

THE SOCIAL PSYCHOLOGY OF AGGRESSION

Thoroughly revised and updated, this third edition offers a comprehensive and up-to-date overview of the social psychology of aggression, covering all the relevant major theories, individual differences, situational factors, and applied contexts.

Understanding the causes, forms, and consequences of aggression and violence is critical for dealing with these harmful forms of social behaviour. Addressing a range of sub-topics, the first part deals with the definition and measurement of aggression, presents major theories, examines the development of aggression and discusses individual and gender differences in aggressive behaviour. It covers the role of situational factors in eliciting aggression and the impact of exposure to violence in the media. The second part examines specific forms and manifestations of aggression, including chapters on aggression in everyday contexts and in the family, sexual aggression, intergroup aggression, and terrorism. The new edition also includes additional coverage of gender differences, gun violence, and terrorism, to reflect the latest research developments in the field.

Also discussing strategies for reducing and preventing aggression, this book is essential reading for students and researchers in psychology and related disciplines, as well as practitioners and policy makers.

Barbara Krahe is Professor of Social Psychology at the University of Potsdam, Germany. She was awarded the German Psychology Prize for her work on aggression in 2015 and has served as President of the International Society for Research on Aggression.

Human Aggression Robert A. Baron, 2013-04-17 also many newer lines of research to which I will return below are represented in various chapters And finally I have included a separate unit on methods for the study of aggression a feature that I believe to be unique to the present volume In these ways I have attempted to produce a text that is as broad and eclectic in coverage as I could make it While the present volume grew in part out of my desire to produce what I thought might prove to be a useful teaching aid it also developed out of a second major motive During the past few years a large number of new and to me exciting lines of investigation have emerged in rapid order These have been extremely varied in scope including among many others such diverse topics as the effects of sexual arousal upon aggression the impact of environmental factors e g heat noise crowding upon such behavior interracial aggression and the influence of heightened self awareness Despite the fact that such topics have already generated a considerable amount of research they were not to my knowledge adequately represented in any existing volume Given this state of affairs it seemed to me that a reasonably comprehensive summary of this newer work might prove both useful and timely

Handbook of Aggressive and Destructive Behavior in Psychiatric Patients Robert T. Ammerman, Michel Hersen, L.A. Sisson, 2012-12-06 Scarcely a day passes without the media detailing some form of human aggression whether it be on its grandest scale in the form of war random bombings and shootings in the streets torture in a prison camp murder by gangs wife abuse resulting in the murder of the husband or the physical abuse of children sometimes resulting in their death Frequently perpetrators of human aggression when arrested and tried in court resort to a psychiatric defense But are all such aggressors indeed appropriately psychiatric patients And if so what are their particular diagnoses and how do these relate to aggression Also of concern is aggression directed against self as evidenced in the rising incidence of suicide among young people or the self mutilation of patients suffering from certain personality disorders Both violence directed outward and aggression toward oneself pose considerable challenges to clinical management whether in the therapist's office or in the inpatient unit Although we have not been able to find successful deterrents to aggression a sizeable body of evidence does exist certainly of a descriptive nature Such data for psychiatric patients are scattered however and can be found in literatures as diverse as the biological ethological epidemiological legal philosophical psychological psychiatric and criminological Therefore given the increased frequency with which mental health professionals encounter cases of violence in their day to day work we believed it important that existing data be adduced in one comprehensive volume

International Handbook of Violence Research Wilhelm Heitmeyer, John Hagan, 2005-08-12 An international manual is like a world cruise a once in a lifetime experience All the more reason to consider carefully whether it is necessary This can hardly be the case if previous research in the selected field has already been the subject of an earlier review or even several competing surveys On the other hand more thorough study is necessary if the intensity and scope of research are increasing without comprehensive assessments That was the situation in Western societies when work began on this project in the summer of 1998 It was then too that the challenges emerged any manual especially an international one is a very special type of text which is anything but routine It calls for a special effort the state of the art has to be documented for selected subject areas and its presentation made as compelling as possible The editors were delighted therefore by the cooperation and commitment shown by the eighty one contributors from ten countries who were recruited to write on the sixty two different topics by the constructive way in which any requests for changes were dealt with and by the patient response to our many queries This volume is the result of a long process It began with the first drafts outlining the structure of the work which were submitted to various distinguished colleagues Friedhelm Neidhardt of Berlin Gertrud Nunner Winkler of Munich and Roland Eckert of Trier to name only a few supplied valuable comments at this stage Human Aggression Russell G. Geen, Edward D. Donnerstein, 1998-08-20 For centuries scholars have debated the causes of aggression and the means to reduce its occurrence Human Aggression brings together internationally recognized experts discussing the most current

psychological research on the causes and prevention of aggression Scholars policy makers practitioners and those generally concerned with the growing issue of aggression find this a much needed reference work Topics include how aggression is related to the usage of drugs how temperature affects aggression the effect of the mass media on aggression violence by men against women and the treatment of anger aggression in clinical settings The book also provides a comprehensive review of theory and methodology in the study of aggression Presents the latest research findings from internationally recognized researchers Familiarizes the reader with implications of aggression research Examines the causes and prevention of aggression Offers perspectives for both the researcher and policy maker
