Sociology James Fulcher, John Scott, 2011-03-17 Sociology is relevant to current teaching and courses dealing with sociology as a living subject and incorporating the classic traditions of the discipline. This new edition has been updated with a range of new case studies and additional chapters. Handbook of Post-Western Sociology: From East Asia to Europe, 2023-04-03 Beyond hegemonic thoughts, the Post-Western sociology enables a new dialogue between East Asia, China, Japan, Korea, and Europe on common and local knowledge to consider theoretical continuities and discontinuities to develop transnational methodological spaces and co-produce creolized concepts. With this new paradigm in social sciences, we introduce the multiplication of epistemic autonomies vis-à-vis Western hegemony and new theoretical assemblages between East Asia and European sociologies. From this ecology of knowledge, this groundbreaking contribution is to co-produce a post-Western space in a cross-pollination process where Western and non-Western knowledge do interact articulated through cosmovisions as well as to co-produce transnational fieldwork practices. *Globalization and Everyday Life* Larry Ray, 2007-08-07 This book explains the meanings of globalization as a concept, discussing the key debates and pointing towards new ways of understanding the process as a whole. *Restitution and the Politics of Repair* Magdalena Zolkos, 2020-09-21 Analyses the social imaginary of undoing repair and return underpinning the international norm of restitution. Making Approaches restitution not just as a legal norm of property return but as a social imaginary and a cultural psychoanalytic scene of undoing repair and return. Brings together philosophic, political, socio-legal, and cultural psychoanalytic approaches to the study of restitution. Outlines a heterogeneous and multifaceted idea of restitution emergent in modernity and looks at the peripheries of the modern restitutive tradition in the search for alternatives and counter-traditions. This book takes a unique approach grounded in political and cultural discourse to develop a political theory of restitution. Challenging assumptions about restitution in the Western legal and political tradition where it has become nearly synonymous with reacquisition and where legal studies focus on material objects and claims to their ownership, Zolkos argues that the development of restitutive norms has been auxiliary to the emergence of modern state sovereignty and excavates the restitutive tradition's mythical religious substrate. Bringing together texts from within and without the Western canon of political theory and philosophy, including the writings of Grotius, Durkheim, Freud, and Klein, as well as Mary Shelley's *Frankenstein*, the book undertakes a dual task: reading literary texts as a political theorising of restitution and reading political or sociological texts as literary narratives with distinctive restitutive tropes of repair, undoing, and return. **A Sociological Approach to Health Determinants** Toni Schofield, 2015-02-03 A Sociological Approach to Health Determinants investigates how the social works in determining health and health inequity. Taking a global perspective, the

book shines a light on how experiences of health illness and health care are shaped by a variety of complex social dynamics Informed primarily by sociology the book engages with the WHO s social determinants of health approach and draws on contributions from history political economy and policy analysis to examine issues such as class gender ethnicity and indigeneity and the impact they have on health A Sociological Approach to Health Determinants is a comprehensive resource that provides a new perspective on the influence of social structures on health and how our understanding of the social can ensure improved health outcomes for people all over the globe *Place, Diversity and Solidarity* Stijn Oosterlynck, Nick Schuermans, Maarten Loopmans, 2017-05-08 In many countries particularly in the Global North established forms of solidarity within communities are said to be challenged by the increasing ethnic and cultural diversity of the population Against the backdrop of renewed geopolitical tensions which inflate and exploit ethno cultural rather than political economic cleavages concerns are raised that ethnic and cultural diversity challenge both the formal mechanisms of redistribution and informal acts of charity reciprocity and support which underpin common notions of community This book focuses on the innovative forms of solidarity that develop around the joint appropriation and the envisaged common future of specific places Drawing on examples from schools streets community centres workplaces churches housing projects and sporting projects it provides an alternative research agenda from the loss of community narrative It reflects on the different spatiotemporal frames in which solidarities are nurtured the connections forged between solidarity and citizenship and the role of interventions by professionals to nurture solidarity in diversity This timely and original work will be essential reading for those working in human geography sociology ethnic studies social work urban studies political studies and cultural studies **Key Concepts in Family Studies** Jane Ribbens McCarthy, Rosalind Edwards, 2010-12-10 This is a thoughtful and sometimes challenging elaboration of some of the key concepts in contemporary family studies Students and researchers will want to have this book close to hand not simply as a reference work but as a stimulus to critical social analysis David H J Morgan University of Manchester Written in an intelligent engaging and accessible manner by two leading and highly respected family scholars whose contributions to the field over the past two decades have been path breaking This is an important resource for students and professionals studying and working in the field of family studies within and across the disciplines of sociology social policy social work health studies education and gender studies Andrea Doucet Carleton University This book s individual entries introduce explain and contextualise key topics within the study of family lives Definitions summaries and key words are developed throughout with careful cross referencing allowing students to move effortlessly between core ideas and themes Each entry provides Clear definitions Lucid accounts of key issues Up to date suggestions for further reading Informative cross referencin Relevant focused and accessible this book will provide students with an indispensable guide to the central concepts of family studies **Working and Caring over the Twentieth Century** J. Brannen, P. Moss, A. Mooney, 2004-09-06 Increased longevity and better health are changing the nature of family life In the context of changes in

the world of work increased divorce and a declining welfare state multi generation or beanpole families are a potential resource for family support Focusing on four generation families and the two central careers of the life course employment and care Working and Caring Over the Twentieth Century explores this question Based upon new research that employed biographical methods it maps in detail from 1910 to the late 1990s the lives of men and women as great grandparents grandparents and parents The book provides unique insights into processes of change and continuity in family lives and the ways in which different generations of men and women make sense of their lives Participation, Marginalization and Welfare Services Aila-Leena Matthies,Lars Uggerhøj,2016-05-13 Current debates around participation and marginalization dominate the agenda of many European political forums There is an increasing concern about the stability of social cohesion and a growing number of particular groups of people who are regarded as being at risk of being socially excluded or marginalized This volume goes beyond the surface of public discussions to look at the central role played by welfare services in European societies in either strengthening or hindering participatory citizenship and democracy In current discussions welfare services understood in a broad sense are centrally positioned there are high expectations that welfare services can hinder marginalization and enable participation Yet marginalization is in most cases rooted in the deeper structures of society with economy participation and involvement dependent on political or highly personal factors which are beyond the scope of welfare services This groundbreaking volume posits that participation and marginalization are twin concepts expressing opposing sides of one and the same processes faced by individuals and communities It will be essential reading for social workers sociologists and policy makers throughout Europe
