Social Movements And Networks Relational Approaches To Collective Action

Gordon Clubb

Social Movements And Networks Relational Approaches To Collective Action:

Social Movements and Networks Mario Diani, Doug McAdam, 2003 *Social Movements and Networks* examines the extent to which a network approach should inform research on collective action. For the first time in a single volume leading social movements researchers systematically map out and assess the contribution of social network approaches to their field of enquiry in light of broader theoretical perspective. By exploring how networks affect individual contributions to collective action in both democratic and non democratic organizations and how patterns of inter organizational linkages affect the circulation of resources within and between movements the authors show how network concepts improve our grasp of the relationship between social movements and elites and of the dynamics of the political processes. *Social Movements and Networks* Mario Diani, Doug McAdam, 2005 *Social Movements and Networks*, 2003 **Social Movements and Networks** Mario Diani, Doug McAdam, 2003 This title examines the extent to which a network approach should inform research on collective action. By exploring how networks affect individual contributions to collective action in both democratic and non democratic organizations *Social movements and networks : relational approaches to collective action* Mario ; McAdam Diani (Doug (eds.)), 2020 **Research in Social Movements, Conflicts and Change** Patrick G. Coy, 2010-03-05 *Research in Social Movements Conflicts and Change* showcases deeply empirical and often multi method research by senior and junior scholars alike. Comparative analysis and qualitative case studies push into new territories in this illuminating and important research which seeks to define and advance the multiple fields reflected in the series title **Social Networks and Social Movements** Nick Crossley, 2016-03-22 The concept of networks and the techniques of social network analysis have each assumed increasing importance in social science in recent years not least in relation to the analysis of collective action and particularly social movements. This timely collection offers a fascinating glimpse into the state of the art. Each chapter uses network analysis to tackle a different question regarding the nature and dynamics of social movement activity and each reflects upon the advantages and limitations of the method for its purposes. The case studies focused upon are drawn from a variety of national contexts both contemporary and historical and both the methods used and the uses to which they are put are no less diverse. A must have book for anybody interested in social movement networks and contemporary ways of analysing them. This book was published as a special issue of *Social Movement Studies* **The Oxford Handbook of Political Networks** Jennifer Nicoll Victor, Alexander H. Montgomery, Mark Lubell, 2018 Politics is intuitively about relationships but until recently the network perspective has not been a dominant part of the methodological paradigm that political scientists use to study politics. This volume is a foundational statement about networks in the study of politics. *The Sage Handbook of Social Network Analysis* John McLevey, John Scott, Peter J. Carrington, 2023-10-01 This new edition of *The Sage Handbook of Social Network Analysis* builds on the success of its predecessor offering a comprehensive overview of social network analysis produced by leading international scholars in the field. Brand new

chapters provide both significant updates to topics covered in the first edition as well as discussing cutting edge topics that have developed since including new chapters on General issues such as social categories and computational social science Applications in contexts such as environmental policy gender ethnicity cognition and social media and digital networks Concepts and methods such as centrality blockmodeling multilevel network analysis spatial analysis data collection and beyond By providing authoritative accounts of the history theories and methodology of various disciplines and topics the second edition of The SAGE Handbook of Social Network Analysis is designed to provide a state of the art presentation of classic and contemporary views and to lay the foundations for the further development of the area

PART 1 GENERAL ISSUES
PART 2 APPLICATIONS
PART 3 CONCEPTS AND METHODS

Environmental Networks and Social Movement Theory
 Clare Saunders, 2013-06-06 Are environmentalists in Britain part of a transnational movement or are they tactically and ideologically distinct How can we understand the environmental movement within the context of social movement theory Based on detailed empirical research this is a penetrating analysis of the state of the environmental movement

Advances in the Visual Analysis of Social Movements
 Nicole Doerr, Alice Mattoni, Simon Teune, 2013-03-14 This special issue is a key text in the current study of social movements It introduces new analytical concepts for understanding visuals in social movements and examines case studies from across the globe such as analysis of the symbols used in the Egyptian uprising and contested images from anti surveillance protests in Europe

Contentious Minds
 Florence Passy, Gian-Andrea Monsch, 2020 This is an open access title available under the terms of a CC BY NC ND 4.0 International license It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations Why does the mind matter for collective action In *Contentious Minds* Florence Passy and Gian Andrea Monsch explain how cognitive and relational processes allow activists participate in and sustain their commitment to activism Based on a wide array of survey and interview data with activists engaged in protest volunteering and unions they highlight how a commitment community develop shared values identities and meanings through interaction The interplay of talk and ties enables stories and meanings to be constructed and exchanged conveys worldviews and intentions that are modified through ongoing conversations and reinforces and maintains commitment over time Passy and Monsch's ambitious work brings the mind and culture back into the study of social movements and highlights the crucial role social networks play in constructing the communities and shared values that sustain commitment

