helplessness Abramson Seligman Rodin 1986 cardiovascular disease Matthews 1982 cancer Sklar Ryckman 1979 and post abortion adjustment Mueller Jones Kelley 1967 for example have suggested that causal inferences arise from a desire to render the social world predictable and controllable Similarly control has been implicated as an important mediator of cognitive dissonance Wicklund Kiesler Collins Miller 1969 Despite the apparent centrality of control motivation to a variety of social psychological phenomena until recently there has been relatively little research explicitly concerned with the effects of control motivation on the cognitive processes underlying such phenomena cf

**Health and the Construction of the Individual** Jane Ogden, 2023-05-26 How do social scientists create facts? What strategies do they use to construct knowledge? How does social science make sense of the individual? Critical studies of both medical and scientific knowledge have been conducted but social science knowledge remains relatively unquestioned. Addressing this question *Health and the Construction of the Individual* originally published in 2002 is a social study of social science. Jane Ogden focuses particularly on constructions of the individual in health related psychology and sociology. She explores how social science texts construct social science facts using the strategies of theory, methodology, measurement and rhetorical boundaries and argues that the individual is not only constructed through the dissemination of social science knowledge but through the mechanics of its production. The results provide a unique insight into the transformation of the individual as an ever changing self from both a historical and social constructionist perspective. This title will make fascinating reading for health psychologists, medical sociologists, social constructionists and all students and researchers interested in gaining a greater understanding of the premises underlying social science.

**Respect and Loathing in American Democracy** Jeff Spinner-Halev, Elizabeth Theiss-Morse, 2024-03-29 A deep examination of why respect is in short supply in politics today and why it matters. Respect is in trouble in the United States. Many Americans believe respecting others is a necessary virtue yet many struggle to respect opposing partisans. Surprisingly, it is liberal citizens who hold respect as central to their view of democratic equality who often have difficulty granting respect to others. Drawing on evidence from national surveys, focus groups, survey experiments and the views of political theorists, Jeff Spinner Halev and Elizabeth Theiss Morse explain why this is and why respect is vital to and yet so lacking in contemporary US politics. *Respect and Loathing in American Democracy* argues that liberals and conservatives are less divided than many believe but alienate one another because they moralize different issues. Liberals moralize social justice; conservatives champion national solidarity and this worldview divide keeps them at odds. Respect is both far reaching and vital yet it is much harder to grant than many recognize partly because of the unseen tension between respect, social justice and national solidarity. *Respect and Loathing in American Democracy* proposes a path forward that while challenging is far from impossible for citizens to traverse.
