Cross-Cultural Perspectives on the Experience and Expression of Love Victor Karandashev, 2019-06-05. This ambitious volume integrates findings from various disciplines in a comprehensive description of the modern research on love and provides a systematic review of love experience and expression from a cross-cultural perspective. It explores numerous interdisciplinary topics, bringing together research in biological and social sciences to explore love, probing the cross-cultural similarities and differences in the feelings, thoughts, and expressions of love. The book's scope, which includes a review of major theories and key research instruments, provides a comprehensive background for any reader interested in developing an enlightened understanding of the cultural diversity in the concepts, experience, and expression of love. Included among the chapters: How do people in different cultures conceptualize love? How similar and different are the experiences and expressions of love across cultures? What are the cultural factors affecting the experience and expression of love? Cross-cultural understanding of love as passion, joy, commitment, union, respect, submission, intimacy, dependency, and more. A review of the past and looking into the future of cross-cultural love research. Critical reading for our global age. *Cross-Cultural Perspectives on the Experience and Expression of Love* promotes a thorough understanding of cross-cultural similarities and differences in love and, in so doing, is valuable not only for love scholars, emotion researchers, and social psychologists but also for practitioners and clinicians working with multicultural couples and families. The most striking feature of this book is the broad array of perspectives that is covered. Love is portrayed as a universally found emotion with biological underpinnings. The text expands from this core, incorporating a wide range of manifestations of love: passion, admiration, and submission to a partner; gift giving and benevolence; attachment and trust, etc. Information on each topic comes from a variety of sources, cross-culturally and interdisciplinary. The text is integrative, with a focus on the informational value of ideas and findings. If you take an interest in how love, in its broadest sense, is experienced and expressed, you will find this to be a very rich text. Ype H. Poortinga, Tilburg University, The Netherlands; Catholic University of Leuven, Leuven, Belgium. In this wide-ranging book, Victor Karandashev expertly guides us through the dazzling complexity of our concept and experience of love. Not only does he show the many different ingredients that make up our conceptions of love in particular cultures, such as idealization of the beloved, commitment, union, intimacy, friendship, and others, he draws our attention to the bewildering array of differences between their applications in different cultural contexts or to their presence or absence in a culture. In reading the book, we also get as a bonus an idea of how an elusive concept such as love can be scientifically studied by a variety of methodologies, all to our benefit. A masterful accomplishment. K. Vecses Zoltán, Eötvös Loránd University, Budapest, Hungary. Long considered a research

purview of only a portion of the world's cultures we know today that love is universal albeit with many cultural differences in meaning form and expression Moreover love has a rich history of scholarship across multiple disciplines Within this backdrop Karandashev has compiled a remarkably comprehensive global review of how people experience and express their emotions in love Covering the topic from a truly international and interdisciplinary perspective this book is an indispensable source of knowledge about cultural and cross cultural studies conducted in recent decades and is a must read for anyone interested in the universal and culturally diverse aspects of love David Matsumoto San Francisco State University Director of SFSU's Culture and Emotion Research Laboratory Social Psychology in Sport Sophia Jowett, David Lavallee, 2007 The book is designed to allow readers to study issues in isolation or as part of a course or a module The five main parts are Relationships in Sport Coach Leadership and Group Dynamics Motivational Climate Key Social and Cognitive Processes in Sport and The Athlete in the Wider Sport Environment Each chapter is cross referenced and provides a clear description of the topic and a concise theoretical overview along with a discussion of existing research The chapters also introduce new research ideas suggest practical research applications and conclude with summaries and questions to help instructors engage the class in discussion and to help students follow the key points Publisher's website Emotions in Social Psychology W. Psychological Aspects of Social Axioms Kwok Leung, Michael Harris Bond, 2008-12-29 Humans are surrounded by trillions of stimuli Their eyes for instance can discriminate 7 500 000 colors But there is a severe limitation in the number of discriminably different stimuli that they can process at one time George Miller argued that they can handle no more than seven plus or minus two independent pieces of information at any given time Thus necessarily they must develop ways to simplify the task of processing the information that

exists in their environment They do this in many ways One way is to select the stimuli that are most important in their lives what are often called values Another way is to chunk stimuli by linking them to each other so they form bundles of stimuli that can be processed as if they are one entity Generalized expectancies of what is linked with what are beliefs and these beliefs are structured into bundles see Triandis 1972 The Praeger Handbook of Personality across Cultures A. Timothy Church Ph.D.,2017-07-14 This important multivolume work sheds light on current and future research on cultural universals and differences in personality in their evolutionary ecological and cultural contexts How does culture impact personality traits To answer that question the three volumes in this set address current theory and research on culture and personality in an effort to determine how people differ and how they are alike Detailed chapters by scholars from around the world unveil a fascinating picture of the relationship between culture and important aspects of personality They also address the accuracy or meaningfulness of trait comparisons across cultures and the methods and limitations of research on the subject As most psychological research is conducted on participants from Western industrialized countries a work that includes a wide range of cultures not only fosters a more complete understanding of human personality but also broadens perspectives on value systems and ways to live Each of the three volumes concentrates on distinct areas of research exposing the reader to the diverse theoretical and empirical approaches and topics in the field Volume 1 focuses on the cross cultural study of personality dispositions or traits Volume 2 examines the relationship between culture and other important aspects of personality including the self emotions motives values beliefs and life narratives as well as aspects of personality and adjustment associated with biculturalism and intercultural competence Volume 3 looks at evolutionary genetic and neuroscience perspectives on personality across cultures along with ecological and cultural influences In addition to providing readers with a thorough analysis of current and future directions for research this unrivaled work brings together multiple perspectives on personality across cultures thereby promoting a more integrative understanding of this important topic **Between State and Market** Kahanoff Foundation.