Dark Web
 Hsinchun Chen, 2011-12-17 The University of Arizona Artificial Intelligence Lab AI Lab Dark Web project is a long term scientific research program that aims to study and understand the international terrorism Jihadist phenomena via a computational data centric approach We aim to collect ALL web content generated by international terrorist groups including web sites forums chat rooms blogs social networking sites videos virtual world etc We have developed various multilingual data mining text mining and web mining techniques to perform link analysis content analysis web metrics technical sophistication analysis sentiment analysis authorship analysis

and video analysis in our research The approaches and methods developed in this project contribute to advancing the field of Intelligence and Security Informatics ISI Such advances will help related stakeholders to perform terrorism research and facilitate international security and peace This monograph aims to provide an overview of the Dark Web landscape suggest a systematic computational approach to understanding the problems and illustrate with selected techniques methods and case studies developed by the University of Arizona AI Lab Dark Web team members This work aims to provide an interdisciplinary and understandable monograph about Dark Web research along three dimensions methodological issues in Dark Web research database and computational techniques to support information collection and data mining and legal social privacy and data confidentiality challenges and approaches It will bring useful knowledge to scientists security professionals counterterrorism experts and policy makers The monograph can also serve as a reference material or textbook in graduate level courses related to information security information policy information assurance information systems terrorism and public policy

To Care for Creation Stephen Ellingson, 2016-08-26 Controversial megachurch pastor Mark Driscoll proclaimed from a conference stage in 2013 I know who made the environment and he s coming back and going to burn it all up So yes I drive an SUV The comment which Driscoll later explained away as a joke highlights what has been a long history of religious anti environmentalism Given how firmly entrenched this sentiment has been surprising inroads have been made by a new movement with few financial resources which is deeply committed to promoting green religious traditions and creating a new environmental ethic To Care for Creation chronicles this movement and explains how it has emerged despite institutional and cultural barriers as well as the hurdles posed by logic and practices that set religious environmental organizations apart from the secular movement Ellingson takes a deep dive into the ways entrepreneurial activists tap into and improvise on a variety of theological ethical and symbolic traditions in order to issue a compelling call to arms that mobilizes religious audiences Drawing on interviews with the leaders of more than sixty of these organizations Ellingson deftly illustrates how activists borrow and rework resources from various traditions to create new meanings for religion nature and the religious person s duty to the natural world

Salafism in Lebanon Zoltan Pall, 2018-04-05 The past two decades have seen an increasing association between Lebanese Salafism and violence with less attention being paid to Salafis who focus on peaceful proselytization In reality it is these Salafis whose influence has dramatically grown since the eruption of the Syrian conflict that profoundly affected Lebanon as well Based on extensive fieldwork Zoltan Pall offers insights into the dynamics of non violent Lebanese Salafi groups and examines the importance of transnational links in shaping the trajectory of the movement In particular he shows how the internal transformation of Salafism in Kuwait Qatar and Saudi Arabia led to the fragmentation of the Lebanese Salafi community By analysing Salafism as a network we see how the movement creates and mobilizes material and symbolic resources and how it contributes to reshaping the structures of authority within the country s Sunni Muslim community

Network Mobilization Dynamics in Uncertain Times in the

Middle East and North Africa Frédéric Volpi, Janine A. Clark, 2020-06-29 This comprehensive volume investigates the dynamics of mobilization and demobilization of social networks before during and after episodes of political turbulence in the Middle East region focusing particularly on the 2011 Arab uprisings The authors consider important questions regarding agency strategic action and institutional outcomes that have significance for social mobilization social movements and authoritarian governance This collection proposes an interactive perspective linking up contentious politics with routine governance through a dynamic articulation of repertoires of contention The authors use a micro mobilization perspective to frame the different trajectories of protest networks in times of uncertainty They place the interactions between grassroots activists structured organizations and state actors at the centre of the explanation of change and stability in the recent mobilizations of the region By starting with descriptions of interactions at the grassroots level the authors then explain macro level dynamics between networks and other players including the state This book was originally published as a special issue of the journal *Social Movement Studies*

