Robert L O Connell probes the distant human past to show how and why war arose concluding that it is an invention an institution that formed due to very specific historical circumstances an institution that now verges on extinction He begins with a definition that distinguishes between war and mere feuding and draws on anthropology and archeology to locate the rise of war sometime after the human transition from nomadic hunting and gathering to agriculture when society split between farmers and pastoralists O Connell explores the histories of the civilizations of ancient Sumeria Egypt Assyria China and the New World showing how war came to each and how it adapted to varying circumstances Studying societies based on trade he finds that they employed war much more selectively and pragmatically Thus Minoan Crete long protected from marauding pastoralists developed a wealthy mercantile society marked by unmilitaristic attitudes equality between men and women and a relative absence of class distinctions In Assyria by contrast war came to be an end in itself in a culture dominated by male warriors Despite the violence in the world today O Connell finds reason for hope The industrial revolution broke the old patterns of subsistence war no longer serves the demographic purpose it once did Fascinating and provocative Ride of the Second Horseman offers a far reaching tour of human history that suggests the age old cycle of war may now be near its end