Urban Grassroots Movements in Central and Eastern Europe Professor Kerstin Jacobsson, 2015-08-28 By studying urban activism in Central and Eastern Europe this volume argues that the recent resurgence of urban grassroots mobilisation represents a new phase in the development of post socialist civil societies and that these civil societies have significantly more vitality than is commonly perceived The case studies here reflect the diversity and complexity of post socialist urban movements capturing also the extent to which the laboratory of urban politics is richly illustrative of the complex nexus of state society market relations within post socialism

Social Movement De-Radicalisation and the Decline of Terrorism Gordon Clubb, 2016-10-04 By drawing on social movement theories this book explains how terrorist movements decline using the case of Irish Republicanism The continuity of terrorism and political violence from generation to generation demonstrates the need to go beyond a focus on groups or individuals in order to explain how terrorism ends The concept of de radicalisation has been critiqued for its lack of explanatory value in accounting for disengagement from terrorism or how the risk of terrorism re emerging is reduced However building on the morphogenetic approach this book distinguishes between structure culture and agency over time in order to analyse the causal influence between the two Two processes are analysed disengagement framing processes explain how actors change attitudes to violence and the book identifies which factors ensure frames resonate with audiences and social movement de radicalisation accounts for the outcomes of disengagement in initiating structural change which transforms the landscape the next generation finds itself in The fundamental aim of the book is to provide theoretical and conceptual insights into how terrorism can not only come to an end but can be prevented from emerging to be a significant threat again within a society This book will be of much interest to students of terrorism and political violence social movement theory British and Irish Politics war and conflict studies security studies and IR in general

Civil Societies and Social Movements Derrick Purdue, 2007-04-23 This volume examines and contributes to debates surrounding social capital

social movements and the role of civil society in emerging forms of governance The authors adopt a broad range of research approaches from testing hypotheses drawn from rational choice theory against available statistics on associations to ethnographic study of emerging attempts at participant deliberative democracy Divided into three clear sections focusing on the following core aspects of civil society the position of civic organizations between state and society in emerging forms of governance the geographical scales of social movement mobilizations and actions from the local to the global the patterns of public trust and civic engagement that falls under the rubric of social capital The book draws on case studies from a wide range of countries including Russia Ukraine Britain Greece Spain Germany Argentina and new Asian democracies Presenting current research on the key dimensions of civil society Civil Societies and Social Movements will appeal to those researching and studying in the fields of political science sociology and social policy

The Future of Social Movement Research

Jacqueline van Stekelenburg, Conny Roggeband, Bert Klandermans, 2013-07-01 Are the dynamics of contention changing This is the question confronted by the contributors of this volume among the most influential scholars in the field of social movements The answers arriving at a time of extraordinary worldwide turmoil not only provide a wide ranging and varied understanding of how social movements arise and persist but also engender unanswered questions pointing to new theoretical strands and fields of research The Future of Social Movement Research asks How are the dynamics of contention shaped by globalization By societies that are becoming increasingly more individualized and diverse By the spread of new communication technologies such as social media cell phones and the Internet Why do some movements survive while others dissipate Do local and global networks differ in nature The authors essays explore such questions with reference to changes in three domains of contention the demand of protest changes in grievances and identities the supply of protest changes in organizations and networks and how these changes affect the dynamics of mobilization In doing so they theorize and make empirically insightful how globalization individualization and virtualization create new grievances new venues for action new action forms and new structures of contention The resulting work brought together through engaging discussions and debates between the contributors is interdisciplinary and unusually broad in scope constituting the most comprehensive overview of the dynamics of social movements available today Contributors Marije Boekkooi VU U Amsterdam Pang Ching Bobby Chen U of California Merced Donatella della Porta European U Institute Mario Diani U of Trento Italy Jan Willem Duyvendak U of Amsterdam Myra Marx Ferree U of Wisconsin Madison Beth Garrity Gardner Ashley Gromis Swen Hutter U of Munich Ruud Koopmans WZB Berlin Hanspeter Kriesi U of Zurich Nonna Mayer National Centre for European Studies Doug McAdam Stanford U John D McCarthy Pennsylvania State U Debra Minkoff Barnard College Columbia U Alice Motes Pamela E Oliver U of Wisconsin Madison Francesca Polletta U of California Irvine Jacomijn Prins VU U Amsterdam Patrick Rafail Tulane U Christopher Rootes U of Kent Canterbury Dieter Rucht Free U of Berlin David A Snow U of California Irvine Sarah A Soule Stanford U Suzanne Staggenborg U of Pittsburgh Sidney Tarrow Cornell U Verta Taylor U of California Santa
